User Information

Locating the Electronic Copy of the User Guide

This guide and the most recent updates to its information can be found on the USAID website at the Global Health homepage: http://www.usaid.gov/what-we-do/global-health

Who to Contact for Additional Information on the User Guide:

Please contact Brian Saunders (bsaunders@usaid.gov) in the Bureau for Global Health for additional information on the User Guide.

Accessing the Services in the Global Health Programs

This User Guide includes the preferred method for USAID operating units to access the awards described in the Project Directory.

Most projects that show "Field Support" as the preferred method of access may also be accessed using Operating Year Budget (OYB) transfers. This alternate method generally is available to provide additional, flexible ways that accommodate unique or unusual Mission circumstances. For further information about these alternatives, kindly contact the respective project COR/AORs.

Two types of awards that are especially designed for field mission use are Indefinite Quantity Contracts, Indefinite Quantity (IQIQ) and Leader with Associates Cooperative Agreements (LWA). Both methods are designed to provide quick and simple access to technical services in health by providing an "umbrella" of pre-selected sets of contractors or recipients of cooperating agreements. Under both mechanisms, missions initiate and manage the awards. Missions should contact the project COR/AORs for assistance in initiating task orders under IQCs or for negotiating associate awards under LWAs. For general information on IDIQs and LWAs, please visit the Global Health intranet section for field missions.

Introduction to the Bureau for Global Health

Bureau for Global Health Office and Functions

The Bureau for Global Health (GH) staff manages an array of technical projects, providing technical support to USAID missions and field programs, garnering support for our programs with stakeholders, and nurturing and galvanizing stronger partnerships with the development community. This global leadership is influencing the worldwide health agenda, increasing the likelihood of successful health programs, encouraging the wider global community to adopt new technologies and approaches, and to pursuing USAID priorities and goals.

Center for Accelerating Innovation and Impact

*Director: David Milestone*

The Center for Accelerating Innovation and Impact (CII) promotes and reinforces the application of innovative, business-minded approaches to address key bottlenecks in the development, introduction, and scale-up of global health technologies and interventions; thereby accelerating impact against some of the world’s most important health challenges. CII engages luminaries across sectors to identify best practices and push the boundaries of current thinking; catalyzes transformational innovation and partnerships; and applies cutting-edge market tools and practices to support the rapid introduction of, access to, and uptake of priority health innovations.

Office of Country Support

*Director: Elise Jensen*

The Office of Country Support (OCS) is GH’s front line to provide broad, strategic assistance and support to missions. With changing initiatives and priorities, OCS facilitates communication between missions and headquarters to manage Agency and field challenges. As a critical nexus, OCS interfaces with missions, GH technical offices, regional bureaus, and other pillar bureaus to ensure coordinated strategic and programmatic assistance to countries. OCS leads the Global Health Country Team System, drawing on GH staff expertise across offices, fostering country support from a “whole of health” program perspective.

Office of Health Systems

*Director: Kelly Saldana*

Strengthening health systems is critical to enabling countries to effectively address complex health challenges in an evidence-based and sustainable way, in order to improve health outcomes and protect against extreme poverty. In September 2012, USAID’s Global Health Bureau established the Office of Health Systems (OHS) as USAID’s center of excellence and focal point to provide worldwide leadership and technical expertise in health systems strengthening (HSS). OHS has since led the development of USAID’s Vision for HSS, which presents an integrated, comprehensive and holistic approach to partner with countries to improve their health systems. OHS retains a multidisciplinary team of experts across all areas of HSS, including financing, governance, human resources for health, quality improvement, service delivery, pharmaceutical systems and information management. This team guides USAID’s health systems strengthening work and supports USAID’s field programs through technical assistance to missions and through five global HSS projects. The Office of Health Systems increases the visibility and consistency of USAID’s long-standing work to assist low and middle income countries to strengthen their health systems and make them more resilient, in order to end preventable child and maternal deaths, achieve an AIDS-free generation and protect communities from infectious diseases, by advancing universal health coverage and supporting the global health security agenda.
Introduction to the Bureau for Global Health

Office of HIV/AIDS
Director: Doug Arbuckle
Deputy Director: Michele Russell
Deputy Director: Lin Liu

The Office of HIV/AIDS (GH/OHA) has overarching responsibility for the full range of USAID’s HIV/AIDS programs and serves as the Agency’s lead office for implementing the interagency President’s Emergency Plan for AIDS Relief (PEPFAR). GH/OHA’s primary functions are to provide strategic direction, technical leadership, and support to field programs, and to effectively manage headquarters programs devoted to ending the global HIV/AIDS epidemic. As a lead partner in the PEPFAR interagency process, GH/OHA makes decisions concerning the strategic allocation of financial and human resources in the sector and provides leadership in designing, implementing, monitoring, and evaluating HIV/AIDS programs.

Budget & Operations Division
Budget and Operations Division (GH/OHA/BOD) is responsible for coordination and oversight of all administrative, financial, budget and program operations activities across OHA.

Prevention, Care & Treatment Division
Prevention, Care and Treatment Division (GH/OHA/PCT) provides a combination of HIV/AIDS medical, technical and programmatic expertise to support PEPFAR goals and to improve health outcomes.

Priority Populations, Integration & Rights Division
Priority Populations, Integration and Rights Division (GH/OHA/PIR) provides technical leadership and support to missions in effectively planning, implementing and monitoring cross-cutting approaches to the HIV/AIDS response. The PIR Division has a specific emphasis on priority and key populations, including orphans and vulnerable children (OVC), youth, integrated services (family planning/HIV, nutrition/HIV), gender, and human rights.

Research Division
Research Division (GH/OHA/RES) provides technical leadership HIV/AIDS research.

Strategic Coordination & Communication Division
Strategic Coordination and Communication Division (GH/OHA/SCC) serves as the primary liaison between OHA and key global HIV/AIDS implementers and stakeholders.

Strategic Information, Evaluation & Informatics Division
Strategic Information, Evaluation and Informatics Division (GH/OHA/SIEI) provides strategic direction, technical leadership, and support to OHA and USAID missions in managing and utilizing data systems. The Division focuses on building capacity in program monitoring, surveillance, and evaluation to increase the impact of programs on the HIV epidemic and to demonstrate accountability for PEPFAR funded programs at headquarters and in the field.

Supply Chain for Health Division
Supply Chain for Health Division (GH/OHA/SCH) leads OHA’s commodities program in support of PEPFAR.

Systems & Program Sustainability Division
Systems and Program Sustainability Division (GH/OHA/SPS) provides technical leadership and strategic direction on issues related to systems strengthening and financing of HIV/AIDS programs.
Office of Infectious Disease

Director: Elizabeth Fox
Deputy Director: Megan Fotheringham

The Office of Infectious Disease (GH/ID) is the Agency’s lead for infectious disease programs and issues, and manages the Global Health Bureau’s activities and engagement in infectious diseases, including tuberculosis (TB), Neglected Tropical Diseases (NTD)s, malaria under the President’s Malaria Initiative (PMI), and Emerging Threat/Pandemic Preparedness and Response. GH/ID is responsible for technical direction and leadership and external engagement on infectious disease issues, including working with external partners, providing technical support to USAID’s field missions and programs, and managing programs and centrally-managed infectious disease funding.

Emerging Threats Division

The Emerging Threats Division (GH/ID/ETD) provides the technical leadership, program implementation and financial management for the Agency’s centrally funded pandemic threats program, and provides support for response to other infectious disease emerging threats. The goal of the program is to minimize the global impact of existing pandemic threats and pre-empt the emergence and spread of future pandemic and major infectious disease threats. GH/ID/ETD draws on expertise from across the animal and human health sectors to build regional, national, and local “One Health” capacities for the promotion of measures and practices for prevention of disease emergence, and for early detection and rapid deployment of effective countermeasures should a new disease threat emerge. Early disease detection, laboratory-based disease diagnosis, rapid response and containment, and risk reduction.

Malaria Division

The Malaria Division (GH/ID/MAL) has primary responsibility for establishing the strategic priorities for the President’s Malaria Initiative (PMI) and for leading the planning, implementation, oversight and results reporting for the Initiative. The Malaria Division is responsible for supporting the US Global Malaria Coordinator on the global stage and with Principle Actors across USG Agencies involved in international malaria control and elimination efforts. The Malaria Division provides technical guidance and implementation support to PMI priority programs across Africa, Southeast Asia and Latin America. The Malaria Division is responsible for technical oversight of PMI country programs including oversight of country malaria program financial and implementation management. The Malaria Division also has responsibility for managing malaria cooperative agreements and contracts including malaria commodities procurement, vector control, and malaria case management activities and USG support to global programs and partnerships. In addition the Division is responsible for managing operational research studies and new malaria drug, insecticide, and vaccine research investments.

Neglected Tropical Diseases Division

The Neglected Tropical Diseases Division (GH/ID/NTD) provides the technical leadership, program implementation and financial management for the Agency’s centrally funded Neglected Tropical Diseases (NTDs) Program. GH/ID/NTD provides the direction concerning the strategic allocation of financial and human resources in the sector and in designing, implementing, monitoring, and evaluating programs. The primary focus of NTD funding is on activities that control and/or eliminate the burden of NTDs that can be addressed with effective and wide-scale strategies such as mass drug administration with preventive chemotherapy and other proven interventions. GH/ID/NTD prioritizes the following seven neglected tropical diseases: lymphatic filariasis, schistosomiasis, trachoma, onchocerciasis, and three soil-transmitted helminthes (hookworm, roundworm, and whipworm).
Tuberculosis Division

The Tuberculosis Division (GH/ID/TB) provides technical leadership, project management, country support, and supports agency requirements to lead the U.S. Government’s international TB program. GH/ID/TB strategically directs the financial and human resources to achieve the USG global TB strategy as well as the USAID implementation plan goals and objectives. GH/ID/TB provides support through prevention and care programs in countries implementing USAID supported TB activities, focusing on accelerating detection and treatment of TB, expanding prevention and treatment of multi-drug resistant TB programs, scaling-up of TB-HIV integration, and developing TB service delivery platforms. GH/ID/TB manages USAID’s TB research programs to identify new and improved drug regimens, other technologies to prevent and treat TB, and improved approaches to implementing TB programs. GH/ID/TB represents USAID and the U.S. Government in international fora as well as leads international TB for the USG interagency.
Introduction to the Bureau for Global Health

Office of Maternal/Child Health and Nutrition

Director: Barbara Hughes
Deputy Director: John Borrazzo

The Office of Maternal and Child Health and Nutrition (GH/MCHN) serves as the Agency’s technical and policy lead on maternal and newborn health; child survival; immunization; and nutrition, with a focus on ending preventable child and maternal deaths. Cross-cutting activities managed by the Office in support of this goal address private sector partnerships, community health systems, social and behavior change communication, multilateral partnerships, gender, and monitoring and evaluation. The MCN office contributes to the achievement of the Agency’s Feed the Future goals as well as those laid out in the Agency’s Multi-sectoral Nutrition Strategy and Water and Development Strategy.

Child Health and Immunization Division

The Child Health and Immunization Division (GH/MCHN/CHI) provides technical and policy leadership addressing the leading killers of children in the post-neonatal period. This includes treatment of pneumonia and diarrhea, vaccine-preventable diseases, as well as emerging issues brought about by the shifting disease burden. The Division also manages the Agency’s significant investments in Gavi, The Vaccine Alliance as well as our contributions to the Global Polio Eradication Initiative.

Maternal and Newborn Health Division

The Maternal and Newborn Health Division (GH/MCHN/MNH) provides technical and policy leadership, and support to the field, in state-of-the-art approaches to accelerating reductions in maternal and newborn mortality, focusing on the USAID-assisted countries with the highest burdens of mortality and using evidence-based approaches to scale-up proven interventions to address the leading causes of mortality. The Division manages diverse activities, to achieve this goal, including cross-cutting as well as focused technical assistance and multi-stakeholder partnerships with private sector, non-governmental organizations, and professional associations.

Nutrition and Environmental Health Division

The Nutrition and Environmental Health Division (GH/MCHN/NEH) provides technical leadership and direction in nutrition, micronutrients, food security, and a range of environmental health issues. The Division focuses on maternal, infant and young child nutrition, micronutrient supplementation, food fortification, and developing innovative products to improve diet quality for sustainable nutrition and food security programming. The Division also focuses on safe water, sanitation, and hygiene, as well as improvements in poor indoor air quality, with a strong emphasis on behavior and household-level interventions.

Research and Policy Division

The Research and Policy Division (GH/MCHN/RP) is responsible for technical leadership, guidance, and coordination to advance the integrated use of policy, data, research and development to accelerate the uptake, scale-up, and sustained effective use of maternal, newborn, child, nutrition and food security and environmental health programming. The division brings together a multidisciplinary team of implementation research, community systems development, policy understanding, social and behavior change and monitoring and evaluation experts who manage a portfolio of activities as well as work in conjunction with various stakeholders to use analytical and policy tools to reduce mortality, severe morbidity, and advance sustained development.
Introduction to the Bureau for Global Health

Office of Policy, Programs, & Planning

Director: Ben Gustafson

The Office of Policy, Programs, and Planning (OPPP) has primary responsibility for GH’s strategic planning, budgeting, programming, and procurement functions. OPPP provides leadership, advice, and support for overall strategic direction, resource allocation, and procurement planning. It supports efforts to monitor and promote the effectiveness of programs and the achievement of GH objectives and is integrally involved in performance monitoring and program evaluation. Additionally, OPPP houses the team that takes the lead in GH donor coordination activities.

Division of Strategy, Analysis, Outreach, & Evaluation

Strategy, Analysis, Evaluation, and Outreach Division (GH/OPPP/SAEO) undertakes strategic planning, which includes overall sector and program planning, policy, monitoring and evaluation, and services to coordinate such activities within GH and with other units within the Agency. SAEO serves as the primary GH resource for USAID evaluation policies and practices; oversees implementation of the GH evaluation plan, and analyzes and disseminates evaluation findings, conclusions, recommendations, and best practices as appropriate. SAEO leads GH in liaising with, coordination of, and communication with bilateral donors, other U.S. Government agencies and foundations, and provides Bureau-wide communications and knowledge management services.

Program Implementation & Budget Management Division

Program Implementation and Budget Management Division (GH/OPPP/PIBM) is responsible for providing programmatic support to GH technical office staff, from activity design through implementation. It also takes the lead in procurement planning, monitoring, and tracking of all procurement actions. PIBM staff prepares and monitors GH’s budgets, which includes the management of GH program and operating expenses, operating year budget, and the monitoring of GH’s pipeline.
Office of Population & Reproductive Health

Director: Ellen Starbird
Deputy Director: Shyami De Silva
Deputy Director: Kendra Phillips

The Office of Population and Reproductive Health (PRH) provides strategic direction, technical leadership and support to field programs in population, voluntary family planning, and reproductive health. It manages programs that advance and apply state-of-the-art technologies, expand access to quality services, promote healthy behaviors, broaden contraceptive availability and choices, strengthen policies and systems to address family planning and reproductive health needs, and improve data collection and use.

Commodities Security & Logistics Division
Commodities Security and Logistics Division (GH/PRH/CSL) promotes the long-term availability of a range of high-quality contraceptives, condoms and other essential reproductive health supplies, and strengthens global and country systems from manufacturer to service sites.

Policy, Evaluation, & Communication Division
Policy, Evaluation, and Communication Division (GH/PRH/PEC) creates the enabling environment for sexual and reproductive health. PEC works with partners within USAID and externally to:

- Promote effective sexual and reproductive health advocacy, policy, financing, and governance;
- Collect, analyze, and evaluate data for evidence-based decision making; and
- Develop and implement communication efforts to influence attitudes, norms, and behaviors of beneficiaries and providers.

Research, Technology, & Utilization Division
Research, Technology, and Utilization Division (GH/PRH/RTU) provides technical leadership in building scientific and empirical knowledge, and ensures its use in the design and implementation of effective, efficient, high-quality family planning and reproductive health programs.

Service Delivery Improvement Division
Service Delivery Improvement Division (GH/PRH/SDI) improves access to and quality of reproductive health and family planning services and information in USAID supported countries. SDI provides leadership in developing and applying innovative strategies and best practices that improve the performance of individuals, organizations, and systems for the sustainable delivery of quality family planning at scale.
Introduction to the Bureau for Global Health

Office of Professional Development & Management Support

Director: Sharon Carney
Deputy Director: Deborah Melton

The Office of Professional Development and Management Support (PDMS) is responsible for three functional areas in the Bureau for Global Health: professional and organizational development, personnel, and administrative support.

Administrative Support Team

Administrative Support Team (GH/PDMS) manages the GH Operating Expense budget, in collaboration with GH/OPPP/Controller, and associated procurement activities. It also provides all logistic and systems support to Bureau staff, including space planning and assignments; network, remote, and telephone access; equipment and supplies; interface with the Office of Security (SEC) for security clearances and badges; and maintenance of Vital Records, Emergency Contact Information, Continuity of Operations Planning (COOP) and Emergency Procedures.

Personnel Team

Personnel Team (GH/PDMS) maintains the Bureau manage-to-budget records; assists Bureau managers in developing workforce analyses and plans, position descriptions, and statements of work (SOWs); coordinates the annual evaluation processes and Awards programs for the Bureau; processes recruitment requests and selection approvals through SDAA/GH; coordinates with the Office of Human Capital and Talent Management (HCTM), with the Office of Acquisition and Assistance (OAA), and directly with Institutional Contractors of GH/PDMS to provide for both direct and non-direct hire staff for the GH Bureau, other Washington bureaus and offices, and overseas missions.

Professional Development Team

Professional Development Team (GH/PDMS) manages professional and organizational development activities and training, which include the PHuNdamentals Course, eLearning, and State of the Art (SOTA) workshops for Washington and overseas Agency staff, and manages the Global Health Professional and Organizational Development Program (GH-POD).

