

USAID
FROM THE AMERICAN PEOPLE

TIMOR-LESTE COUNTRY PROFILE

Located between Indonesia and Australia, Timor-Leste is one of the world's newest countries. Having gained independence in 2002 after decades of conflict, the country is now working to build its new democracy with still-nascent institutions, limited human capital, and significant economic and health challenges. The United States is committed to helping Timor-Leste realize its development goals and emerge as a strong, regional partner.

USAID supports Timor-Leste in its efforts to build a more prosperous, healthy and democratic nation.

OUR WORK

USAID works closely with the government and people of Timor-Leste to foster inclusive and sustainable economic growth, especially in the agriculture sector; encourage private-sector competitiveness; tackle serious health challenges, particularly those affecting women and children; strengthen sub-national democratic institutions and the foundations of good governance; protect the environment; and help at-risk populations adapt to climate change.

ECONOMIC GROWTH AND TRADE

Since over 70 percent of the population relies on agriculture for their livelihoods and half of the people live in extreme poverty. USAID focuses on increasing farm income and improving nutrition for farm households throughout the country. Our partnerships support activities aimed at improving incomes by increasing farm productivity and establishing links to new markets. Through sustainable production practices, bringing farmers together into farmer groups, improved market linkages, better access to quality agriculture inputs and access to finance, USAID stimulates economic growth in this key sector.

GLOBAL HEALTH

Timor-Leste has the highest maternal and under-5 mortality rates in Southeast Asia. Building on our previous health work, USAID is working to improve the clinical skills of Ministry of Health staff to deliver high quality and high-impact basic health care services in reproductive, maternal and newborn health. This includes increasing provider adherence with protocols and standards, and enhancing service delivery to provide family planning counseling and increase both the percentage of women receiving antenatal care visits and the number of deliveries at health facilities.

DEMOCRACY, HUMAN RIGHTS AND GOVERNANCE

Timor-Leste has faced daunting challenges to establishing a viable state and a representative democracy. The country still lacks the fundamental governance systems essential to adequately respond to persistently high rates of poverty, unemployment, growing socioeconomic inequality and unresolved conflict. It also faces challenges upholding human rights, reducing impunity and increasing access to basic public services. USAID partners with the Government of Timor-Leste to strengthen democratic institutions further consolidate good governance practices and work with the judiciary and legal service providers to facilitate increased access to justice for rural populations.
