FY 2017, 3rd Quarter Business Forecast Questions and Responses

**Background**
USAID’s Business Forecast now provides “live” information throughout the fiscal year. The Agency’s Business Forecast is an informational resource on potential funding and partnership opportunities at USAID. It is an advanced look at grants, contracts, and cooperative agreements that USAID is in the process of developing and plans to issue in the coming year. Organizations interested in working with USAID can use this tool to plan for proposal or application submissions.

**General Business Forecast Questions**

1. **Cancelled Opportunities**: For how long do opportunities whose status is changed to “Cancelled” remain in the Business Forecast database, so that they can be identified by filtering using the “Forecast Status Change” field?
   **USAID Response:** We have advised AOs/COs that if they cancel an opportunity, it should remain on the Forecast for one quarter for the partners to reference. Please note that we continue to message this out to all of our staff.

2. **Forecast Download Sheet**: When downloading the Washington and Mission Forecast in XLS format, would it be possible to have this updated file format in alphabetical order by country/region?
   **USAID Response:** The format of the downloadable excel version of the Forecast has been updated. You can now download the entire list of opportunities available, as well as your individual search options. All spreadsheets are broken down into Washington and Overseas opportunities, and then further alphabetized by Operating Unit or Country/Mission.

3. **Small Business Set Aside Filter**: Although the downloadable Excel version of the forecast includes a column titled “Small Business Set Aside”, the live internet version of the forecast is not searchable by this field. Is this a feature that will be added to the live feed?
   **USAID Response:** Yes, we noted that this important feature was missing from the live feed when it was launched. We are happy to share that as of this weekend, you can now search by small business set asides. You can now filter by Small Business Set Aside, with options including:
   - N/A
   - Total set-aside
   - Partial set-aside
   - Small Disadvantaged Business set-aside
   - 8(a) set-aside
   - Veteran-owned set-aside
   - Service-disabled Veteran set-aside
   - Woman-owned set-aside
   - HUBZone set-aside
   - Small Business Reserve, and
   - TBD

4. **Updating the Forecast**: The live feed is a new and useful format for the Forecast, however many opportunities have release dates that have lapsed or lingered without updates. When release
dates have lapsed, should organizations assume that the procurement has been delayed or interrupted? If that is the case, can USAID include such information in the Forecast?

**USAID Response:** It is important to note that solicitation date is an “anticipated” date. When the date has passed it can be indicative of a number of items -- that the opportunity is currently open and has not closed, or that it may be delayed, or that an Activity that would be implemented through an A&A award is anticipated, but is still in design/planning. If you have questions about a specific opportunity on a date that has passed, we recommend reaching out to the A&A Point of Contact listed in the solicitation or the Business Forecast. We also have enhanced our website to include the email directory for the POC. You can also e-mail BusinessForecast@usaid.gov with questions.

5. **Cooperative Agreement POCs:** Is there a website or online resource that the general public can access to find out which organization has been awarded a specific cooperative agreement? USAID will often post Award Notices for contracts in FedBizOpps.com but Award Notices are not posted for cooperative agreements on Grants.gov. Is there a way to find out this information without having to email the POC each time?

**USAID Response:** The public can search www.USASpending.gov to view both acquisition and assistance awards. The Advanced Search feature allows you to search by Recipient Name, DUNS Number, or other keywords. See https://www.usaspending.gov/Pages/AdvancedSearch.aspx

6. **Task Orders on Forecast:** Can USAID clarify whether Task Orders will be appearing on the live forecast? We had understood from previous quarter Questions and Answers that they would, but some missions have indicated that they are not required to post Task Orders on the live forecast.

**USAID Response:** Yes, Task Orders are included on the Business Forecast. They have been included for the last year and half.

If a Mission is telling you that task orders should not be included, can you please flag this to our BusinessForecast@usaid.gov email address?

7. **Information Missing from Forecast:** This past quarter we noticed that a number of opportunities disappeared from the Forecast en masse, only to appear a few days later. Can you share what happened?

**USAID Response:** In mid-April while making backend updates and testing new features of the Business Forecast, we noticed an issue where approximately 100 activities dropped off of the Live Feed. We addressed the issue as soon as it was noticed. This should not happen again.

8. **Extensions on Forecast:** If a solicitation is in the final stages of the procurement cycle, competitive range determination, will any extensions or changes show up in the live feed or FedBizOpps?

**USAID Response:** For the Live Feed, once a solicitation closes there are no further updates to the Business Forecast.

Similarly on FBO.gov, once the solicitation closes, the CO generally does not post a public notice again until an award notice at the end of the process; however, there could be an instance where a CO may post an update to FedBizOpps. Any communications after proposal receipt through award (e.g., comp. range, discussions) are typically held with the offerors directly without any public notices.
Washington Business Forecast Questions

1. **Africa:** Nine African countries are likely to hold parliamentary elections in the upcoming 12-18 months, including Djibouti, Equatorial Guinea, Guinea, Guinea Bissau, Mauritania, Rwanda, Sao Tome, Swaziland and Togo. 6. **DCHA: Empowerment and Inclusion Support Mechanism (EISM)**
   a. Does USAID plan to manage EISM Empowerment and Inclusion Support Mechanism as an LWA grant type or as a standalone Cooperative Agreement?

**USAID Response:** This is a new opportunity.

7. **E3: Advancing Basic Education -- All Children Reading (ABE-ACR) IDIQ**

**USAID Response:** The period of performance for this IDIQ is five years from the date of award (July 2014). Although Task Orders may be issued at any time during this ordering period, the period of performance for a Task Order may not go beyond two (2) years after the end of the ordering period of the IDIQ.

8. **E3: Learning, Evaluation, and Analysis Project III (LEAP III)**
   a. Does participating in LEAP III preclude the winner from priming or subbing on any other work either at 3E, missions, or programs in countries?

**USAID Response:** USAID plans to set aside three awards for small businesses; however, USAID reserves the right to award more or fewer than three.

c. Please indicate whether there will be any RFTOPs included in the IDIQ solicitation.

**USAID Response:** No, there will not be a real RFTOP included in the PFM II IDIQ solicitation. However, an illustrative RFTOP will be included for evaluation purposes only.

a. The LPFM III task order release date, was updated to 1/15/2018. The New PFM II IDIQ anticipated release date is 5/15/2017, with an anticipated award date of 12/22/2017. Initially New LPFM III was expected to be solicited as a Task order issued simultaneously with PFM II IDIQ. Would you explain the change?

b. Is New LPFM III Task order expected to be small business set aside?

**USAID Response:** LPFM III will not be a small business set aside.

c. USAID has previously included the LPFM activities under PFM, with an existing IDIQ holder implementing both LPFM and other task orders. However, an update to the forecast now separates LPFM out from the PFM II procurement. Does the separation of the LPFM activity from the proposed PFM II procurement have any implications for conflict of interest for the entities also competing for PFM II? f. As discussed in the FY17 2nd Quarter Business Forecast Q&A, has the RFI helped to clarify whether or not the project development activities would be restricted to a small-business set aside? If so, what was the determination?

**USAID Response:** The responses to the RFI helped us clarify aspects of the SOW and our determination to set aside for small business. As discussed above, we have determined that a portion of this would be set aside for small business, however we have not determined how many of the IDIQ contracts, nor if there will be a Task Order dollar threshold implemented for small business holders (i.e. Task Orders under a certain dollar threshold would be competed amongst only the small business IDIQ holders).