Office of the Assistant Administrator

Acting Administrator: Jennifer Adams
Sr. Deputy Director: Irene Koek

Office of the Assistant Administrator (AA/GH) Acting Assistant Administrator: Jennifer Adams Acting Senior Deputy Assistant Administrator: Irene Koek Acting Deputy Assistant Administrator: David Stanton Acting U.S. Global Malaria Coordinator: Irene Koek The Office of the Assistant Administrator provides oversight to GH and leadership for the Global Health Initiative (GHI), creating support for GHI, and helping to mainstream GHI principles into all GH activities and programs. The Office has ultimate responsibility for the quality of GH’s programs and the capacity of its workforce. It provides leadership on the design, implementation, review, coordination, and evaluation of GH initiatives, programs, and activities. The Office, through the Center for Accelerating Innovation and Impact (CII), is the focal point for accelerating the introduction and scale up of innovative GH interventions. In addition, the Office promotes coordination between U.S. government agencies and departments providing assistance to vulnerable children in low- and middle-income countries.
This section of the User Guide includes descriptions of three kinds of activities:

1. Contracts and cooperative agreements that have an explicit mandate to address technical needs that cut across Global Health and mission health Strategic Objectives, such as data collection, monitoring and evaluation, and communication for behavior change.

2. Mechanisms to access non-direct hire technical and administrative personnel.

3. Mechanisms that provide systems support, such as database management, indicator tracking, and report preparation.

Some of these activities are managed by inter-office teams from the Bureau for Global Health’s three technical offices. Others are managed within the Office of Professional Development and Management Support and the Office of Policy, Programs, and Planning on behalf of the Bureau for Global Health as a whole.
Bureau-wide

Bureau for Global Health
Purpose
This contract will serve as a primary vehicle through which USAID can house program data, perform analysis and understand data trends in support of global health programs.

Services Provided:
To accomplish this overall contract goal, IntelliCog will:

• Provide a software as a service data collection and analysis solution;
• establish a web-based data warehouse;
• create analysis, graphics, and dashboards around data sets;
• integrate data sets to allow for cross-data comparisons;
• promote data governance policies and processes;
• provide data analyst support to help data owners understand and create meaningful data analysis; and
• collaborate with global partners (e.g. Global Fund, UNFPA, etc.) and other contractors within the Global Health Supply Chain Program to allow data exchange and analysis.

Special Notes:
The BI&A contract is one of six mechanisms under the Global Health Supply Chain Program. Core funding will support the initial data collection, data analysis, software as a service (SaaS) solution, SOP generation and governance, quality control testing, global collaboration, and other activities within this contract. Field support will fund additional data set collection, data integration, data analysis, and analytics creation activities under this contract.

Means of Access
Field Support, Core Funding
Procurement and Supply Management Project (PSM)

Purpose:
The purpose of the Global Health Supply Chain - Procurement and Supply Management single award IDIQ contract is to ensure uninterrupted supplies of health commodities to prevent suffering, save lives, and strengthen supply chain systems in low and middle income countries. The IDIQ has three task orders that directly support the Presidents Emergency Plan for AIDS Relief (PEPFAR), the President’s Malaria Initiative (PMI), and Population and Reproductive Health.

Services Provided:
As a holder of the GHSC-PSM IDIQ, the Chemonics consortium will help improve the availability of health commodities and provide supply chain technical assistance by meeting the following objectives: Objective:

1. Global Commodity Procurement and Logistics This includes:
   • Health commodity procurement.
   • Logistics.
   • Health commodity quality assurance.
   • Data Visibility.
2. Systems Strengthening Technical Assistance This includes:
   • Strategic planning.
   • In-country logistics.
   • Capacity building.
   • Enabling environments.
3. Global Collaboration to Improve Long-Term Availability of Health Commodities This includes:
   • Global Strategic engagement.
   • Global market dynamics.
   • Advocacy.
   • Global coordination.

MEASURE Evaluation Phase IV

Purpose
MEASURE Evaluation Phase IV is a five-year Leader with Associates Cooperative Agreement with a ceiling of $180 million. The project builds on the Bureau of Global Health's decades-long effort to improve health sector monitoring and evaluation (M&E) and strengthen country health information systems (HIS). The objective of MEASURE Evaluation Phase IV is to enable countries to strengthen their national, community, and facility-based systems to generate high-quality information that is used for decision making at all levels of the health system. To achieve this objective, the project concentrates on four results:

1. Strengthened collection, analysis, and use of routine health data;
2. Improved country-level capacity to manage health information systems, resources, and staff;
3. Methods, tools, and approaches improved and applied to address health information challenges and gaps; and
4. Increased capacity for rigorous evaluation.

Services Provided:
MEASURE Evaluation Phase IV is a GH Bureau-wide project in that it provides assistance to all health elements and includes a portfolio of integrated, system-wide strengthening approaches. This phase of the project emphasizes strengthening the collection, analysis, and use of routine health information, and overarching country HIS sustainability. Related areas of technical assistance (TA) include system design and interoperability, and data quality, security, management, analysis, visualization, and use. Another area of emphasis for the project is increasing local capacity for implementation of rigorous evaluation (including impact evaluation). Related areas of TA include quantitative/qualitative study design, protocol development, gender and ethical considerations, use of geographic information, and mentorship and training. MEASURE Evaluation Phase IV is not intended for the implementation of performance evaluations.

Technical Assistance Support Contract 4, Information and Communication Technology for Health (TASC4 ICT)

Purpose:
TASC4 ICT provides USAID missions and bureaus with an opportunity to acquire highly customized sets of skills to support the planning, development, and application of relevant and sustainable technology for strengthening information systems within the health sector. It may also provide missions and bureaus with technical assistance in delivering effective solutions for health communication and social mobilization, including behavior change communication and public/media relations that support various health activities.

Services Provided:
TASC4 ICT provides service in the following areas:

- Computer Systems Design Services
- Data Management Services
- IT Infrastructure Management Services
- Health Communication Services
- Organizational Development and Change Management Support Services

Global Health Support Initiative II (GHSI-II)

**Purpose**

This is a USAID Direct Institutional Administrative Support Services Contract that provides human resource-based support services to USAID’s health programs worldwide. Persons hired under this contract will be mid-career or senior professionals in technical areas, with support staff, and will supplement USAID’s cadre of health professionals.

**Services Provided:**

Persons hired under this contract may serve in the Bureau for Global Health, Regional Bureaus in Washington, D.C., or in field missions around the world (excluding support staff), and they will complement USAID’s cadre of health professionals in technical and professional specialties. Their duties will focus on supplementing health programs with their specific skills and experience. These professionals will be expected to contribute to Agency technical leadership in the health sector. Specific goals that they are expected to embrace include:

- Improving global health, including child, maternal and reproductive health;
- Reducing disease, especially HIV/AIDS, malaria, tuberculosis, and polio; and
- Increasing access to improved drinking water and sanitation services.

Core and Field Support
Office of Professional Development & Management Support

Bureau for Global Health

Office of Professional Development & Management Sup
Director: Sharon Carney
Deputy Director: Deborah Melton
Purpose
GHFP-II, led by the Public Health Institute (PHI), helps USAID address its immediate and emerging human capital needs by developing a diverse group of global health professionals to support and sustain the effectiveness of the Agency’s current and future health programs. This cadre of global health talent is motivated, technically excellent, well-supported, representative of the diversity of the American people, and committed to contributing to USAID’s success in key global health priority areas.

Services Provided:
The GHFP-II team identifies, recruits, hires and manages the performance and professional development of fellows and interns at all levels in areas such as maternal and child health, malaria, avian influenza and other emerging threats, HIV/AIDS, TB, family planning, and reproductive health, and other public health disciplines. Fellowships are generally limited to two years with the option to extend for an additional two years.

In the U.S., placements can occur in Washington DC, USAID Bureaus, other federal agencies, and USAID partner organizations. Outside the US, placements can occur in Missions, Ministries, NGOs, and USAID partner country offices. Innovations include rotations and Foreign Service National exchanges and professional development. Non-traditional participants and placements at a variety of sites provide added value in accomplishing the strategic objectives of the Agency and participating NGOs/PVOs/CBOs. Internships include a cohort summer program based in Washington DC, international placements and internships on-demand and upon-request.

GHFP-II provides advisory services to onsite managers who oversee fellows and interns to encourage efficient and effective oversight of fellows and interns.

GHFP-II partner, Management Systems International (MSI), helps support an integrated performance-oriented approach to the fellows’ professional development, setting their experience into a larger career strategy. Services include coaching and an active alumni program.

Global Health Professional and Organizational Development II (GHPOD II)

Purpose:
The GHPOD II program is focused on improving the effectiveness of USAID's health sector by developing and increasing capacity of its health professionals through high quality professional and organizational development services worldwide. GHPOD II provides a variety of professional development (PD) and organizational development (OD) activities that focus on technical, management, leadership, and personal effectiveness. The prime contractor is EnCompass LLC, and Social Impact is the sub-contractor. GHPOD II is a one year base, plus four, 1-year options contract.

Services Provided:
GHPOD II offers a variety of PD and OD assistance available to Field and Washington based health sector staff including:

Professional Development (PD) Services:
- Management and Leadership training for improved delegation, financial & project management, and collaboration within alliances and initiatives,
- Personal effectiveness training in learning to use; Myers Briggs Type Indicator (MBTI), emotional intelligence, managing change, and presentation skills,
- Orientation sessions providing new staff overviews of the global health sector, help in setting goals and individual development plans,
- Technical conferences and workshops to support technical excellence and learning in key elements of the health sector,
- Performance management assessments and training to assist supervisors and staff in effective management of staff performance, and
- Professional leadership and management coaching to support skill acquisition for staff.

Organizational Development (OD) Services:
- Team and organizational development retreats that focus on organizational structure, workforce analysis and improved communication,
- Roles and responsibilities clarification to improve team effectiveness,
- Strategic visioning and development for a results oriented culture, and
- Customized OD activities (technical, programmatic, coaching) for a tailored approach to learning.

How to Access GHPOD II Services:
PDMS announces professional development courses through GHMeets, email notices, and through the PD Calendar available on GHNet. Registration is through the USAID University's Learning Management System (LMS). To request an "on-demand" OD or PD activity contact Winifred Kpabar (wpabar@usaid.gov) for a link to the GHPOD II On Demand Request Form.

Director: David Milestone
Engage HCD (Human-Centered Design)

Purpose
Engage HCD is a contracting vehicle available to USAID’s Bureau for Global Health and Missions to procure state-of-the-art human-centered design services. HCD is defined as a process in which the needs, wants, and limitations of end users of a product, service, or process are given extensive attention at each stage of the design process. HCD can be characterized as a multi-stage problem solving process that not only requires designers to analyze and foresee how users are likely to use a given solution, system, or service, but also to test the validity of their assumptions with regard to user behavior in real world tests with actual users. The chief difference from other design philosophies is that HCD tries to optimize the solution, system, or service around how users can, want, or need to use the product, rather than forcing the users to modify their behavior. In so doing, HCD increases the likelihood of users adopting the product or service.

The implementing partner of this work is a new division of Dalberg called the Design Impact Group (DIG). This cross-disciplinary team is made up of anthropologists, designers, human-factor engineers, and business-model designers.

CII is piloting the more intentional use of HCD in a variety of ways across USAID's Global Health work. As such, we will be selective early on in the use of this mechanism to ensure that we are leveraging this new offering in an impactful and sustainable way, while allowing us to best demonstrate and learn from its use in a variety of settings. We encourage proposals and look forward to working with both our Washington and field colleagues as we evaluate potential applications of this work.

Services Provided:
The HCD process can be applied in a variety of ways and settings. Some of the more common ways are:

Prototype products and services before piloting and scaling.
Design programs around human needs.
Develop strategies and tools for supporting innovation and design.

Please reach out to (David Milestone) for a more detailed overview of this work, previous examples, and how it could be applied.

Special Notes:
The HCD process can be applied in a variety of ways and settings. Some of the more common ways are:

Prototype products and services before piloting and scaling
Design Programs around human needs
Develop strategies and tools for supporting innovation and design

Please reach out to the Activity Manager (David Milestone) for a more detailed overview of this work, previous examples, and how it could be applied.

Project Last Mile GDA

Purpose:
USAID, the Coca-Cola Company, the Global Fund to Fight AIDS Tuberculosis and Malaria, and the Bill and Melinda Gates Foundation recently established an alliance to improve the delivery of medicines in developing country markets and, in particular, to those citizens residing in and around the last mile of the medical supply chain. The Alliance seeks to utilize the supply chain expertise and technical capabilities of Coca-Cola — a company whose supply chain is characterized as one of the widest reaching in the world. By leveraging the business intelligence of Coca-Cola in operating efficient and effective supply chain systems, the Alliance seeks to build the strategic capacities of central medical stores and/or those entities or programs responsible for medical commodity distribution. The objective of building this capacity is to increase availability and accessibility of essential medicines in Africa as the initial focus and then in developing countries worldwide.

Services Provided:
• Build the strategic capacities of central medical stores and other public health supply chain entities and programs to operate efficient and effective supply chain systems;
• Design interventions and solutions focused on reducing stock-outs and improving operational efficiencies in the delivery of priority healthcare products;
• Transfer relevant Coca-Cola institutional knowledge to entities and persons involved in developing countries’ public health supply chain and capabilities including but not limited to the areas of quantification and forecasting, planning and procurement, data collection, distribution, communication and other relevant supply chain and marketing capabilities; and,
• Set up and maintain longer term mentor and advisory relationships between relevant in-country Coca-Cola bottler/distributor personnel and personnel in the country’s public health supply chain to sustain the impact of the Alliance’s efforts.

### Purpose

Saving Lives at Birth: A Grand Challenge for Development - a partnership of USAID, the Government of Norway, the Bill and Melinda Gates Foundation, Grand Challenge Canada, the UK Department of International Development (DFID), and the Korea International Cooperation Agency (KOICA) - calls on the brightest minds across the globe to develop groundbreaking prevention and treatment approaches for pregnant mothers and newborns during the vulnerable hours surrounding birth. Since the launch of Saving Lives at Birth in 2011, five annual rounds of awards have been made to support a portfolio of 92 novel technology, service delivery, and demand-simulation solutions for use in low resource settings through 108 awards.

Awards under Saving Lives at Birth include: 1) seed awards to develop and test new ideas, 2) validation awards to introduce and validate the effectiveness of innovations to reach proof-of-concept and 3) transition awards to support successful innovations’ scale-up. Of the 108 awards, 73 are managed by USAID, and 43 of these are still active - two active from Round 1, four active from Round 2, seven active from Round 3, twenty-two active from Round 4, and eight active from Round 5.

Core Funding
Scale for Impact

Purpose:
To accelerate and magnify the impact of priority global health innovations, CII pairs the most successful private sector principles and practices within the global health context. To scale for impact, our approach includes:

- Planning for introduction and scale
- Utilization of innovative financing
- Shaping markets
- Leveraging the private sector

Successful product introduction and scale-up requires the application of multiple technical specializations across the design, development, introduction, and scale-up continuum. The objective of the Scale for Impact program is the rapid development and diffusion of innovations by ensuring timely and appropriate planning for priority global health products and technologies. This contracting vehicle provides access to product introduction & scale-up planning, facilitating, and capacity building services to support the development of global health products/technologies, service delivery models, and other approaches that can be efficiently and effectively scaled.

The contracting partner for this work is The Boston Consulting Group (BCG).

CII will be selective early on in the use of this mechanism to ensure that we are leveraging this new offering in an impactful and sustainable way, while allowing us to best demonstrate and learn from its use in a variety of settings. We encourage proposals and look forward to working with both our Washington and field colleagues as we evaluate potential applications for this work.

Services Provided:
Across four areas of Market Access focus (Planning for introduction and scale; Utilization of innovative financing; Shaping markets; Leveraging the private sector), BCG will provide support on:

1. Strategy Development, Planning, and Goal Setting:
   Lead the development of a Strategic Market Introduction Plan (i.e., end-to-end strategy for a product or solution being introduced) that captures the activities, conditions, actors, and resources necessary to successfully introduce and scale up the product or solution.

2. Coordination, Execution, and Facilitation:
   Manage the implementation of the end-to-end strategy, which includes coordinating and sharing information with key stakeholders, facilitating and organizing activities, and conducting studies, and trainings, and leading partnership development and negotiation efforts to support the successful introduction and scale up of the product or solution.

3. Capacity Building:
   Support knowledge sharing and dissemination of best practices and tools across Global Health—including Bureau staff, implementing partners, and key stakeholders.

Office of Health Systems

Bureau for Global Health

Office of Health Systems
Director: Kelly Saldana
Deputy Director: Elizabeth Drabant
Office of Health Systems (GH/OHS):

Applying Science to Strengthen and Improve Systems (ASSIST)

Purpose

ASSIST is the follow-on to the Health Care Improvement (HCI) project, which has reached its ceiling. ASSIST builds on the modern quality improvement approaches used in the US health system and over 20 years of GH efforts to adapt these approaches to the needs of USAID-assisted health systems.

ASSIST supports teams of host country providers to study the way they implement health services, and to test changes in implementation that might improve outcomes. A published 12 country study demonstrates the effectiveness of modern QI for outcomes such as compliance with evidence-based clinical guidelines, family planning acceptance rates, reduction in postpartum hemorrhage, tuberculosis treatment completion rates, and prevention of mother-to-child transmission of HIV. Both clinical and community level services were included in the study.

ASSIST also supports health system leaders to scale up improvements and to institutionalize ongoing improvement efforts as a permanent, integral part of delivering health services. ASSIST will also advance the state-of-the-art for QI in lower- and middle-income countries by integrating research, evaluation, and knowledge management activities into technical assistance.

