

Climate Investment Platform

Category: Transaction Assistance

Sub-Category: Technical Assistance

Users: Client Governments, Financiers, Project Developers

Donor: International Renewable Energy Agency (IRENA)

Donor Countries: Multi-donor

Description:

The Climate Investment Platform is an inclusive partnership welcoming all stakeholders, from governments and international organizations to the private sector, to scale up climate action and translate ambitious national climate targets into concrete investments on the ground. Working collectively and together with all interested partners, the CIP aims to mobilize investments at the necessary scale to achieve meaningful progress towards climate objectives. The CIP will initially focus on energy transition, with the ultimate goal of accelerating investments in renewable energy and enabling the realization of the ambitious Nationally Determined Contributions (NDCs).

Project proponents are invited to submit a request under the relevant cluster to obtain support from IRENA and other CIP partners for project development and/or access to finance for renewable energy projects.

Location: Sub Saharan Africa

On- or Off-Grid: Both

Geography:

Sub Saharan Africa

Eligibility:

Open-source tool
