

# ACHIEVING EFFECTIVE UPTAKE

## 1. LEVERAGE THE RIGHT MODEL

Use a Lab-Wide Priority model for internal, innovative uptake efforts, and a model similar to the DFS team for longer-term initiatives with both internal and external uptake objectives.

## 2. EQUIP A DEDICATED TEAM

Build teams that have relevant technical expertise, knowledge of USAID operations and dynamics, as well as sufficient resources to scale.

## 3. USE MISSION ENGAGEMENT BEST PRACTICE

Secure USAID staff technical expertise, leverage relationships, utilize assessments to identify opportunities, and align with Mission priorities.

## 4. BUILD A DIVERSE NETWORK

Be intentional about building and maintaining relationships with operational and programmatic Mission staff, implementing partners, and other actors.

## 5. EXIT STRATEGICALLY

Plan for exit of short-term teams or Mission engagements. Set targets and monitor outcomes to know when the work will be sustained if USAID/HQ support is no longer available.