Services Provided:

Modern QI approaches can produce rapid, quantitative improvements in a wide range of health processes. In addition to health services themselves, these approaches have also been effective for management processes such as records management and workforce management. Specific approaches include:

- Improvement collaboratives which organize up to 50 facilities to address a specific topic;
- Development of accreditation and other regulatory strategies;
- Pay-for-performance programs addressing quality;
- Quality of care and quality improvement evaluations;
- Performance improvement technologies, including more effective training and human resources management;
- mHealth (mobile health) to strengthen health systems and improve health care quality; and,
- Health systems strengthening for non-communicable diseases/injuries.

Special Notes:

Means of Access

Field Support, Core Funding
Health Finance and Governance Project (HFG)

Purpose:
The purpose of the Health Finance and Governance Project is to increase the use of priority health care services, including primary health care services, by partner countries’ populations through improved governance and financing systems in the health sector. Partner countries’ health systems are constrained from delivering intended results by inefficient use of resources, weak health governance structures, and ineffective operations. Under this project, partner countries will increase domestic resources for health care, manage those resources more effectively, and increase the efficiency of purchasing decisions. Improved governance of the health sector will occur through improved partner country capacity in stewardship, increased quality engagement of civil society and private sector, and stronger systems of strategic planning and management.

Services Provided:
HFG is USAID’s flagship project in health finance and governance. It focuses on four key areas and integrates activities across them:
• Finance: increasing financing of health from domestic sources; reducing financial barriers that inhibit access to priority health services; increasing efficiency of health sector resource allocation.
• Governance: increasing partner countries’ capacity to manage and oversee health systems at the national, provincial and district level; strengthening capacity of civil society and private sector for meaningful engagement with host country government; improving transparency and accountability of financial processes and financial management systems.
• Operations: country institutions develop administrative processes and structures that are efficient, equitable, and equipped to deliver quality services; improving public financial management systems to become more transparent and meet international standards of fiduciary soundness; increasing use of high-functioning systems to efficiently manage, deploy and incentivize the health workforce; increasing capacity to employ effective health sector strategy and planning systems including budgeting, payroll and logistics.
• Research and information: advancing the global health systems research and development agenda; increasing institutional and human capacity in health systems research; developing and using health systems performance measurement tools and indicators; developing and implementing standards for health system strengthening activity design.

Special Notes:
N/A

Means of Access:
Field Support, Core Funding
Purpose

Human Resources for Health (HRH) 2030 is USAID’s flagship project to strengthen the global health workforce. HRH2030 supports countries in developing the sufficient, fit-for-purpose and fit-to-practice health workforce needed to end preventable child and maternal deaths (EPCMD), achieve an AIDS-Free Generation (AFG), protect communities from infectious diseases (PCID), achieve the Global Health Security Agenda (GHSA), and reach the goals of Family Planning 2020 (FP2020). HRH2030’s key strategic priorities include: capturing data for evidence-based decision making and improving the logical link between investments in HRH, health outcomes, and broader development goals; flexibility and responsiveness to countries evolving HRH technical and geographic priorities; leveraging USAID’s cross-sectoral expertise in education and economic growth for HRH; and collaborating and establishing partnerships at the global, regional, and country levels to advance shared HRH goals. HRH2030 brings a state-of-the-art approach for advancing the health workforce agenda forward and driving greater impact at the country level. The project is well positioned to support priorities outlined in the WHO Global Strategy on HRH: Workforce 2030 through provision of tailored country-level technical assistance to meet context-specific priorities for local human resources and health systems.

Services Provided:

HRH2030 project interventions focus on four key areas and integrate activities across them:

- Improving performance and productivity of the health workforce;
- Increasing the number, skill mix and competency of the health workforce;
- Strengthening HRH/HSS leadership and governance capacity; and
- Increasing sustainability of investment in HRH.

HRH2030 has a cross cutting theme focused on research and evaluation with 15% of all core and field funds dedicated to implementing activities that contribute to the evidence base on HRH by demonstrating impact and advancing the discussion on causal pathways from HRH interventions to improved health outcomes. HRH2030 Consortium Partners include Amref Health Africa, Palladium, Thinkwell, University Research Co., LLC (URC), American International Health Alliance (AIHA), Royal Tropical Institute (KIT), and Open Development, LLC.

Means of Access

Field Support, Core Funding
Promoting the Quality of Medicines (PQM)

Purpose:
PQM’s mandate is to help assure the quality and safety of priority medicines by strengthening medicines quality assurance systems in developing countries to protect public health. PQM is USAID’s response to the growing challenge posed by substandard and counterfeit medicines. These medicines can cause treatment-failure and adverse effects, increase morbidity and mortality, and contribute to more rapid emergence and spread of antimicrobial resistance. In addition to representing a significant public health threat, these medicines also risk undermining past and current health investments.

Services Provided:
The PQM program (1) provides technical assistance in strengthening national medicines regulatory capacity; (2) works with international prequalification mechanisms and selected manufacturers to increase the supply of quality-assured medicines of relevance to priority USAID health programs; (3) promotes and supports evidence-based interventions to combat substandard and fake medicines in the supply chain; and (4) provides technical leadership and global advocacy regarding the importance of medicines quality assurance.

Illustrative activities include:

- Strengthen national medicines quality control laboratories, establish postmarketing surveillance systems, and address quality-assurance related aspects of procurement, medicines registration, and licensing;
- Improve compliance of selected manufacturers with good manufacturing Practices (GMPs) and support them in dossier preparation for WHO prequalification or other recognized prequalification systems;
- Build or support regional and international partnerships to exchange medicines-related information and take corrective actions to address substandard and counterfeit medicines problems;
- Collaborate with USG agencies, WHO, the World Bank, the Global Fund, the Global Drug Facility, the IOM, and others, to expand the availability of quality-assured medicines and support system strengthening efforts directed toward improving the quality of medicines at the country level;
- Test medicine samples, as needed, for USAID and USAID’s collaborating partners; and,
- Develop pharmacopeial monographs and reference standards, as well as new medicines quality assurance tools, approaches, and methodologies as needed.

Purpose
SIAPS works to strengthen essential areas of the pharmaceutical sector, including regulatory capacity, supply chain management, pharmaceutical financing and services, and pharmaceutical management information systems. Within this context, SIAPS addresses USG priority health elements including malaria, HIV/AIDS, family planning and reproductive health, tuberculosis, maternal and child health, neglected tropical diseases, and Ebola. SIAPS focuses on enhancing pharmaceutical services through patient-centered solutions while continuing to support essential supply chain functions and medical products supply security. The SIAPS goal is to support the achievement of improved and sustained health outcomes by applying a systems strengthening approach consistent with the Global Health Initiative principles. The SIAPS result areas address the five health systems components (governance, human resources, information, financing, and service delivery) as they pertain to pharmaceutical management, informing the design of potential interventions to ensure that they respond to health element and cross-cutting concerns in support of health system strengthening.

Services Provided:
• Strengthen governance in the pharmaceutical sector by ensuring that transparency and accountability are embodied across all health system components impacting on pharmaceutical systems, including medicines policies, legislation, regulations, and norms and standards, and that national pharmaceutical sector development plans are strategic and evidence based;
• Increase and enhance the capacity of individuals, institutions, and networks in pharmaceutical management, including the capacity of organizations to provide pharmaceutical services and TA in pharmaceutical management systems strengthening;
• Address the information for decision-making challenges in the pharmaceutical sector by ensuring that systems support both products and patients, that tools are broadly available and used, and that strategic information is available and used for planning purposes;
• Strengthen the capacity of existing financing strategies and mechanisms to improve access to medicines by ensuring the most efficient use of existing financial resources, supporting the generation of additional financial resources, designing alternative financing strategies, and developing effective medicines strategies under Universal Health Coverage; and
• Apply proven tools and approaches to strengthen supply chains and, pharmaceutical services to assure product availability, patient safety and therapeutic effectiveness, improved medication use, and the mitigation of the emergence and spread of antimicrobial resistance.

Purpose
The purpose of TASC4-Africa is to contribute to improvements in the health of people, especially women, children and other vulnerable populations in countries in the developing world, through expansion of basic health services, including family planning, strengthening national health systems, and addressing global issues. Depending on their scope, task order (TO) awards under TASC4-Africa will contribute to one or more of the nine global health program elements of the Investing in People program area.

Services Provided:
As it contributes to the overall outcome of EPCMD and achieving an AIDS-free generation, TASC4- Africa will:

• Engage in long-term, in country coordination and implementation of population, health, nutrition, and infectious disease activities;
• Provide short-term technical consultations and program implementation support;
• Disseminate information through seminars, workshops, conferences, and working papers;
• Increase capacity of host-country decision makers and technical personnel to design and implement population, health nutrition, and infectious disease interventions;
• Augment technical and programmatic capacity available to USAID/Washington and Missions;
• Conduct and/or oversee implementation of operations, applied research and development activities.

Office of HIV/AIDS

Bureau for Global Health

Office of HIV/AIDS
Director: Doug Arbuckle
Deputy Director: Michele Russell
Deputy Director: Lin Liu
Purpose

The major purpose of the EQUIP Consortium is to provide countries with innovative and customized solutions that increase HIV testing and linkage to care, widen the coverage of ART, expand the capacity for viral load monitoring, and improve retention of patients on ART. EQUIP seeks to quickly respond to requests from PEPFAR countries and deliver solutions tailored to the specific context and area. By focusing on the differentiation and customization of service delivery, cost-effectiveness, and technical/resource suitability of each solution, EQUIP is able to provide solutions that are both scalable and achieve substantial impact. The EQUIP Consortium is led by Right to Care in collaboration with Anova Institute, Kheth’Impilo, Partners in Hope, MatCH, the Health Economics & Epidemiology Research Office (HE2RO), and the South Africa National Health Laboratory Service.

Services Provided:

EQUIP provides technical assistance, and where requested direct service delivery, focused on the following five solution areas:

1. Alternative modes of ART delivery such as, but not limited to, community based distribution, technology assisted distribution, and other optimized drug distribution to individuals, with a focus on the cost-effectiveness of these models.

2. Innovative approaches and effective technologies for viral load monitoring including rapid cost-effective scale up methods for programs which lead to greater efficiencies in training, sample transport, result reporting, and quality assurance.

3. Use of technology and innovative programmatic strategies, such as self-testing kits, to enable more effective linkage activities from diagnosis to treatment, adherence and retention, using community and facility collaboration models for HIV and HIV/TB co-infected individuals.

4. Successful care and treatment approaches, such as HCV/HIV treatment and PrEP, that directly respond to the needs of key populations as measured by increases in the number of HIV+ individuals in key population groups that are on treatment and retained in care.

5. Promising “Test and Treat” strategies and the cost-effectiveness of models used, as they are brought to scale globally.

Strengthening High Impact Interventions for an AIDS-free Generation (AIDSFree) Project

**Purpose:**

AIDSFree aims to improve the quality and effectiveness of high-impact, evidence-based HIV and AIDS interventions such as PMTCT, VMMC, condom promotion, HTC as a gateway to care and treatment, and other emerging approaches in order to meet country-specific goals and objectives globally.

AIDSFree is a five-year cooperative agreement led by JSI Research & Training Institute, Inc., with partners Abt Associates, Inc., Elizabeth Glaser Pediatric AIDS Foundation, EnCompass LLC, IMA World Health, the International HIV/AIDS Alliance, Jhpiego Corporation, and PATH.

**Services Provided:**

AIDSFree provides capacity development and technical support to USAID missions, host-country governments, and HIV implementers at the local, regional, and national level. The project can support the following activities:

- Address structural barriers, and identify opportunities to support scale-up or piloting of new approaches in geographic priority areas;
- Develop evidence-based tools, protocols, and standard operating procedures;
- Monitor and evaluate interventions, support data collection, analysis, and utilization;
- Facilitate organizational capacity assessments;
- Utilize gender analysis to target appropriate interventions;
- Facilitate south-to-south technical exchanges; and,
- Engage the private sector to foster and develop public-private partnerships;

4Children - Coordinating Comprehensive Care for Children*

**Purpose**
The overarching purpose of the 4Children project is to improve health and well-being outcomes for orphans and vulnerable children (OVC) affected by HIV and AIDS and other adversities. 4Children seeks to support systems and structures at country and regional levels for promoting evidence-based interventions to protect against risk, interrupt cycles of vulnerability, and build pathways to resilience leading to an AIDS-free generation and contributing to overall improvements in quality of life and productivity in vulnerable children and their families.

**Services Provided:**
Led by Catholic Relief Services, the 4Children team includes core partners IntraHealth, Maestral, Pact, Plan and Westat, and collaborating partners African Child Policy Forum (ACPF), Parenting in Africa Network (PAN) and Regional Psychosocial Support Initiative (REPSSI). With a highly qualified project team, an extensive roster of technical experts, and an established presence in all potential target countries, 4Children is poised to provide customized, rapid and cost-effective capacity building support to governments and civil society in strategic technical and organizational areas. Project activities will contribute to the following objectives:

1. To increase the generation and use of evidence through surveillance and research to inform strategic child welfare and protection programming for children affected by AIDS and other adversities;
2. To support countries to scale up evidence-based child welfare and protection programming for children affected by AIDS and other adversities from the household and community levels to the national level; and,
3. To create an enabling environment, focused on local capacity and ownership, that is conducive to sustainable and quality child welfare and protection programming for children affected by AIDS and other adversities.

Accelerating Strategies for Practical Innovation & Research in Economic Strengthening (ASPIRES)

Purpose:
The primary goal of the project is to support gender-sensitive programming, research, and learning to improve the economic security of highly vulnerable individuals, families and children infected or affected by HIV/AIDS, as well as key populations at high risk of acquiring HIV.

Services Provided:
ASPIRES focuses on efficient provision of technical assistance (TA) to scale up high-quality interventions in the areas of consumption support, money management, and income promotion. The project will also focus on design and implementation of rigorous research to evaluate programs and inform a new understanding of best practices in economic strengthening.

The ASPIRES approach include:

- Using current evidence and state-of-the-art approaches to promote scalable, high-quality programming;
- Employing robust research methods to expand the evidence base and promote innovation;
- Building the capacity of national stakeholders to implement evidence-based programming as well as to monitor and evaluate programs;
- Coordinating with other donors, local and national governments, and global partners; and,
- Integrating an explicit gender perspective in research, tools, policy and standards recommendations, and technical assistance.

Means of Access:
Core and Field Support
Purpose
The Linkages Across the Continuum of HIV Services for Key Populations Affected by HIV (LINKAGES) Project is led by FHI 360 in partnership with IntraHealth International, Pact and the University of North Carolina (UNC), Chapel Hill. LINKAGES aims to accelerate the ability of partner governments, key population (KP) civil society organizations and private sector providers to more effectively plan, deliver and optimize comprehensive HIV/AIDS prevention, care and treatment services at scale that reduce HIV transmission among KPs sex workers, men who have sex with men, transgender persons, people who inject drugs, and their partners and extend life for those who are HIV-positive. This central mechanism is a five-year cooperative agreement providing for both core-funded and field-supported key populations (KP) programs.

Services Provided:
The project includes the following results:

Result 1: Increased availability of comprehensive prevention, care and treatment services, including reliable coverage across the continuum of care for key populations.

Result 2: Demand for comprehensive prevention, care and treatment services among key populations enhanced and sustained.

Result 3: Strengthened systems for planning, monitoring, evaluating and assuring the quality of programs for key populations.

LINKAGES provides overarching technical leadership in KP programming. It offers a range of approaches, tools, Standard Operating Procedures, technical assistance and related support that can be tailored for differing priorities and needs. At the country level, LINKAGES will engage governments, KP civil society organizations and networks, and private providers to jointly plan, implement and evaluate project interventions – using accessible, shared data to inform and adapt programming on an ongoing basis. Use of a cascade framework and related toolkit will enable local stakeholders to visualize, analyze and tailor solutions to address gaps in the HIV prevention, care and treatment continuum through state-of-the-art, evidenced-based interventions and quality assurance processes. The LINKAGES overarching capacity strengthening approach emphasizes south-to-south technical assistance and mentoring. Gender will be a cross-cutting theme used to inform the design, implementation, and monitoring and evaluation of sustainable activities at scale.

Core and Field Support
Livelihood and Food Security Technical Assistance II (LIFT II)

**Purpose:**
LIFT II provides technical assistance to design and establish referral systems for economic strengthening, livelihood and food security (ES/L/FS) services in conjunction with and as a means to enhancing engagement, adherence and retention of PLHIV and other patients in clinical care and treatment. LIFT II is a five-year project aimed at strengthening ES/L/FS services delivery in conjunction with health programs, working with USG agencies, implementing organizations, governments, civil society and the private sector. The primary goal of LIFT II is to support evidence-based, gender-sensitive programming to improve household food security and resilience as a component of a continuum of nutrition and health care.

**Services Provided:**
LIFT II provides technical assistance in support of ES/L/FS activities, particularly in the context of Nutrition Assessment, Counseling and Support (NACS) programs including: conducting assessments of country ES/L/FS activities; developing ES/L/FS strategies and implementation plans; designing and supporting monitoring and evaluation of ES/L/FS activities to assess impact, cost effectiveness, potential for replicability and scale-up, and sustainability; supporting policy development for ES/L/FS programs; leveraging of other donor resources; and strengthening implementing partner capacity, including training and quality improvement. LIFT II focuses on establishing referral systems at the local level that assess the needs of individuals and families, refers them to local ES/L/FS services, strengthens those services, and tracks those served to promote retention and adherence in clinical care.

