Finally--and this is minor--but can you also un-bold Namibia on the fact sheet map so that it blends in with the rest of countries with no active FY 2020 programs?

We've heard back from PRM on how to break down their assistance by country. Can you please include the following country information on the program map under a separate State/PRM category?

- Angola - CCCM, ERMS, Education, Health, Humanitarian Coordination, Logistics, Protection, Shelter and Settlements, WASH
- Malawi - CCCM, ERMS, Education, Health, Logistics, Nutrition, Humanitarian Coordination, Protection, Shelter and Settlements, WASH
- Mozambique - CCCM, ERMS, Education, Health, Humanitarian Coordination, Logistics, Protection, Shelter and Settlements, WASH
- South Africa - Protection, ERMS, Humanitarian Coordination, Health, MPCA
- Zambia - Protection, ERMS, Humanitarian Coordination, MPCA, Education, Health, Shelter and Settlements, WASH
- Zimbabwe - CCCM, ERMS, Education, Health, Humanitarian Coordination, Logistics, Protection, Shelter and Settlements, WASH

Finally, just a few tweaks to the program map outside of the PRM sectors: can you please change the title of the map to “Active USG Programs for the Southern Africa Response” to be inclusive of PRM’s non-USAID programs? Also, it looks like Namibia is labeled as “Botswana,” so can you please fix that as well?

I'm also seeing “Livelihoods and Economic Recovery” in the legend, but it looks like that should now be represented as “Economic Recovery and Market Systems (ERMS)”

Sorry about all of these last minute changes, but I appreciate your help as always! Let me know if you have any questions about any of these changes.

Just a couple more changes requested from the team.

Can you justify the title/subtitle text left so that it’s closer to the USAID and PRM icons?

Also, can we make the country font color gray and the font size smaller?

We want the font type, size, and color to match those of the Yemen template map.

Where is the feedback coming from, as we may need to create a regionwide factsheet map template.

As far as a regional map, I don’t think they can adapt.
