POWER AFRICA

A U.S. GOVERNMENT-LED PARTNERSHIP

Updated March 2024

A U.S. government-led partnership, Power Africa harnesses the collective resources of the public and private sectors to double access to electricity in sub-Saharan Africa.

Since 2013, Power Africa has helped deliver new or improved electricity to more than **200 million** people across sub-Saharan Africa. Power Africa-supported projects are generating nearly **8,000 MW** of new, cleaner and more reliable electricity, helping to mitigate climate change and end energy poverty. In 2023, Power Africa-supported renewable power generation projects helped avoid more than 10 million tons of CO₂ emissions, the equivalent of removing over 2.2 million gas-powered cars from the road for one year.¹

OUR GOALS

Add more than
30,000 MW
of cleaner and more reliable
electricity generation capacity

Connect
60 MILLION
new homes and businesses
to power by 2030

Improve lives for over
590 MILLION
by powering health, education,
and prosperity

HOW WE WORK

Power Africa partners with African governments, the private sector, international organizations, NGOs, and bilateral and multilateral donors to stimulate investment in sub-Saharan Africa's energy sector.

Our unique approach is defined by:

Transaction Focus: By addressing the critical barriers that hinder progress of a particular deal, we create a ripple effect for other deals facing similar issues in the country.

On-the-Ground Support: Power Africa's in-country advisors identify the technical, financial, and political solutions needed to facilitate faster access to power.

Working Beyond the Grid: With numerous investors and partners committed to finding small-scale and off-grid renewable energy solutions, Power Africa is providing millions of people access to reliable and sustainable electricity for the first time.

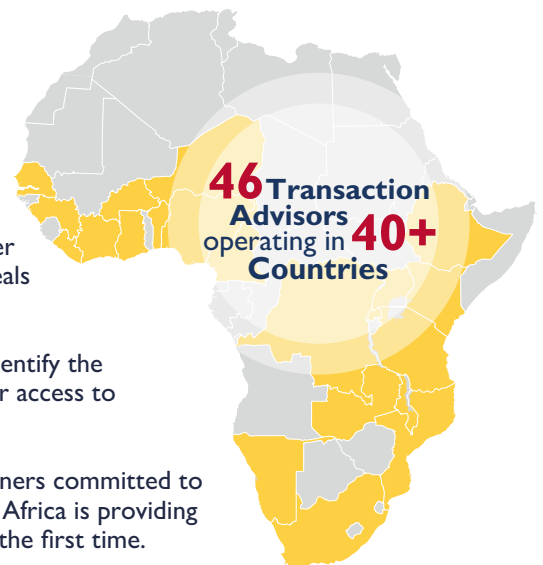

Bridging the Financing Gap: Power Africa's aim is to de-risk investments to enable public and private investors to fund projects that drive systemic reforms.

African-led Reform: Power Africa works with African governments to fill critical skills gaps, drive reforms, and build and maintain power sectors for generations to come.

Empowering and Powering Women: Power Africa supports projects, programs and policies that strive to reduce gender inequalities and promote engagement of both men and women.