**Special Notes:**
LIFT II is an Associate Award in the Office of HIV/AIDS under the Bureau for Economic Growth, Education and Environment (E3) FIELD Support Leader with Associate (LWA) Cooperative Agreement, managed by FHI 360, for the purpose of supporting the effective design and delivery of integrated ES/L/FS strengthening programs. Core funding is limited, but initial support for country assessments and programs design and planning can be requested from OHA. Country-level agencies can access further ES/L/FS technical support through funding of their own associate awards or by adding funds to the OHA LIFT II award.

YouthPower Action

Purpose
YouthPower Action (formerly known as YouthPower: Implementation IDIQ - Task Order #1) falls under the YouthPower: Implementation IDIQ, which is a multiple award IDIQ designed to support USAID to invest in positive youth development programming that works within and across multiple sectors, including health, education, economic opportunity, peace and security, and democracy, human rights and governance. Operating units can access this mechanism through core and field support buy-in. The purpose of YouthPower Action is to support and advance the implementation of USAID’s Youth in Development Policy through technical assistance in cross-sectoral, positive youth development programming to USAID Missions and operating units. YouthPower Action, led by FHI 360, will strengthen the capacity of USAID operating units, youth development institutions and systems (to include the government, civil society organizations (CSOs), and private sector/business community) to design, implement and sustain positive youth development programming across sectors. YouthPower Action will also facilitate the use of innovative approaches for both implementation and capacity building activities. Some such approaches may include, but not be limited to, the use of information and communications technologies (ICT) and new media tools to strengthen youth engagement and participation and the development of public-private partnerships. This task order will also increase youth engagement in development efforts. Programming will consider the needs of adolescent girls, young women, and at risk and vulnerable populations while considering gender and cultural norms. The activities planned under this Task Order will complement activities planned under YouthPower Learning.

YouthPower Learning

Purpose:
YouthPower Learning (formally known as YouthPower: Evidence and Evaluation - Task Order #1) falls under the YouthPower: Evidence and Evaluation IDIQ, which is a multiple award IDIQ designed to conduct research, evaluate innovative programs, disseminate information and strengthen/expand the evidence base for cross-sectoral and sector-specific approaches in positive youth development. This task order will support the agency to invest in positive youth development research and evaluation within and across multiple sectors, including health, education, economic opportunity, peace and security, democracy, human rights and governance and strive to evaluate the impact of cross-sectoral youth programming. As the prime contractor, Making Cents International will provide leadership in promoting best and promising practices evidence and research within and across youth development sectors.

The activities planned under this Task Order will complement activities planned under YouthPower Action.

Additionally, Making Cents International will be conducting the following sub-tasks:

1. Create and manage a YouthPower website to serve as a learning hub for cross-sectoral youth development.
2. Establish and maintain a cross-sectoral youth learning network to disseminate research, evaluation, and learning products.
3. Develop a standard indicator reporting system to be used by the YouthPower: Implementation IDIQ and YouthPower: Evidence and Evaluation IDIQ holders.
4. Analysis of positive youth development vs. problem/risk behavior youth programming.
5. Provision of evidence and evaluation support to USAID Missions and operating units, as needed, through evaluation & research technical assistance.

YouthPower: Evidence and Evaluation IDIQ

Purpose
The maximum contract ceiling for this IDIQ is $72 million dollars. There are six (6) IDIQ holders, including four (4) small business set-asides. Operating units can access this mechanism through direct task orders.

The YouthPower: Evidence and Evaluation IDIQ is designed to conduct research, evaluate innovative programs, disseminate information and strengthen/expand the evidence base for cross-sectoral and sector-specific approaches in positive youth development. This IDIQ will support the agency to invest in positive youth development research and evaluation within and across multiple sectors, including health, education, economic opportunity, peace and security, democracy, human rights and governance and strive to evaluate the impact of cross-sectoral youth programming. IDIQ holders form consortia of diverse organizations that bring a range of sector expertise to support single-sector and holistic cross-sectoral youth programs.

Activities include but are not limited to: designing, managing, and publishing rigorous impact evaluations in a variety of international settings including conflict, fragile, and crisis-affected environments; designing, conducting, and publishing performance evaluations, using mixed methods in a variety of international settings including conflict, fragile, and crisis-affected environments; design and implementation of cross-sectoral youth assessments; facilitation of strategy design and program design support to USAID and other donors; establishing data collection and monitoring procedures and systems; capacity development, training, and technical assistance in the area of design, monitoring and evaluation; management of knowledge management initiatives including information and communications technologies (ICT), new media, and communities of practice; and research in the area of international cross-sectoral youth development.

USAID expects the YouthPower: Implementation IDIQ holders and the YouthPower: Evidence and Evaluation IDIQ holders to collaborate throughout the life of both projects.

YouthPower: Implementation IDIQ

Purpose:
The maximum contract ceiling for this IDIQ is $375 million dollars. There are six (6) IDIQ holders, including one (1) small business set-aside. Operating units can access this mechanism through direct task orders.

The YouthPower: Implementation IDIQ is designed to support USAID in the implementation of its Youth in Development Policy (2012). It will enable the agency and its partners to invest in positive youth development programming that works within and across multiple sectors, including health, education, economic opportunity, peace and security, and democracy, human rights and governance. IDIQ holders form consortia of diverse organizations that bring a range of sector expertise to support single-sector and holistic cross-sectoral youth programs.

The YouthPower: Implementation IDIQ will cover a range of functions related to the cross-sectoral youth program design, piloting, implementation, scale-up, and capacity development. Activities include but are not limited to: project implementation; capacity development of local partners and stakeholders; management of sub-awards to local stakeholders; design and implementation of cross-sectoral youth assessments, piloting of innovative approaches and documentation of results; implementation of action research and performance evaluations; data collection and monitoring; and training of local stakeholders in cross-sectoral youth project assessment, design, and implementation.

USAID expects the YouthPower: Implementation IDIQ holders and the YouthPower: Evidence and Evaluation IDIQ to collaborate throughout the life of both projects.

**Purpose**
To advance promising ARV-based microbicides through preclinical and early-/mid-stage clinical testing.

**Services Provided:**
This project includes the following aims:

- Advance DS003-based tablet and ring through Phase I/II clinical evaluation;
- Advance maraviroc and maraviroc-combination rings through formulation and preclinical development; and,
- Identify and evaluate new and early development ARV compounds with alternative mechanisms of action for pipeline progression.

AVAC CASPR (Coalition to Accelerate and Support Prevention Research)

Purpose:
The Coalition to Accelerate and Support Prevention Research (CASPR) is designed to address this challenge through a robust network of strategic partnerships and an interconnected array of activities, all oriented towards the support, strengthening and impact of Africa-focused and -led biomedical prevention research, implementation and advocacy. The ultimate goal of this project is to support the development and sustainability of an African-centered network dedicated to advancing advocacy, policy, regulatory, community engagement and communication efforts that help accelerate biomedical HIV prevention research.

Services Provided:
Project activities are grouped into four major objectives: Advocacy; Research Translation; Research Preparedness; and Policy Engagement. Additional cross-cutting activities focused on gender integration, capacity building and monitoring and evaluation support this four-pronged strategy. In each area, CASPR builds on past experience and adds innovation to address the current context.

Advocacy:
Key innovations include linking prevention research advocacy to global and national approaches to ending AIDS and to campaigns for increased domestic financing for health in sub-Saharan Africa; a new virtual Advocacy Institute; and a new Network of African HIV Advocates that will serve as a focal point for African-led, sustainable advocacy.

Research Translation:
Notable in its expansion of a pan-prevention communications focus that has been identified as a critical service provided by AVAC and partners, as well as the establishment of the African HIV Media Network.

Research Preparedness:
Innovative in the expansion of the Good Participatory Practice (GPP) framework, including the development of regional Africa-based Centers of Excellence and making GPP more gender sensitive via tools, stakeholder engagement and training that meet the needs of young women, adolescent girls and sexual minorities.

Policy Engagement:
An unprecedented level of coordination between research partners, governments and civil society to design and implement an interconnected set of activities responsive to the information, skills, and technology needs of influencers and decision makers, including platforms for regulatory harmonization, dissemination of research plans and results, development of tailored data for decision making at country level via epidemiological modeling and target product profile (TPP) development, all designed by Partners with extensive country-level experience. Policy makers, regulators, decision-makers and other stakeholders will know and/or be able to decide: what is happening, why it matters, what matters most in a given timeframe, and how to act for impact.

Clinical Activities, Preparation of New Drug Application Dossier, and Implementation Studies for Tenofovir-based Oral Tablets for the Prevention of HIV Acquisition in Women

Purpose
The objectives of this program are to complete clinical and regulatory activities required for licensure of tenofovir (TAF)–based oral tablets for the prevention of vaginal HIV acquisition in women and to provide information about its implementation in African populations.

Services Provided:
This project includes the following activities:

• Completing FACTS001-related clinical activities;
• Completing clinical studies required for TAF-based tablet licensure;
• Assisting in the preparation of the NDA for daily F/TAF and TAF, for H prevention in women;
• Implementation studies of TAF-based tablets in Africa;
• Conducting a bridging/bioequivalence study to support the regulatory approval of a TAF-based tablet which can safely be used vaginally.

CONRAD Combination Contraceptive and Anti-HIV Vaginal Ring

Purpose:
To develop and evaluate a safe, effective, and acceptable contraceptive and HIV/AIDS prevention technology.

Services Provided:
This five-year project, recently extended an additional three years, focuses on the development of a 90-day vaginal ring that combines the recently proven HIV prevention drug, tenofovir, with the hormonal contraceptive, levonorgestrel. If shown to be safe, effective and acceptable, this combination ring would confer protection against HIV while delivering a highly effective contraceptive method, thus filling two reproductive health needs in one product.

Development of Novel On-Demand and Longer-Acting Microbicide Product Leads

**Purpose:**
To develop new on-demand and longer-acting microbicide products that can reach or be ready for clinical testing with the timeframe of the agreement and meet the criteria of being more potent, acceptable, discreet, longer and broader acting in order to improve adherence and effectiveness.

**Services Provided:**
This project includes the following activities:

- Advancing the clinical development of novel TFV-based products that are already or will be in clinical testing prior to the start of this project;
- Developing improved, more effective microbicide products using on-demand and longer-acting drug delivery systems; and,
- Expanding the preclinical pipeline by designing and testing new formulations incorporating novel microbicide candidates with different mechanisms of action.

IAVI ADVANCE (Accelerate the Development of Vaccines and New Technologies to Combat the AIDS Epidemic)

Agreement Type: Cooperative Agreement
Agreement Number: OAA-A-16-00032
Project Number: 936-8402.02
Duration: 7/1/2016 - 6/30/2021
Geographic Scope: Worldwide
COR/AOR: Benny Kottiri
Lee Claypool
Telephone: (571)-551-7228
(571)-551-7212
Fax: N/A
Email: bkottiri@usaid.gov
lclaypool@usaid.gov

Activity Director: Sarah Handy
Organization: International AIDS Vaccine Initiative
Telephone: (202)847-1089
Website: 
Email: shandy@iavi.org

Purpose
The search for a safe and globally effective HIV vaccine is a long-term endeavor. This cooperative agreement takes the unique circumstances of the epidemic in specific populations into consideration, ensuring an integrated and robust approach toward the discovery of an HIV vaccine. The award specifically emphasizes:
- African-centered science;
- R&D capacity-building endeavors;
- Forming and optimizing existing and novel strategic partnerships;
- Achieving the goals of efficiency and sustainability through leveraging resources and cost sharing; and
- Broad sharing of data locally and internationally.

Services Provided:
Building upon a 15-year partnership with USAID, IAVI supports a network of eight African Clinical Research Centers and laboratories led by highly skilled, in-country researchers. This network, called ADVANCE Centers of Research Excellence (CORE), drives regional collaboration, capacity building and research to test promising HIV vaccine candidates and to better understand the epidemic in Africa. Benefiting from their knowledge of the HIV epidemic and at-risk communities, ADVANCE links African researchers with global collaborators and innovative technologies throughout all stages of HIV biomedical prevention design and development.

ADVANCE takes significant steps towards achieving the field's long-term goal of developing a safe and globally effective HIV biomedical prevention technologies by implementing an integrated framework of project activities designed to:
- Create a Better Understanding of Communities and Cohorts by expanding the IAVI-partner clinical research network, creating an African-led, multi-stakeholder platform, which engages communities and investigates cohorts using the latest scientific technologies to inform vaccine discovery and development.
- Test Innovative Vaccines in Clinical Trials through ADVANCE's End-to-End platform, partnering with global stakeholders to accelerate the development of an HIV vaccine candidate portfolio for the field.
- Engage in Africa-Centered Science by expanding the scope of Vaccine Immunology Science and Technology for Africa (VISTA), pairing leading global institutions with CORE, to transfer next-generation technologies to Africa, including sequencing-based antibody repertoire analyses, impact of microbiome on host immune responses and bioinformatics technologies.
- Build Sustainable Capacity in Africa by transferring leadership of ADVANCE to leading African scientists, and investing in the next generation of researchers in multidisciplinary fields related to HIV prevention.

Means of Access:
Core Funding
IS APS: Engage4Health

Purpose:
A Combination Strategy for Linkage and Retention, Engage4Health is one of eight studies awarded under the first round of the Annual Program Statement: Implementation Science Research to Support Programs under PEPFAR (IS APS, http://go.usa.gov/Ye83).

Engage4Health addresses the challenges of ensuring effective linkage from HIV testing to HIV care and retention in HIV care among individuals who have successfully linked to care. Linkage and retention remain challenging in many PEPFAR priority countries. Available data suggest that less than one-third of individuals who test positive are successfully linked to and retained in HIV care at one year. Previous research has failed to address the multiple concurrent barriers newly diagnosed HIV patients face in the linkage from HIV testing to HIV care. In addition, most previous research has examined retention in HIV care instead of identifying weaknesses in linkage.

Engage4Health, a site-randomized study in Mozambique, will compare the effectiveness of a combination of interventions, versus the current standard of care, on linkage and retention of newly diagnosed HIV patients. Patients will be followed from initial testing to retention in care one year later. In addition, Engage4Health will look at the incremental effect of providing non-cash financial incentives in conjunction with the combination of interventions compared to the combination of interventions alone. Engage4Health hypothesizes that a combination of interventions of linkage and retention will be more effective in mitigating the multiple barriers HIV-positive patients face when moving from diagnosis to treatment.

Services Provided:
The APS supports implementation science research and evaluation activities, but it does not provide funding to support or establish service delivery activities.

Purpose

“Evaluation of the National South African Female Condom Program: Investigating Factors Associated with Uptake and Sustained Use” is one of two studies awarded under the second round of the Annual Program Statement: Implementation Science Research to Support Programs under PEPFAR (IS APS, http://go.usa.gov/Ye83).

The female condom (FC) was identified by the Reproductive Health Supplies Coalition in 2011 as one of several under-used reproductive health technologies having the potential to expand choice in reproductive health and family planning programs, add value to the method mix, and respond to the needs of diverse types of clients. The female condom is also key to increasing HIV protection options and is the only female-initiated HIV prevention barrier method. South Africa has one of the largest and best-established, public-sector male and female condom programs worldwide. This evaluation aims to strengthen this program through the identification of strategies that are most likely to enhance its acceptability, effectiveness and efficiency, enabling evidence-based adaptation for program scale-up.

A Cascade Model will be applied to identify and understand program and behavioral challenges affecting uptake of female condoms. This model will analyze “fall off” at various stages, including: (1) the macro-structural level; (2) service delivery; (3) provider promotion via counseling and provision of FC; (4) gender; (5) users (initial adoption and continuation of use over 12 months); and (6) user access to a sustained supply of female condoms. The evaluation will comprise three complementary components, each examining different junctures of the Cascade Model using a mixed-methods approach: a national evaluation sample of female condom distribution sites; a cohort of 300 new female condom acceptors and 60 of their partners for longitudinal assessment of key outcomes related to condom use, HIV-related behaviors, and relationship characteristics; and key informant interviews with policymakers and program managers to identify critical issues such as overall program leadership and coordination, training, supply and commodity security, advocacy, monitoring and integration with other programs.

Services Provided:
The APS supports implementation science research and evaluation activities, but it does not provide funding to support or establish service delivery activities.

Special Notes:

Means of Access
Core Funding
IS APS: HIV Prevention 2.0

Purpose:

Individual level biological and behavioral risks among key populations are contextualized by higher order risk factors including size and density of social and sexual networks, as well as stigma operating at the community level and affecting public policies. Studies by JHU have consistently demonstrated that the manifestations of stigma targeting key populations in the African context limit both the provision and uptake of effective HIV prevention, treatment, and care programs. The dual reality of the importance of HIV risk among key populations in generalized epidemics and the role of stigma in driving risks necessitates characterizing valid tools to measure stigma in these populations and effective interventions to reduce it.

The study measures the impacts of a scalable package of integrated stigma mitigating interventions for key populations, including men who have sex with men (MSM) and female sex workers (FSW). Employing a non-randomized prospective cohort design in Dakar, Senegal, outcomes include coverage of HIV and health services and, for participants living with HIV, adherence to antiviral therapy and viral load measures. A multifaceted approach employs behavioral and web-based community interventions in order to support biomedical services deployed in Dakar through the Ministry of Health. The premise relies on the continuum of HIV care for key populations that asserts the most effective process for diagnosis, linkage and retention to care for populations at highest risk of HIV acquisition and transmission is the availability of testing services and access to treatment.

Services Provided:
The APS supports implementation science research and evaluation activities, but it does not provide funding to support or establish service delivery activities.

Office of HIV/AIDS (GH/OHA): RES

IS APS: Situkulwane Lesiphephile - Safe Generations

Purpose
"Improving Approaches to ARV Therapy for HIV+ Pregnant Women (Situkulwane Lesiphephile - Safe Generations)" is one of eight studies awarded under the first round of the Annual Program Statement: Implementation Science Research to Support Programs under PEPFAR (IS APS, http://go.usa.gov/Ye83).

