FROM THE AMERICAN PEOPLE

# ONE HEALTHWORKFORCE NEXT GENERATION

## OUR MISSION

To support the **Africa One Health University Network (AFROHUN)** and **Southeast Asia One Health University Network (SEAOHUN)** in building scalable and sustainable systems that train and empower human resources to combat complex and dynamic global health threats in the world's most vulnerable areas for disease emergence.

## AT THE CORE OF ONE HEALTH

The COVID-19 pandemic highlights the importance of a well prepared and technically skilled One Health workforce for disease prevention, detection, and response. A large-scale, multidisciplinary network of health professionals is critical for strengthening our biodefense's and achieving global health security.

Founded in 2011 with the support of USAID, AFROHUN and SEAOHUN forged university networks to train and equip the health workforce with the One Health skills needed to prevent, detect, and respond to health threats such as emerging infectious diseases and antimicrobial resistance.

## ABOUT THE PROJECT

Building on the foundation established by USAID's Emerging Pandemic Threats RESPOND (2009- 2014) and One Health Workforce (2014-2019) Projects, **USAID One Health Workforce - Next Generation (OHW-NG)** is supporting AFROHUN (formerly OHCEA) and SEAOHUN to become global leaders in One Health by delivering state-of-the-art, scalable, and sustainable systems for training and empowering the health workforce. Together, we are creating the "next generation" health workforce that engages across disciplines and ensures human, animal, and environmental health professionals have the capacity to prevent, detect, and respond to our world's greatest health threats.

Using a variety of training formats, such as One Health student clubs and experiential learning platforms to reach students and workforce professionals, OHW-NG is driving the use of critical One Health competencies that ensure individuals have the knowledge and applied skills to work across disciplines on complex health challenges. As well, OHW-NG is working to enhance AFROHUN and SEAOHUN's adaptive response and decision-making capabilities and to support the development of strategies for long- term organizational sustainability and self-reliance.

*One Health Workforce – Next Generation Project objectives: 1. Increase proficiency in One Health competencies and establish a well-trained and technically proficient workforce pipeline. 2. Strengthen systems and procedures to assess and track multi-sectoral workforce placement, performance, and impact. 3. Empower AFROHUN & SEAOHUN by strengthening their organizational capacities.*

## OUR GLOBAL CONSORTIUM

The OHW-NG Global Consortium is a partnership between AFROHUN, SEAOHUN, and globally recognized One Health leaders from institutions across North America, led by the University of California, Davis One Health Institute.