Mother-to-child transmission (MTCT) of HIV is attributable to 90 percent of new pediatric HIV infections worldwide and evidence indicates that initiating ARV therapy during pregnancy can effectively reduce MTCT. Many factors including, but not limited to, timely diagnosis of maternal HIV and initiation of ARV therapy, have prevented effective PMTCT efforts.

This study evaluates the feasibility and cost-effectiveness of providing all HIV-positive pregnant women lifelong triple ARV therapy, regardless of CD4 count (Option B+) in the Kingdom of Swaziland. All enrolled women and their infants are comprehensively followed up to determine outcomes. The goal of the study is to show that a single, streamlined approach to ARV therapy for HIV-positive pregnant women will lead to more effective PMTCT.

Services Provided:
The APS supports implementation science research and evaluation activities, but it does not provide funding to support or establish service delivery activities.

Means of Access
Core Funding
MPii: Project CHARISMA - Community Health Clinic Model for Agency in Relationships and Safer Microbicide Adherence

Purpose:
Part of the microbicide product introduction initiative (MPii), project CHARISMA aims to increase women’s agency to consistently and safely use microbicides and mitigate intimate partner violence (IPV). Research to date suggests that male partner approval or active support is often desired, required or culturally indicated for women’s microbicides use, although products are female initiated and designed to empower women to protect themselves from HIV autonomously. Participants in previous microbicides studies have described a wide spectrum of ways in which product use and partner relationships interact with one another. CHARISMA is awarded to Research Triangle Institute in collaboration with its partners, the University of Washington, FHI 360, Wits-RHI and Sonke Gender Justice. CHARISMA is a five-year cooperative agreement with a ceiling of $4.9 million. The period of performance is July 20, 2015 through July 17, 2020.

Services Provided:
The project has the following aims:
1. Identify improved approaches to measure and address the social impacts and harms of microbicides use;
2. Develop and pilot test the CHARISMA intervention to increase women’s agency to safely use microbicides and mitigate IPV; and
3. Disseminate knowledge and promote uptake of promising practices for future microbicides and multipurpose prevention technology projects.

Special Notes:
N/A

Means of Access:
Core Funding
Purpose

Part of the microbicide product introduction initiative (MPii), project EMOTION aims to increase the uptake and use of microbicides by women at high risk of HIV infection through a comprehensive introduction package and marketing campaign for selected microbicides. EMOTION’s partners will design these outputs through an integrated human-centered design (HCD) strategy validated by qualitative and quantitative socio-behavioral research. HCD draws from the extensive socio-behavioral literature discussing how lifestyles, hygiene practices, sexual risk-taking, activities preceding intercourse, and potential for covert use may affect the uptake of microbicides. In addition to focusing on individual behavior and social, peer, and community influences, HCD studies aim to understand how product design, branding, packaging, and messaging influence the user’s choices, confidence, and long term engagement with the product. HCD studies have been extensively used in the technology, retail, communications, entertainment and health care fields. EMOTION will harness the latest advancements from these private sector approaches and combine them with leading socio-behavioral techniques to accelerate product development in the HIV prevention field. The EMOTION team includes collaborators IDEO, Abt Associates, RTI International, and CAPRISA to identify individual, couple, and community based drivers for and barriers to product use, as well as define and test product changes at the design, packaging, access and messaging levels in order to increase microbicide demand, use, and adherence.

Services Provided:

This project will use the human-centered design (HCD) approach to optimize the design of dosage forms, messages, delivery modalities, and educational campaigns to facilitate microbicide product uptake and consistent use via four specific aims:

1. Leverage deliverables from baseline research;
2. Develop initial design iterations of microbicide products within cost, regulatory, stability, and safety limits;
3. Conduct a randomized cross-over design where women use 2 microbicide products to measure adherence and protocol compliance over time; and
4. Test a large-scale roll-out and distribution campaign for at least one microbicide dosage form.

MPii: Project GEMS - Global Evaluation of Microbicide Sensitivity

Purpose:
Part of the microbicide product introduction initiative (MPii), project GEMS is a comprehensive analysis of drug resistance risk during roll-out of ARV-based microbicide/PrEP. The project encompasses laboratory and computational research, programmatic data, and policy development and evaluation. It will be working closely with partners and collaborators in key organizations and stakeholders in the ARV-prevention field. GEMS is awarded to University of Pittsburgh in collaboration with its partners, FHI 360, University College London, Lancet/BARC-SA, and SCHARP. GEMS is a five-year cooperative agreement with a ceiling of $1.9 million. The period of performance is July 20, 2015 through July 17, 2020.

Services Provided:
The project will implement the following activities:

1. Conduct laboratory studies to characterize resistance risk with ARV-based prevention
2. Conduct modelling studies to characterize resistance risk with ARV-based prevention
3. Develop of policy recommendations for HIV testing and resistance monitoring during microbicide/PrEP roll-out
4. ARV resistance monitoring during microbicide/PrEP roll-out

Purpose
Part of the microbicide product introduction initiative (MPii), the OPTIONS project focuses on product introduction for public health technologies, such as microbicides and ARV-based HIV prevention products, requires an extensive array of skill sets. The OPTIONS consortium consists of FHI360, Wits RHI, and AVAC, and represents a multidisciplinary, international collaboration focused on ARV-based prevention research-to-rollout continuum. The purpose of OPTIONS is to develop a streamlined, adaptable product delivery platform for current and future microbicide and ARV-based HIV prevention products.

Services Provided:
The project includes the following aims:
• Developing evidence-based business cases and coordinating investment strategies for ARV-based prevention product introduction that will ensure timely global, national, and private sector commitments in priority areas;
• Supporting country level regulatory approval, policy development, program planning, marketing, and implementation strategies for ARV-based prevention product introduction;
• Facilitating and conducting implementation science to advance the introduction of and access to microbicides and ARV-based prevention technologies; and
• Provide technical assistance and support for health systems strengthening with rapid use of data to identify and address implementation bottlenecks throughout the value chain.

MPii: Project POWER - Scalable, Effective Delivery of Microbicides and PrEP for Young Women in Kenya and South Africa

Purpose:

Part of the microbicide product introduction initiative (MPii), project POWER will develop and evaluate effective, scalable strategies that are context-specific and gender responsive for closing critical gaps in microbicide and PrEP delivery for African women in high HIV incidence settings. It uses multidisciplinary methods to understand women’s preferences for using microbicides and PrEP. It will conduct demonstration projects with strategic pilots of delivery strategies, first with oral PrEP, given the anticipated timeline of availability of topical microbicides, and then rapidly transitioning to a menu of microbicide and PrEP options. Using a gender-focused approach, we will characterize choice, uptake, early adherence, and identify cost-effective delivery models, including assessment of repeat HIV testing, decision-making within partnerships, and the interface with reproductive health services. All activities will include results dissemination, sharing of lessons learned, and provision of technical assistance, facilitating success for delivery of high-impact prevention for women and leveraging collaborations across this APS. POWER is awarded to University of Washington in collaboration with its partners, KEMRI, Desmond Tutu HIV Foundation, Wits RHI, Research Triangle Institute, Carnegie Mellon University and Massachusetts General Hospital.

Services Provided:

The project has the following aims:

1. Conduct formative research
2. Establish open cohort prevention demonstration projects
3. Pilot and adapt scalable microbicide and PrEP adherence support intervention and delivery strategies
4. Conduct cost analyses and mathematical modelling
5. Disseminate findings and provide technical assistance

Non-ARV-Based Microbicide

**Purpose**
To develop a safe, effective, and acceptable non-ARV-based microbicide that protects users against HIV and also STIs and that can be delivered via different vehicles suitable for provision through public-sector programs.

**Services Provided:**
The project includes the following aims:

- Develop a griffithsin microbicide to be formulated as a sustained-delivery vaginal ring and an on-demand nanofiber delivery system;
- Demonstrate the safety and efficacy of the griffithsin formulations against HIV and other STIs in vitro, ex vivo, and in vivo;
- Identify and follow the regulatory path needed to secure INDs to advance the griffithsin microbicides for clinical testing; and,
- Plan and conduct a first-in-human Phase 1 clinical study on a griffithsin gel.

OPTIMIZE

Purpose:
OPTIMIZE -- a five-year cooperative agreement awarded under a Broad Agency Announcement (BAA) -- harnesses the power of innovative partnerships to accelerate access to safer, simpler and more affordable antiretroviral therapy (ART).

A South African-led global consortium, OPTIMIZE leverages the expertise of prime partner Wits Reproductive Health & HIV Institute (Wits RHI) and consortium members ICAP, Mylan Laboratories Limited, University of Liverpool, and Medicines Patent Pool. OPTIMIZE focuses on closing gaps in clinical trial data, advancing novel drug combinations and formulations, and global and country-specific product introduction efforts to accelerate access to optimized ART.

Services Provided:
OPTIMIZE can receive core and field-support funding. Missions interested in buying in through field support can access OPTIMIZE for the following categories of services, with illustrative activities listed to serve as examples:

Enabling environment:
- Define and promote public health value proposition
- Map and/or simplify drug registration procedures
- Conduct guidelines analysis and assess budget requirements/impact

Planning & preparation:
- Develop national forecasts incorporating optimized products
- Develop phased implementation plan including communications and M&E plans
- Revise tools and SOPs for training and mentoring clinicians

Service delivery support:
- Train and mentor clinicians in SOPs for patient management (including viral load monitoring), regimen tracking and stock monitoring
- Increase demand among patients through community health days and community meetings

Transition monitoring & visibility:
- Conduct intensified patient monitoring & analysis, including cohort analysis (facility level)
- Conduct intensified stock monitoring (facility, district, regional, central levels)
- Conduct routine tracking of transition progress against established targets (all levels)

Early adopter research:
- Conduct implementation assessments and other research on clinical aspects of ART optimization.

Project SOAR (Supporting Operational AIDS Research)

Purpose
The goal of Project SOAR (Supporting Operational AIDS Research) is to improve the quality and impact of HIV and AIDS program outcomes by strengthening operations research and evaluation activities. Project SOAR supports the PEPFAR Blueprint Roadmap for Driving Results with Science and contributes to PEPFAR’s Impact Agenda. Project SOAR is awarded to the Population Council in collaboration with its partners, the Elizabeth Glaser Pediatric AIDS Foundation, Futures Group, Futures Institute, Johns Hopkins University, and the University of North Carolina at Chapel Hill. Project SOAR is a five-year cooperative agreement with a ceiling of $70 million. The period of performance is September 15, 2014 through September 14, 2019. This mechanism accepts both core funds and field support.

Services Provided:
The project will advance an operations research and evaluation agenda, in collaboration with the Office of HIV and AIDS and USAID country teams in three areas:

1. Conducting high quality operational research and evaluation studies to improve and advance HIV and AIDS program implementation;
2. Capacity building to strengthen local institutions’ capacity to design and conduct high quality operational research and evaluation; and
3. Disseminating and utilizing results from operational research studies and evaluations.

Means of Access
Field Support
The Development and Testing of an Injectable Antiretroviral Agent, Cabotegravir Long-Acting, for HIV Prevention in Women.

Purpose:
This award facilitates a public private alliance, under the Global Development Alliance (GDA) APS, between ViiV Pharmaceuticals and CAPRISA, to identify a novel and safe HIV prevention product for young women, centered on Cabotegravir. ViiV is a leader in the pharmaceutical industry and provides the necessary data, clinical trial material, and licensure experience required for the cabotegravir collaborative study; while CAPRISA acts as the implementing partner for trial design, recruitment, and post-trial research around the product. In an environment where recent enthusiasm revolving around antiretrovirals as prophylaxis has been tempered with the challenge of adherence, Cabotegravir long-acting injectable formulations offer potential solutions for improving adherence in at risk women in South Africa, who would prefer an alternative to oral prophylaxis formulations. The greater context of Cabotegravir’s role among the larger risk factors contributing to HIV incidence, such as age of partner, type of partner, presence of genital inflammation, adherent use of oral PrEP, is largely unknown. The project is designed to gain insights on criteria that will be crucial for future trials, and the accelerated approval of a final product.

Services Provided:
This project includes the following activities:

• Identifying risk factors for HIV acquisition in young at risk HIV-uninfected women;
• Assessing the acceptability, uptake, and adherence to biomedical prevention and behavioral prevention options; and
• Informing future large efficacy trials.

Thin-Film Polymer Device for Microbicide Delivery

Purpose
To develop a novel microbicide sustained-release delivery system in the form of a subcutaneously injected and biodegradable thin-film polymer device that improves on the effectiveness, acceptability, usage, and accessibility of existing microbicide delivery systems. To test the safety, pharmacokinetics (PK), pharmacodynamics (PD), and acceptability of ARVs systemically delivered through the novel TFPD by conducting IND-enabling pre-clinical and Phase I clinical studies.

Services Provided:
This project includes the following activities:
• Identification of lead and back up ARV candidate and technology development;
• Pre-IND/preclinical research;
• IND regulatory activities;
• Pilot product manufacturing and clinical translation; and,
• Phase I clinical work

Validation of Objective Measures of Product Adherence for Microbicide Trials

Purpose:
To develop a composite, sensitive, and robust panel of biomarkers which objectively measure (1) vaginal/rectal insertion of product, (2) semen exposure, and (3) drug/placebo delivery at the mucosa to permit a rational interpretation of microbicide results.

Services Provided:
This project includes the following activities:

• Optimizing and automating biomarkers of vaginal insertion, semen exposure and product/gel delivery from returned, used vaginal applicators;
• Validating a triple adherence marker in clinical studies utilizing timed intercourse, intravaginal insemination and directly observed insertion of TFV and placebo gel applicators in the U.S. and Africa; and,
• Applying the triple adherence markers to a subset of returned gel applicators from the FACTS 001 and CAPRISA 008 studies.
• Discovering biomarkers to differentiate rectal from vaginal insertion of returned microbicide gel applicators.

Office of HIV/AIDS (GH/OHA): SCC

Grant Management Solutions (GMS 2) Project

Purpose
This contract provides technical assistance to improve the functioning of Global Fund grants to fight AIDS, tuberculosis, and malaria. The aim of the GMS project is to improve the functioning of Global Fund grants, and thereby increase the effectiveness and efficiency of prevention, care and treatment interventions for HIV/AIDS, TB and malaria in countries seeking TA. The mission of GMS is to provide urgent, short-term TA to CCMs and PRs for the purpose of unblocking bottlenecks and resolving systemic problems that hinder the response to the three diseases, as well as to engage in capacity building and knowledge dissemination activities.

Services Provided:
GMS has three objectives:

1. Provide urgent, short-term, management-related technical support to Global Fund grantees in order to allow and improve the functioning of Global Fund grants, thereby increasing the quality and effectiveness of prevention, care and treatment interventions for HIV/AIDS, tuberculosis and malaria. This urgent, short-term support will constitute the majority of the support provided. Medium- to-long-term technical assistance may also be provided on a more limited basis as directed by the COR. This support is generally provided in four technical areas:
   - Organizational development (including governance and leadership) for Global Fund Country Coordinating Mechanisms (CCMs);
   - Program and financial management for Global Fund Principal Recipients (PRs);
   - Procurement and supply management (PSM); and
   - Monitoring and evaluation (M&E)

2. Scale up the number of local people and institutional entities that have knowledge of the Global Fund and can provide high quality management support to Global Fund grantees, by engaging in mentoring and training relationships with 12 regional entities.

3. Develop knowledge-sharing platforms. This involves developing, collating, and widely disseminating tools/guidance/curricula/ lessons learned with the broader Global Fund community, including other technical support providers.

Special Notes:
Core funding (applications accepted from CCMs and PRs and reviewed by U.S. Government Global Fund Technical Support Advisory Panel [TSAP]) and Field Support.

Field Support, Core Funding
Joint U.N. Programme on HIV/AIDS (UNAIDS III)

Purpose:
The UNAIDS III grant seeks to expand UNAIDS’ response to the global HIV epidemic by supporting its 2016-2021 strategy, which aims to achieve, by 2020, fewer than 500,000 people newly infected with HIV, fewer than 500,000 people dying from AIDS-related causes, and elimination of HIV-related discrimination; and to contribute to the achievement of the Sustainable Development Goals. The scope of the grant provides core support to the following strategic areas:

- Leadership and advocacy
- Coordination, coherence and partnerships
- Building country ownership, mutual accountability & sustainable capacity
- Knowledge translation
- Measurement of progress and improved accountability

Services Provided:
In addition to the focus areas listed above, UNAIDS III supports the following components:

- Combination Prevention – predicated on the idea that no single intervention is effective alone in the control of HIV transmission;
- Smart Investments – with the expectation that the UNAIDS Secretariat can play a leadership role in helping all stakeholders to maximize the impact of every dollar;
- Country Ownership – with the ultimate goal of having recipient countries plan, oversee, manage, deliver, and eventually finance health programs that are fully responsive to the needs of their people;
- Women, Girls and Gender Equality – acknowledging the need to address the disproportionate impact of HIV/AIDS on women and girls, UNAIDS should play a key role in redressing gender imbalances, empowering women and girls and improving health outcomes for individuals, families, and communities;
- OVC and other Key Populations – UNAIDS should continue to strengthen its engagement with civil society and networks of people living with HIV in order to facilitate their full, active and meaningful participation;
- Strategic Information – acknowledging that UNAIDS has played a leading role in coordinating efforts to harmonize and synthesize HIV data for decision-making, UNAIDS should continue to guide the coordination, development and use of strategic information;
- Technical Support Facilities (TSF) – which provide technical support on possible solutions for Global Fund grants experiencing implementation bottlenecks. This is demand driven and includes capacity building of local experts and groups to provide longer-term support.

Office of HIV/AIDS (GH/OHA): SCH

Global Health Supply Chain – Procurement and Supply Management (GHSC-PSM) - HIV/AIDS Task Order

**Purpose**

The purpose of the Global Health Supply Chain - Procurement and Supply Management single award IDIQ contract is to ensure uninterrupted supplies of health commodities to prevent suffering, save lives, and strengthen supply chain systems in low and middle-income countries. The IDIQ has three task orders, one of which directly support the President’s Emergency Plan for AIDS Relief (PEPFAR).

**Services Provided:**

As a holder of the GHSC-PSM IDIQ, the Chemonics consortium will help improve the availability of health commodities and provide supply chain technical assistance by meeting the following objectives:

**Objective 1: Global Commodity Procurement and Logistics** This includes:
- Health commodity procurement.
- Logistics.
- Health commodity quality assurance.
- Data Visibility.

**Objective 2: Systems Strengthening Technical Assistance** This includes:
- Strategic planning.
- In-country logistics.
- Capacity building.
- Enabling environments.

**Objective 3: Global Collaboration to Improve Long-Term Availability of Health Commodities** This includes:
- Global Strategic engagement.
- Global market dynamics.
- Advocacy.
- Global coordination.

Field Support, Core Funding
Global Health Supply Chain - Quality Assurance (GHSC-QA)

Purpose:
This contract will serve as the primary vehicle through which USAID will assure the quality of health commodities procured in support of global health programs.

Services Provided:
FHI 360 will perform the following activities to ensure high quality health commodities:

• Establish a comprehensive quality assurance program;
• Design and implement a quality control strategy;
• Provide technical leadership in forums within the quality assurance arena;
• Provide technical assistance to partner country medicines regulatory authority, other government bodies, and academic institutions; and,
• Collaborate with global partners (e.g., Global Fund, UNFPA) and other contractors within the Global Health Supply Chain Program.

Special Notes:
The QA contract is one of six mechanisms under the Global Health Supply Chain Program (GHSC). Core funding will support the vendor prequalification, recall management, SOP generation, quality control testing, global collaboration, and other activities within this contract. Field support will fund the technical assistance and capacity building activities under this contract.

Purpose
The Global Health Supply Chain – Rapid Test Kits TO (GHSC- RTKs) serves as the singular means of procuring HIV RTKs within the GHSC Program. The GHSC was designed to provide supply chain technical assistance as well as commodity procurement for the Bureau of Global Health, regardless of the commodity type. As the primary diagnostic tool for determining HIV/AIDS status and the gateway for care and treatment of HIV positive people, RTKs play a vital role in combatting the global HIV/AIDS epidemic. Without an adequate and timely supply of quality RTKs, HIV/AIDS programs cannot function. Thus Remote Medical International (RMI) will play a vital role in supporting the USG’s goal of achieving an AIDS-free generation in our lifetime. The primary objective of this Contract is to ensure the availability of approved HIV Rapid Test Kits (RTKs) using a global procurement strategy. An RTK is defined as an assay for the diagnosis of infection with HIV-1/2 or type specific diagnosis of HIV-1 and HIV-2, from which test results can be read directly, within 30 minutes of the time the specimen is applied to the device, without calibration or calculations. The USAID | Global Health Supply Chain – Rapid Test Kits (GHSC- RTKs) project will have the responsibility for the procurement and shipment of HIV rapid test kits (RTKs) to designated destinations and stakeholders for use in host country HIV and AIDS programs. Other procurement and supply chain-related services will be provided by other contracts within the GHSC Program. This TO is a small business set aside.

Services Provided:
Procurement of HIV Rapid Test Kits with delivery to an in-country consignee.

Office of Infectious Disease

Bureau for Global Health

Office of Infectious Disease

Director: Elizabeth Fox
Purpose
To strengthen the delivery of infectious disease and other health programs in developing countries by accessing technical expertise from the Centers for Disease Control and Prevention (CDC) and collaborating with the CDC to address infectious disease and other health problems in the developing world.

Services Provided:
The umbrella Interagency Agreement (IAA) with CDC allows USAID to access technical expertise from CDC, a world-renowned source of specialized technical experience and expertise in the international health field. The IAA supports activities in the control and prevention of infectious diseases including tuberculosis, malaria, disease surveillance, antimicrobial resistance, neglected tropical diseases, and environmental health.

Specific work plans are developed with appropriate centers or divisions within CDC and activities take the form of short-term consultancies or long-term technical assistance. Activities include:
- Technical and program support for the development and implementation of appropriate global/regional/country-level health programs and strategies;
- Monitoring and evaluation of global/regional/country-level health activities, projects and programs; and,
- Studies, assessments, evaluation and other research activities to assist in policy dialogue, planning and formulating health programs.

Missions can access the IAA through field support for either short-or long-term technical assistance.

Means of Access
Core and Field Support
PSA- Procurement Support Award (Jefferson Consulting Group)

Purpose:
USAID’s Bureau for Global Health awarded Jefferson Solutions (Jefferson) the Procurement Support Award (PSA), a five-year support contract, in July 2013. The PSA allows Global Health and the USAID Missions to quickly access dedicated resources to support acquisition and assistance (A&A) efforts for Global Health-funded and healthrelated projects. The PSA is also able to provide additional project support on an as-requested basis.

Services Provided:
The PSA is a time and materials contract designed to save time and agency resources in the A&A process. The PSA can provide support to both health offices and the Office of Acquisition and Assistance (OAA).

The PSA supports the full acquisition and assistance lifecycle for Global Health-funded and health-related projects. The Washington Office as well as USAID Missions can request PSA staff for short-term or long-term services. We provide support for the following activities: Assist in the negotiation and administration of contracts, grants, cooperative agreements and interagency agreements

• Planning Phase: Assist with Concept Papers, Project Appraisal Documents (PAD), Statements of Work, Proposal Instructions, Evaluation Criteria, Choice of Instrument Memo, and IGCE;
• Solicitation Phase: Support OAA with RFPs and RFAs;
• Evaluations Phase: Support TECs with Evaluation Plans, Compliance Reviews, Cost/Price Analysis, Reference Reviews, Etc.;
• Award Phase: Prepare award documentation in GLAAS and support in post-Award debriefs;
• Post Award: Track deliverables, maintain documentation; and,
• PSC Recruitment: Develop position descriptions, build candidate databases, recruit and screen candidates, develop PSC solicitations, manage applications, check references, conduct interviews, and develop award documents.

### Office of Infectious Disease (GH/ID):

**World Health Organization Consolidated Grant (WHO Con)**

**Purpose**

This grant provides support for collaborative activities with USAID and the World Health Organization (WHO) in a wide range of health-related activities, including infectious diseases, maternal and child health, family planning, safe motherhood, newborn health, reproductive health, environmental health, and HIV/AIDS.

**Services Provided:**

The consolidated grant to WHO consolidates most of the Bureau for Global Health’s agreements with WHO under one mechanism. The grant supports broad USAID-WHO collaboration at WHO headquarters in Geneva as well as at regional and country offices, in tuberculosis, malaria and other vector borne diseases (e.g., dengue), disease surveillance, research, antimicrobial resistance, maternal and child health, family planning and reproductive health, and HIV/AIDS. This grant replaces the former Umbrella Grant (AAG-G-00-99-00005).

- Specifically, support is provided to WHO’s relevant technical and program divisions for technical input and assistance in the development, implementation and/or evaluation of health programs and studies including:

  - Global strategy development
  - Technical analyses
  - Demo activities & feasibility studies
  - Capacity building
  - Policy reform
  - Health Systems Strengthening
  - Project evaluation & assessments
  - Monitoring & evaluation
  - Maternal & neonatal health
  - Infectious diseases
  - Pandemic Influenza & emerging threats
  - Family Planning & Reproductive Health
  - Best Practices in Family Planning
  - Medical Eligibility Criteria (MEC)
  - Maternal & neonatal health

Proposed programs should include a 13 percent program support fee and an environmental screening fee of $2,500 per proposal.

**Special Notes:**

**WHO Consolidated amendments**

Tentative deadlines for the submission of final program descriptions and for funds to be committed in the Field Support Database. Please contact the AOR and activity manager for confirmation of the submission deadline.

Food and Agriculture Organization of the United Nations (FAO) Umbrella Grant

**Purpose:**
To provide support to FAO to carry out collaborative activities with USAID to prevent and control highly pathogenic avian influenza (HPAI) and other emerging zoonotic diseases of significant public health concern as well as other diseases, such as H1N1 influenza, that can infect both humans and animals. The overall objective is to reduce the risk of human exposure by reducing infections in animals.

**Services Provided:**
This umbrella grant mechanism allows USAID missions and bureaus to provide support to FAO either to headquarters or to regional and country offices for specific technical input and assistance related to avian influenza and other zoonotic diseases of significant public health concern, including H1N1 influenza. USAID supports FAO as the lead international organization for animal health activities, with capacities to support outbreak surveillance and investigation, response, planning and preparedness, improved biosecurity, disinfection, public-private partnerships and communications.

**Special Notes:**

**Means of Access:**
Core and Field Support
One Health Workforce (OHW)

**Purpose**
Recent and on-going global health threats have underscored a critical need for health workers that are prepared to manage diseases that cross human, animal, and environmental health sectors. By promoting the use of innovative curricula and programs in classrooms, online, and in the field and by developing faculty capacities for OH teaching and research, the OHW project is creating a workforce with the necessary multisectoral technical expertise and practical skills to address the threat of emerging infectious disease around the world.

**Services Provided:**

1. Work through the regional and country networks to support universities to strengthen their graduate and undergraduate preparation of future health workers to meet country OH workforce needs (e.g., the future OH workforce) by:
   - Targeting training programs to identified workforce needs at the country level;
   - Promoting cross-disciplinary, cross-institutional, and cross-sectoral (public-private-academic) collaboration in training;
   - Transforming the classroom through innovative and problem-based teaching and training; and
   - Incorporating practical experience and skill building (One Health practice) into training programs—both existing and new.

2. Work through the regional and country networks to support universities to strengthen their graduate and undergraduate preparation of current health workers to meet country OH workforce needs by:
   - Creating in-service continuing education programs designed to strengthen capacity in government and the private sector in an ongoing basis to meet identified country OH workforce needs; and
   - Designing applied training programs aimed at advancing in-service careers through remote/service-based certificate, master's and/or doctorate level training programs.

3. Help strengthen regional and national university networks in ways that promote their sustainability by:
   - Reviewing and strengthening their organizational systems including financial, management, and communication; and
   - Identifying sustainable strategies to engage and support universities and faculty.

Core and Field Support
PREDICT-2

Purpose:
The overall goal of the PREDICT-2 project is to improve characterization of biological and behavioral risks to better understand which locations, “epidemiological zones, or interfaces are most associated with spillover, amplification, and spread of zoonotic viruses with pandemic potential. The activity has the following overarching objectives:

**Objective 1: Viral monitoring** – conduct monitoring of priority viral families in wildlife and human populations at “high-risk” animal-human interfaces to expand existing data sets, allowing for more-detailed understanding of the biological drivers responsible for zoonotic virus spillover, amplification, and spread.

**Objective 2: Risk characterization** – conduct monitoring of behaviors, practices, and conditions at the “high-risk” animal-human interfaces where viral monitoring is being conducted in wildlife, livestock, and human populations to expand existing data sets and allow for more-detailed understanding of the behavioral drivers that contribute to zoonotic virus spillover, amplification, and spread.

**Objective 3: Global surveillance networks and analysis** – improve collection and use of data related to monitoring and responding to priority zoonotic viruses with pandemic potential.

**Objective 4: Validation of “One Health” approaches** – gather evidence for policy makers to show the value of One Health investments.

Services Provided:

- Technical assistance, limited operational support, and capacity strengthening for host-country institution viral surveillance and laboratory testing.
- Longitudinal monitoring of a limited number of priority zoonotic viral families (e.g. influenza, coronaviruses) with pandemic potential, to track changes in geographic and host distribution, transmissibility, infectivity, and viral evolution.
- Technical assistance, limited operational support, and capacity strengthening for host-country institutions to conduct surveillance of behaviors, practices, and conditions at the “high-risk” animal-human interfaces where viral monitoring is being conducted in wildlife, livestock, and human populations.
- Modeling to predict spillover, amplification, spread using biological and behavioral monitoring data to predict which locations, epidemiological zones, or interfaces have highest risk for spillover, amplification, and spread of zoonotic viruses with pandemic potential.

Preparedness & Response (P&R)

Purpose
A project within USAID's Emerging Pandemic Threats 2 Program (EPT-2), the goal of the Preparedness and Response Project (P&R) is to enable national governments to establish and strengthen systems, policies and practices for the prevention, detection, response and control of emerging disease threats, especially zoonotic diseases. The project has two major objectives:

1. establish and strengthen National One Health Platforms, which are formal groups of senior technical and administrative government representatives from a broad range of sectors who meet on a regular basis to coordinate for improved health with each sector and for prevention and control of zoonotic diseases, and

2. initiate and support development, testing and implementation of multi-sectoral National Preparedness and Response Plans for Public Health Emergencies.

Global Health Supply Chain Procurement and Supply Management Malaria Task Order 2

Purpose:
To provide USAID Missions, Bureaus and operating units with a worldwide mechanism to support the President’s Malaria Initiative’s and USAID’s goal of reducing the burden of malaria and supporting related activities pursuant to USAID’s maternal and child health and other infectious disease goals. It will primarily support USAID’s implementation of malaria programs through the procurement, management and delivery of high quality, safe and effective malaria commodities; the provision of on-the-ground logistics, supply chain and related systems strengthening technical assistance and implementation capacity; and provide technical leadership to strengthen the global, demand, financing and introduction of existing and future malaria commodities.

Services Provided:
Procurement, management and delivery of high quality, safe, and effective malaria commodities with on-the-ground logistics capacity, technical assistance and implementation capacity. The objectives of this task order are as follows:
• Improve the provision of health commodities through global commodity procurement and logistics;
• Strengthen in-country supply chain systems through supply chain technical assistance; and,
Global collaboration to engage strategically to improve long term global supply of health commodities.

Indoor Residual Spraying 2 Task Order 6 (The PMI AIRS Project)

Purpose
To support planning and implementation of indoor residual spraying (IRS) programs to prevent malaria. This task order will enhance USAID’s ability to implement IRS programs on the ground through cost-effective commodities procurement for IRS, IRS logistics systems, access to technical expertise, and implementation of IRS in countries affected by malaria. The IRS 2 TO 6 contract places added emphasis on building the capacity of Ministries of Health and local institutions to plan, conduct, supervise and monitor IRS programs.

Services Provided:
1. Establish cost-effective supply chain mechanisms including procurement, distribution and storage of IRS-related commodities and execute all aspects of logistical plans for IRS-related activities.
2. Implement safe and high-quality IRS programs and provide operational management support (i.e., field supervision, operations planning, and day-to-day implementation management) and expert short-and long-term technical and administrative assistance, primarily in the PMI focus countries but also in other countries where USAID supports malaria programs (specified annually by USAID).
3. Provide on-going monitoring and evaluation for activities and ensure quality control measures for commodities, operations, and monitoring are established and/or refined and implemented.
5. Contribute to the collection and analysis of routine entomological and epidemiological data, in order to effectively monitor and promote evidence-based vector control interventions, including PMI or USAID-directed research and the piloting of relevant, novel tools/technologies.
6. Strengthen the capacity of NMCPs, health personnel and other relevant institutions in the managerial, technical, supervisory, and evaluative functions of IRS (Components 1-3) by engaging, training, and supervising personnel at the central, provincial, district, and community levels. In addition, ensure that planning and implementation of IRS includes attention to gender considerations and that IRS continues to protect women and children of targeted communities from malaria.

Core and Field Support
International Federation of Red Cross and Red Crescent Societies (IFRC) Umbrella

**Purpose:**
The purpose of this grant is to support the IFRC’s efforts to prevent and control malaria and tuberculosis.

**Services Provided:**
This grant will provide a flexible and simple means for USAID operating units to access the federation’s headquarters and field office expertise to support tuberculosis and malaria activities. Through individual proposals, USAID missions or headquarters will be able to work with IFRC to customize scopes of work, work-plans, budgets, and indicators to meet the needs of the country, USAID mission and IFRC, in coordination with other funding partners. In general, activities will focus on utilizing Red Cross and Red Crescent volunteers to increase insecticide-treated net (ITN) ownership, increase the correct and consistent use of ITNs, improve understanding and awareness of the signs and symptoms of malaria, and provide community-based activities to help scale-up proven malaria prevention and treatment interventions. In the area of TB, activities will focus on increasing the detection and treatment of tuberculosis using proven interventions and engage in international partnership to support the goals of the Stop TB program.

IVCC: Bringing Insecticide-based Tools to Market

Purpose
The Innovative Vector Control Consortium (IVCC) is an international public-private partnership whose aim is to foster research and development of new vector control products and tools for public health, including new insecticides and insecticide formulations. IVCC was awarded a 5-year Cooperative Agreement in September 2013 to support its work to advance 3 novel insecticide candidates to the final stages of development by 2019.

Services Provided:
IVCC is working with private sector industry partners to develop cost-effective alternatives to pyerthroid insecticides for public health use in malaria control. Activities related to insecticide development include testing on lead compounds and selection of alternative chemical classes for consideration. Testing encompasses human and environmental toxicology, biological efficacy, cross-resistance, and stability. In addition, IVCC aims to accelerate market entry for new vector control products.

Malaria Vaccine Development Program (MVDP)

Purpose:
To develop malaria vaccines for use in control programs in the developing world. Through a cadre of partners dedicated to the malaria vaccine development enterprise, MVDP produces candidate vaccines and evaluates them in the laboratory, the clinic, and the field.

Services Provided:
The USAID MVDP has been successful in building strategic partnerships with some of the most capable malaria vaccine groups in the world. Through these partnerships, the program works toward vaccines that attack the parasite both prior to liver infection, in the liver, and in the blood stream using both standard and innovative technologies to acquire key insights into how to overcome the parasite’s evasion tactics.

Special Notes:
MVDP Partners

Walter Reed Army Institute of Research (WRAIR)
Interagency Agreement GHA-T-00-08-00007
Performs preclinical, clinical, and field malaria vaccine research and development with emphasis on vaccines with humoral immune effector mechanisms.

Naval Medical Research Institute (NMRC)
Interagency Agreement (New IAA # TBD)
Performs preclinical, clinical, and field malaria vaccine research and development with emphasis on vaccines with cellular immune effector mechanisms.

National Institute of Allergy and Infectious Diseases (NIAID)
Interagency Agreement GH-T-15-00001
Serves as the international reference center for malaria vaccine growth inhibition assessment (GIA).

Leidos, Inc.
Contract OAA-C-15-00071
Provides support to the MVDP, managing a wide range of research and development projects directed to malaria vaccine development.

MalariaCare

Purpose:
PATH and its partners were awarded a 5-year Cooperative Agreement in September 2012 to support PMI focus or non-focus countries to scale up high-quality malaria diagnosis and case management services for malaria and other childhood illnesses; and to strengthen laboratory diagnostic capacity for malaria and other infectious diseases.

Services Provided:
Under MalariaCare, PATH and its partners will work to improve accuracy of diagnostic testing in the public sector; increase the percentage of suspected malaria patients who received a diagnostic test for malaria; increase the percentage of patients who receive appropriate treatment for malaria or other related illness, consistent with the diagnostic test; and strengthen lab systems at country level for diagnosis of malaria and other infectious disease. PATH’s partners on the MalariaCare project include Medical Care Development International (MCDI), Population Services International (PSI), and Save the Children. MalariaCare offers comprehensive technical support to USAID Missions and national governments to expand high-quality diagnosis and treatment for malaria and other childhood illnesses and infectious diseases. Our services include technical assistance, implementation support, training and capacity-building, policy development, and monitoring and evaluation. The project also contributes to global leadership to advance worldwide malaria control efforts by identifying and sharing innovations and best practices in malaria diagnosis and treatment. The MalariaCare team’s expertise includes laboratory strengthening, malaria diagnosis and treatment, and community-based management of sick children in both the public and private sectors.

Medicines for Malaria Venture

Purpose
The Medicines for Malaria Venture MMV was established in 1999 to build and manage a research and development portfolio capable of leading to the registration of at least one new antimalarial drug every five years. Although partnered with industry, MMV’s focus is on discovery and development of drugs that will be affordable to populations living in malaria endemic areas. MMV manages and directs research and development activities carried out at a broad variety of institutions, comprising 42 academic and pharmaceutical organizations located in 10 different countries. At present, there are 38 candidate anti-malarial agents in MMV’s portfolio, including several completely new therapeutic targets. This portfolio is highly dynamic and managed to accelerate the identification and development of promising candidates and also the recognition and rapid replacement of less promising drug projects.

Services Provided:
Emphasis in the MMV portfolio is being placed on developing drugs and drug combinations that:
- Are effective against drug-resistant strains of P. Falciparum;
- Improve patient compliance with therapeutic regimens of 3 days or less;
- Have a low propensity to select for drug resistance;
- Are safe in young children and pregnant women;
- Have potential for use as intermittent preventive treatment in pregnancy; and,
- Cost of product is no more than $1.00 U.S. per treatment

VectorWorks

Purpose:
VectorWorks project is a comprehensive and innovative program to support countries to achieve and maintain high levels of coverage and use of long-lasting ITNs as well as to facilitate the adoption of proven alternative vector management interventions, including those targeting specific sites or populations.

Services Provided:
The project will build upon previous successful investments in longlasting ITNs and offer state-of-the-art approaches to scale-up additional tools. This agreement goal reflects USAID/PMI’s intent to continue investments in ongoing and new areas of emphasis related to achieving and maintaining high ownership and use of long-lasting ITNs and potentially other alternative vector management interventions that may be identified in the future.

The project is implemented by Johns Hopkins Bloomberg School of Public Health Center for Communication Programs, with its partners: Population Services International, Tropical Health, Tulane University, the Mennonite Economic Development Associates, the Swiss Tropical and Public Health Institute, and the Ifakara Health Institute. The agreement has three objectives:

- Objective 1: Develop and promote policies at both the international and national levels to encourage sustained, high levels of coverage and use of long-lasting ITNs and/or alternative vector management interventions;
- Objective 2: Design, conduct and analyze results from monitoring, evaluation, and operational research activities in order to improve current best practices of long-lasting ITNs and/or alternative vector management interventions; and,
- Objective 3: Promote and support country-level implementation of malaria prevention activities to ensure sustained high level coverage and use of long-lasting ITNs and, as needed, targeted coverage and appropriate use of alternative vector management interventions

Means of Access:
Field Support, Core Funding
Purpose
The global momentum to control or eliminate Neglected Tropical Diseases (NTDs) accelerated dramatically following new and expanded commitments by private and public partners endorsing the London Declaration calls for new efforts to advance research and development. Such research is especially critical for those NTD programs targeting disease elimination.

Many aspects of the research in NTDs are common to all of the current disease-specific NTD initiatives. These disease-specific initiatives of share similar technical approaches and programmatic objectives.

The purpose of this project is to capitalize on the similarity in the different NTD disease-specific approached to promote both efficiency and effectiveness in related operational research (OR) supporting these programs. Critical research priorities have been identified through a series of consultative processes on NTD OR hosted by BMGF and the NTD Support Center (NTD-SC) at the Task Force for Global Health (TFGH). The COR-NTD will define the most important research gaps and unmet needs that can be addressed through coordinated OR.

Services Provided:
• Help focus the NTD research community on its common challenges by creating a network of investigators to identify and prioritize the NTD research needs;
• Define and undertake a coordinated research initiative targeting these prioritized needs;
• Improve the timeliness of the OR response to new challenges identified by NTD country programs;
• Work with the donor community to ensure that support for research is adequate to meet program needs;
• Collaborate with other NTD research efforts (e.g., DFID-funded research); and,
• Harness the comparative advantages of BMGF and USAID in spearheading this initiative.

Delivering a Macrofilaricide to Address Urgent Treatment Needs of Patients Suffering from Onchocerciasis and Lymphatic Filariasis GDA (DNDi)

Purpose:
Filarial diseases cover three debilitating infectious diseases caused by parasitic worms: onchocerciasis (river blindness), lymphatic filariasis (LF, or elephantiasis), and loiasis (African eye worm, or Loa loa). More than 1 billion of the world’s poorest people are at risk and an estimated 128 million people suffer from LF; 47 million with onchocerciasis; and unknown numbers with loiasis.

Programs for the treatment and control of filarial diseases through mass drug administration (MDA) have been in place for over 20 years but have only met partial success. Current drug treatments use microfilaricides, killing only the larvae that mature by passage through an insect vector. While this is effective in reducing transmission treatment, it must be repeated at regular intervals for the life of the adult worm (up to 17 years), making implementation extremely difficult in endemic countries. There is an urgent need for a macrofilaricide, targeting adult worms that can be used for onchocerciasis and LF, particularly in Loa loa co-endemic areas. The purpose of this GDA is to develop a macrofilaricide for use in individual case management and, after appropriate testing, as an alternative preventive treatment in MDA programs.

Services Provided:
The goal of the DNDi Filaria Program is to improve individual patient care and contribute to efforts to treat, control, and eliminate filarial infections by developing a safe, efficacious, affordable, and field-adapted macrofilaricidal drug to treat onchocerciasis and/or LF patients in need. DNDI and partners aim to advance four drug candidates to Phase I clinical testing of safety and tolerability as well as defining maximum tolerated dose for use in efficacy testing.

End Neglected Diseases (END) in Africa: Family Health International 360 (FHI 360)

**Purpose**

Neglected Tropical Diseases (NTDs) affect the health of over one billion people worldwide, with over two billion people at risk, especially among those living in poverty in remote rural areas or urban slums. Children are disproportionately affected and can live with the consequences their whole lives, including severe physical pain, irreversible disability, gross disfigurement, mental impairment, and, in some cases, death.

The purpose of this agreement is to support the control of seven NTDs in Africa. These diseases include lymphatic filariasis (elephantiasis), onchocerciasis (river blindness), schistosomiasis (snail fever), three soil transmitted helminthes (hookworm, roundworm, and whipworm), and trachoma, all of which can be controlled or eliminated in an integrated fashion using cost effective strategies for preventive chemotherapy (PCT) with highly effective drugs, many of which are donated by major pharmaceutical companies.

**Services Provided:**

This cooperative agreement implemented by Family Health International 360 (FHI360) focuses on the expansion of NTD control or elimination programs in African countries. FHI360 provides managerial assistance, supports robust monitoring & evaluation systems, and coordinates reporting of technical progress. FHI360 also provides careful managerial oversight of funds to grantees that have experience implementing integrated NTD control or elimination programs and advanced financial accounting and fiscal management systems. FHI360 provides managerial capacity, organizational skills, a proven track record in managerial technical assistance, and development of streamlined work plans and budgets. FHI360 also has a history of close working collaboration with Ministries of Health and/or Ministries of Education in developing countries. NTD-specific technical direction and decision making under this award will be coordinated directly by USAID.

**Special Notes:**

**Means of Access**

Core Funding
ENVISION

Purpose:
To provide USAID and the Bureau for Global Health with assistance to decrease the burden of Neglected Tropical Diseases (NTDs) that inflict economic, psychosocial and physical damage on the poorest populations of the developing world.

The special focus of this cooperative agreement is the control, and in some cases, elimination, of seven NTDs – lymphatic filariasis (elephantiasis), onchocerciasis (river blindness), schistosomiasis (snail fever), blinding trachoma, and soil-transmitted helminths (hookworm, roundworm, and whipworm) in 19 countries via targeted preventive chemotherapy delivered through mass drug administration. Most of the drugs required are donated through highly successful public-private partnerships with several major pharmaceutical companies.

Led by RTI International and its partners, this project follows and builds on the Neglected Tropical Disease Control Program, USAID’s first NTD project launched in 2006. ENVISION will continue to focus on an integrated approach to deliver NTD treatments to target countries, documenting control and elimination through comprehensive monitoring and evaluation.

Services Provided:
Support host countries to prepare and execute comprehensive country plans for NTDs using preventive chemotherapy and integrated strategies to reduce costs and improve health outcomes by controlling and in some cases eliminating the targeted diseases.

• Issue and manage grants in target countries focused on supporting host country governments to introduce and/or scale up integrated NTD programs;
• Develop global technical tools and guidelines with the World Health Organization to support integrated implementation of NTD programs and dissemination of best practices;
• Provide technical assistance through an on-demand ‘Technical Assistance Facility’; and,
• Coordinate resource mobilization, expertise, NTD-specific technical direction and award decision-making at central level (GH)

Morbidity Management and Disability Prevention for Blinding Trachoma and Lymphatic Filariasis (MMDP)

**Agreement Type:** Cooperative Agreement

**Agreement Number:** OAA-A-14-00054

**Project Number:** 936-6500

**Duration:** 7/1/2014 - 7/31/2019

**Geographic Scope:** Africa

**COR/AOR:** Emily Wainwright

**Telephone:** (571)-551-7373

**Fax:** N/A

**TA:** Angela Weaver

**Activity Director:** Emily Toubali

**Organization:** Helen Keller International

**Telephone:** 202-842-2397

**Website:** http://www.hki.org/

**Email:** etoubali@hki.org

**Purpose**

USAID’s NTD Program is focused on the control, and in some cases, elimination, of seven NTDs through the delivery of preventative drug treatments through mass drug administration (MDA). The Morbidity Management and Disability Prevention (MMDP) Project is a complementary investment, which aims to help countries meet elimination targets for trachoma and lymphatic filariasis (LF) and alleviate the suffering and debilitating effects of these diseases. This will be achieved through the development of tools and best practices for the provision of quality services for the management of the morbidity, disability and disfigurement associated with trachoma and LF.

**Services Provided:**

This project will provide assistance to a subset of countries already supported by USAID’s NTD Program to develop tools and best practices to increase quality and access to MMDP services for LF and blinding trachoma, including surgeries, and assist them in monitoring these interventions. This strategic and complementary investment aims to aid in the achievement of elimination targets and alleviate the suffering of individuals facing the debilitating consequences of blinding trachoma and LF.

**Means of Access**

Core Funding
Onchocerciasis Elimination Program of the Americas (OEPA)

Purpose:
Onchocerciasis, commonly called river blindness, is a blinding disease, with severe economic and social consequences. In Latin America, onchocerciasis was present in 13 foci within six countries: Brazil, Venezuela, Mexico, Ecuador, Guatemala, and Colombia.

To date, Colombia, Ecuador, Mexico, Guatemala have received verification of elimination from the World Health Organization in 2013, and 2014, 2015, 2016 respectively. There are two remaining onchocerciasis foci in the Americas located among the hard-to-reach, indigenous populations in the Amazon region.

The Carter Center’s Onchocerciasis Elimination Program for the Americas (OEPA) works closely with each endemic country's Ministry of Health to eliminate river blindness from the region.

Aimed at eliminating the first parasitic disease from a region, this grant contributes to the public health of the entire Latin American region and meet a key goal within the GHI strategy - the elimination of onchocerciasis in Latin America. It is expected that river blindness in the Americas will no longer plague the population in the next four to five years.

Services Provided:
The Carter Center prepares and executes onchocerciasis elimination activities in each of the six endemic countries;

- In Brazil and Venezuela, OEPA supports the distribution of Merck donated Mectizan® four times per year to hasten elimination in the remote, cross-border Yanomami area;
- Health education, advocacy and awareness of onchocerciasis in all six countries; and
- Maintaining and enhancing national and regional technical coordination and activities, including robust monitoring and evaluation, in all six countries

Challenge TB

**Purpose**
Challenge TB serves as one of USAID’s main country level TB implementation mechanisms. Challenge TB aligns with the WHO post-2015 Global TB Strategy and the new USG TB Strategy to enhance focus on improving patient-centered quality TB services, building local capacity and the utilization of innovations and new technologies to move forward in the global fight against TB.

**Services Provided:**
Challenge TB is implemented by lead partner KNCV Tuberculosis Foundation, and other consortium partners include American Thoracic Society, FHI 360, IRD, International Union Against Tuberculosis and Lung Disease, Japan Anti-Tuberculosis Association, MSH, PATH and WHO. The project provides an array of services to reach, cure and prevent TB under three overarching objectives:

1. Improved access to patient-centered quality TB, drug-resistant TB, and TB/HIV services;
2. Strengthened TB platforms; and,
3. Prevention of transmission and disease progression

Global Alliance for TB Drug Development

Purpose:
The Global Alliance for TB Drug Development (TB Alliance) is a non-profit, public-private partnership with the mission to develop new TB drugs that shorten and simplify treatment, treat MDR-TB and better treat latent infection. The TB alliance was created to address the lack of market incentives that brought research and development efforts for new TB drugs to a virtual standstill after the 1960s.

Services Provided:
As a not-for-profit public-private partnership, the TB alliance links the best practices and drives of the private sector with the health equity priorities and resources of the public sector. This process helps design new ways to leverage worldwide science and market forces for public good. With a sole focus on new TB drug development, the TB alliance has established a strong pipeline of drug candidates. Anticipated developments include:

- Introduction of at least one moxifloxacin-based new treatment shortening regimen to the field and registration globally;
- Movement of a multidrug-resistant TB (MDR-TB) treatment through Phase III trials;
- Development of treatments for drug-resistant TB and drug-sensitive TB.

# Purpose

The purpose of the Stop TB Partnership is to realize the goal of elimination of tuberculosis (TB) as a public health problem, and ultimately to obtain a world free of TB. Its mission is to: (i) ensure that every TB patient has access to effective diagnosis, treatment, and cure; (ii) stop transmission of TB; (iii) reduce the inequitable social and economic toll of TB; and, (iv) develop and implement new preventive, diagnostic, and therapeutic tools and strategies to stop TB. An important partner in USAID’s TB program, this grant focuses on three main areas: 1) Support for the Global TB Drug Facility (GDF) and; 2) Support for key activities of the Stop TB Partnership Secretariat related to priority areas of USAID’s strategy.

## Services Provided:

Global TB Drug Facility (GDF): The GDF is a mechanism of the STB Partnership and is under the direction of the STB Partnership Secretariat. The GDF is the largest supplier of quality-assured patient treatments (first line drugs, second line drugs and pediatric formulations) worldwide in the public sector. GDF is a unique TB medicines procurement mechanism, and also provides technical assistance and innovative tools to countries. This grant supports the work of the GDF, including: monitoring of GDF recipients to assess program performance; rational use of anti-TB drugs; financial flows and drug management; procurement of anti-TB drugs via a competitive bidding process; technical assistance to improve the management of anti-TB drugs; the promotion of fixed-dose combination products; the development and testing of new products such as diagnostic kits; general GDF management and information management and support; the development of a comprehensive advocacy strategy for the GDF to help ensure that it has adequate resources to implement work plan activities.

Support for the STB Partnership Secretariat and other technical areas: The Secretariat supports relations with all the Stop TB partners, and encompasses liaison with current Partners, potential partners and global initiatives (e.g., the Global Fund). In addition, specific initiatives will be supported with a focus on governance, partner engagement, and strategic planning by strengthening support to partnership bodies, including the Coordinating Board, Working Groups, the Challenge Facility for Civil Society, and the Global Coalition of TB Activists (GCTA).

## Means of Access

Core and Field Support
TB Care - II

Purpose:
The purpose of TB CARE II is to establish a mechanism to support USAID operating units in the implementation of their TB control and prevention programs through the introduction and expansion of the components of the WHO-recommended STOP TB Strategy and contribution to the overall USAID goal and objectives in select countries by 2015. This award is a follow-on mechanism to TB CAP.

Services Provided:
TB CARE II, implemented by University Research Corporation (URC), in partnership with Project Hope, Partners in Health (PIH), and Jhpiego, will work in two key areas:

- Technical Assistance. Provide short and long-term technical assistance to USAID Missions and Regional Platforms in implementing and scaling-up priority interventions in accordance with the STOP TB Strategy and future longer-term plans. TB CARE II will respond to the global TB epidemic by providing well-coordinated state-of-the-art, context appropriate, technically sound and cost-effective consultation and technical assistance to high-prevalence countries and Missions. TB CARE II will engage experts in all aspects of TB control, including strengthening DOTS, programmatic management of drug resistant TB (and extensively drug resistant TB – XDR TB), improving laboratory capacity, infection control, and TB/HIV-AIDS collaboration.; and,
- Global Technical Leadership, Support Bureau for Global Health core programs and further USAID global technical leadership in TB control by focusing on catalytic activities and approaches to scaling-up the STOP TB Strategy. Activities will complement and expand existing global TB control efforts by working in collaboration with other global TB partners and maximize on-going efforts to accelerate the pace of DOTS expansion to meet global targets, including programmatic management on drug-resistant TB.

Purpose
The TB Communications Award provides communications services to assist the USAID TB Team in describing its work to a variety of audiences.

Services Provided:
LRG provides communications and publishing services to effectively describe the work of the TB Team to a variety of audiences. By designing and producing reports, creating media materials and executing events, the TB team’s efforts can reach a wider audience thereby making a bigger impact. The needs of the team include publications such as an annual report to Congress, implementation of a communications plan for World TB Day, materials for other TB events throughout the year, and the production of media materials. The contractor works with the TB team to strategically plan for new ways to better communicate USAID’s efforts.

TREAT TB

Purpose:
Technology, Research, Education and Technical Assistance for Tuberculosis (TREAT TB) is a cooperative agreement with the International Union Against Tuberculosis and Lung Disease (IUATLD), also known as The Union. TREAT TB focuses on field evaluations of diagnostic techniques for TB, clinical trials and operations research to improve patient management, treatment efficacy, disease prevention, and infection control measures for TB and MDR TB. TREAT TB also provides field support to address key TB and TB/HIV issues through operational research to improve the national TB program’s performance.

Services Provided:
This agreement will promote programatically relevant research in the focus countries of the TB element and can accept field support funds from any mission with TB funds for technical assistance related to operational research. The primary interventions will include:

• Field evaluations of new/adapted diagnostic tools and translational research to continually update the globally-recommended diagnostic algorithm;
• Operational research to overcome constraints to implementing or introducing current and new tools/approaches;
• Clinical trials to improve MDR-TB patient management, treatment efficacy, and disease prevention;
• Technical assistance to USAID missions for the design and implementation of field trials of new tools and operational research to address programmatic constraints; and,
• Evaluation research to monitor the impact of new tools and approaches.

Health and Emergency Response Support (WHO: Polio, Immunizations, CS, ID)

Purpose
- To implement activities to eradicate polio;
- Improve immunization services; and
- Improve disease surveillance.

Services Provided:
This grant supports activities implemented through WHO country, regional and
headquarter offices in support of polio eradication in the context of strengthening
immunization and disease control programs. The grant supports USAID’s five-
part polio eradication strategy:
- Partnerships between all interested public and private sector parties;
- Routine immunization and immunization systems: cold chain
refurbishment/management;
- Logistics, vaccine forecasting, planning and budgeting at the district and
national levels;
- Supplemental immunization, operational support to National Immunization
Days, social mobilization, house-to-house mop up immunization;
- Surveillance and case detection for AFP and other reportable diseases; and,
- Information feedback and use.

WHO Consolidated amendments

Tentative deadlines for the submission of final program descriptions and for funds
to be committed in the Field Support Database. Please contact the AOR and
activity manager for confirmation of the submission deadline.

- December 1, 2016
- April 3, 2017
- June 1, 2017

Special Notes:

Means of Access
Core and Field Support
Health and Immunization Response Support (NGO’s: Polio Eradication, Immunization)

**Purpose:**
To increase PVO participation in polio eradication and immunization, increase linkages between polio eradication and other health services, and improve case detection of acute flaccid paralysis (AFP) and other reportable diseases in underserved or hard to reach populations, including cross-border and transit populations. The project will continue its work in India, Angola, Ethiopia, Nigeria and regionally in the Horn of Africa. One additional country and/or expansion of services in the current countries could be considered if there are sufficient field support resources.

**Services Provided:**
The CORE Group Polio Project, originated as a subset of the 50+ member organizations of the CORE Group, Inc – a network of partners to generate collaborative action and learning to improve and expand community-focused public health practices for underserved populations around the world. World Vision is the primary recipient and coordinates the work of 10 US-based NGOs and 18 local NGOs who extend the projects to especially hard-to-reach and marginalized locations in each country and across borders. This agreement allows the project to expand its linkages with other health services using nonpolio funds to extend the knowledge, skills and community engagement developed for polio eradication.

This agreement strengthens the network and builds upon ongoing field programs of CORE members. This cooperative agreement supports:
• Community-based case detection/reporting strategies for polio and other vaccine preventable diseases;
• Community Mobilization and Interpersonal Communications for polio, immunization and other health services;
• Monitoring and Evaluation of polio immunization campaigns;
• Microplanning, Training, community mapping, baby tracking, cold chain monitoring cross-border coordination and emergency outbreak response;
• Information dissemination about polio eradication and lessons from community-level engagement; and,
• Participation of PVOs in interagency committees and subnational planning events and supplemental immunization activities (NIDs, SNIDs, mop-up).

**Health and Immunization Response Support (UNICEF Polio, EPI Grant)**

**Purpose**
To implement activities designed to improve polio eradication efforts and routine immunization. Other MCH activities, e.g., Integrated Management of Childhood Illness (IMCI); micronutrient fortification and supplementation programs (specifically iodine and vitamin A) are supported under a separate agreement.

**Services Provided:**
This grant funds activities implemented through UNICEF’s country, regional and headquarter offices in support of a wide range of MCH interventions. Country-specific proposals are needed to define the activities to be conducted in support of national programs and USAID mission strategic plans. In general, activities can focus on improving service delivery, planning and training, monitoring and evaluation, advocacy and communications, limited equipment procurement (e.g., cold chain) and policy development.

Global Health Supply Chain – Procurement and Supply Management (GHSC-PSM) – Maternal and Child Health Task Order 4

Purpose:

The purpose of this Task Order is to:
Improve the provision of quality-assured health commodities through global commodity procurement and logistics.
Provide technical assistance focused on systems strengthening to improve country supply chain and increase commodity security.
Improve coordination among global Maternal and Child Health (MCH) and supply chain stakeholders to strengthen the collective response to maternal, newborn, and child health related programs.

Services Provided:

In order to ensure the availability of MCH commodities to clients, GHSC-PSM Task Order 4 will support in-country supply chain technical assistance through the following objectives:

1: Strengthened MCH commodity systems in country, with priorities including:
   - Transparent financial flows
   - Data collection, visibility and use in decision making
   - Integrated supply chain

2: Increased access and appropriate use through sustainable delivery of and demand for MCH commodities and pharma services, with priorities including:
   - Global adoption of standardized regimens and guidelines to improve uptake at country level
   - Demand creation for approved treatments

3: Ensured supply of quality assured MCH commodities, with priorities including:
   - Increased visibility and coordination of effort among partners
   - Increased linkages between wholesalers, manufacturers and procurers
   - Scale-up of underused or new commodities

Across these objectives, GHSC-PSM Task Order 4 will aim to improve linkages between global efforts, country activities, and service delivery projects.

Office of Maternal/Child Health and Nutrition (MCHN):

Maternal and Child Survival Program (MCSP)

Purpose
The Maternal and Child Survival Program (MCSP) program is a $560 million cooperative agreement designed to support the introduction, scale up and sustainability of high-impact reproductive, maternal, newborn, and child health (RMNCH) interventions. The MCSP program will advance USAID’s goal of Ending Preventable Child and Maternal Deaths through provision of tailored technical assistance within countries to meet the specific priorities and contextual needs of local RMNCH programs and engagement in high-level technical and policy dialogue at the global level.

Services Provided:
- Support countries to increase coverage and utilization of evidence-based, high-quality RMNCH interventions at the household, community and health facility levels-integrating with nutrition, malaria, HIV/AIDS, and water, sanitation and hygiene (WASH) interventions as appropriate
- Strengthen civil society, local institutions and communities and engage at the global, regional, national and local levels to improve accountability and enhance responsiveness of health systems to local and community health needs
- Foster effective policy, action-oriented learning, and accountability for improved RMNCH outcomes across the continuum of care
- Close innovation gaps to improve RMNCH outcomes through engagement with a broad range of partners
- Apply gender- and equity-focused approaches at scale to improve MCSP service availability, access, quality, demand, cost-effectiveness and utilization

The MCSP partnership includes Jhpiego as the prime partner; lead partners: Save the Children Federation, Inc. (SC), John Snow, Inc. (JSI), ICF International, Results for Development Institute (R4D), PATH, and Population Services International (PSI); and associate partners: Broad Branch Associates, CORE Group, Johns Hopkins Bloomberg School of Public Health (JHSPH), Communications Initiative (CI), and Avenir Health.

Means of Access
Core and Field Support
Purpose:
The purpose of the Accelerate Task Order is to enhance USAID’s ability to carry out effective, evidence-based behavior change programming in the highest-priority health areas that affect the main causes of preventable child and maternal mortality in EPCMD priority countries. Task Order 2’s overarching Strategic Objective is to identify, apply and diffuse new evidence-based behavior change practices and interventions.

Task Order 2 is not to develop and test new social and behavior change methods and approaches but rather to identify and apply innovative and existing social and behavior change methods and approaches, which may be new to USAID and/or the field of international health, resulting in notably improved health impact and measurement.

Services Provided:
1: Increase national and Mission-level support for accelerator behavior programming through an electronic platform that shares accelerator behavior data, materials, and methods.

2: Identify and apply efficient, innovative, and widely applicable behavior change tools and methods for the accelerator behaviors and make these tools and methods available for use across USAID Missions.

3: Develop efficient, innovative, and widely applicable real-time tracking and monitoring and evaluation (M&E) behavior change tools based on thorough analysis of underlying social determinants that will be available for use across USAID Missions.

4: Provide technical assistance to Missions on an as-needed basis around incorporating accelerator behavior programming into their health portfolios.

UNICEF MCH Umbrella Grant

**Purpose**
To implement activities designed to improve MCH through a wide range of interventions including Integrated Management of Childhood Illness (IMCI), micronutrient fortification and supplementation programs (specifically iodine and vitamin A), early newborn care, and WASH.

Note: Areas not covered under this grant are Polio eradication, immunization activities, and commodities for Malaria control, under separate agreements with UNICEF.

**Services Provided:**
This grant funds activities implemented through UNICEF’s country, regional and headquarter offices in support of a wide range of MCH interventions. Country-specific proposals are needed to define the activities to be conducted in support of national programs and USAID mission strategic plans. In general, activities can focus on improving service delivery, planning and training, monitoring and evaluation, advocacy and communications, limited equipment procurement (e.g., cold chain) and policy development.

**Special Notes:**
UNICEF Umbrella Grant amendments

Tentative deadlines for the submission of the final program descriptions and for funds to be committed in the Field Support Database. Please contact the AOR and activity manager for confirmation of the submission deadline. Please note that Program descriptions are routed through your UNICEF country office to UNICEF’s Public Partnerships Division (PPD) in NY for review and then UNICEF PPD will submit the final version to the USAID AOR for inclusion into the next amendment. Please plan accordingly in order to meet these deadlines.

- December 1, 2016
- April 3, 2017
- July 14, 2017

**Means of Access**
Field Support, Core Funding
Purpose:
The Interagency Agreement (IAA) with Peace Corps allows USAID to access technical assistance from Peace Corps, recognizing the unique and meaningful contribution Volunteers make in remote locations all over the world. The overarching goal of the partnership is to reduce maternal, newborn and child mortality. It is centered on the promotion of key accelerator behaviors selected because they have low uptake yet profoundly impact a major cause of child and/or maternal mortality. In order to achieve progress toward this goal, Peace Corps and USAID have identified collaborative opportunities and mechanisms that can be leveraged to support and strengthen in-country projects and activities, specifically around individual and community behavior change interventions for newborn, child and maternal health.

Services Provided:
Specific workplans and activities will be developed with missions and field offices. Illustrative activities may include:
- Training -- Workshops and Conferences
- Information Development and Dissemination/Knowledge Sharing
- Staff, Travel, Admin Support
- Third-Year Volunteer Activities (dedicated to EPCMD)
- Assessment, Evaluation, Project Development

Missions can access the IAA through field support for technical assistance.

**Purpose**

The Voice of America (VOA), a dynamic multimedia broadcaster funded by the U.S. Government, broadcasts accurate, balanced, and comprehensive news and information to an international audience. VOA provides a wide range of programming for broadcast on radio, TV and the internet outside of the U.S., in 43 languages. Since 1997, the Office Health, Infectious Diseases, and Nutrition (HIDN) has partnered with VOA/IBB in order to promote health communications and behavior change for child survival, train journalists, conduct townhalls, etc.

The success of the VOA/IBB IAA is measured in terms of audiences reached by airing health programs by both TV and Radio, in-country training for health journalists, and costs. With a worldwide audience of over 100 million listeners, VOA has produced over 40,000 health reports on polio, malaria, HIV/AIDS, TB, reproductive health and drug resistance over the past decade. Broadcasters have aired reports in over 30 languages.

The inter-agency Agreement with USAID leverages VOA’s core strengths in broadcasting, program development, town halls and training; while also developing local capacity, showcasing local voices and keeping transaction costs low.

Evidence also demonstrates the great potential of new information and communication technologies in increasing community knowledge and influencing community norms and encouraging community participation in health awareness activities. Community participation and knowledge remain the main drivers to increase demand and use of health services.

VOA can play an important role in creating the demand for health services such as immunization, insecticide treated nets and for malaria control services, and that has to be done by raising awareness and community knowledge about the means of preventing and treating major causes of childhood illnesses.

**Services Provided:**

The IAA is designed to carry out collaborative activities with international and national broadcasters and journalists in support of project development, implementation, monitoring and evaluation of health communications and education for USAID’s programs, especially for efforts concerning maternal health, child survival, HIV/AIDS, tuberculosis, malaria, the worldwide effort to eradicate polio and other important health issues.

Core and Field Support
Ending Eclampsia

Purpose:
The purpose of the Ending Eclampsia project is to increase and expand effective and under-utilized approaches to overcome persistent implementation challenges in the prevention and treatment of pre-eclampsia and eclampsia. Bolstering coverage of high impact interventions for PE/E will involve contributions to the development of knowledge, evidence, advocacy, tools, materials, services, and technical assistance.

Led by Population Council, the strategic objective of the project is to prevent and treat pre-eclampsia and eclampsia by improving the early detection and management of PE/E including increasing the use of magnesium sulfate, an underutilized RMNCH priority commodity.

Services Provided:
To achieve the strategic objective, the project will:

• significantly expand services in selected MCH priority countries for detecting and managing pregnant women at risk of PE/E through increased awareness, access, and use of key commodities alongside other effective interventions;
• promote introductory and scale-up strategies in selected MCH priority countries for these effective interventions designed with policy and health system analyses;
• conduct implementation research to assess and validate the PE/E intervention package;
• strengthen local capacity through engagement with national MoHs, Ob/Gyn and midwifery leaders, university teaching hospitals, legislative boards, professional associations, and community organizations; and,
• share lessons learned in national, regional, and global knowledge management (KM) platforms to inform strategies for introducing, monitoring, and scaling up PE/E interventions and advancing the global agenda.

Special Notes:
The organization implementing this project is Population Council. For more information on Ending Eclampsia, please visit http://www.endingeclampsia.org/

Means of Access:
Core and Field Support
**Purpose**

Fistula Care Plus aims to strengthen health system capacity for fistula prevention, detection, treatment and reintegration in Sub-Saharan Africa and South Asia. Building on the learning and accomplishments of the global Fistula Care Project (2007-2013), the new project will increase emphasis on country ownership and public-private partnerships to enhance the sustainability of country programs and in selected settings will also address pelvic organ prolapse.

**Services Provided:**

- Strengthen policy and the enabling environment to institutionalize fistula prevention, treatment and reintegration;
- Strengthen maternal health and family planning services in the public and private sectors to support fistula prevention and treatment;
- Enhance community understanding and practices to prevent fistula, improve access to fistula treatment, reduce stigma, and support reintegration of women and girls with fistula;
- Reduce transportation, communications and financial barriers to accessing preventive care, detection, treatment and reintegration support; and,
- Strengthen the evidence base for approaches to improve fistula care, and scale-up application of standard monitoring and evaluation indicators for prevention and treatment.

**Fistula Care Plus Implementing Partners**

Fistula Care Plus is implemented by EngenderHealth (prime) with core partner Population Council and other partners Dimagi, TERREWODE, Direct Relief, the Fistula Foundation and the Maternal Health Task Force.

Prevention and Management of Preterm Birth and Low Birth Weight Complications: Every Preemie – SCALE (EP-Scale)

**Purpose:**
The purpose of EP-Scale is to reduce newborn mortality by focusing on the evidence, advocacy, and catalytic efforts needed to increase use and coverage of critical and under-utilized interventions to prevent and manage pre-term birth and low birth weight complications (PTB/LBW).

In line with USAID’s newborn program focus on tackling the major causes of mortality through community-based approaches, quality improvement, implementation research, and policy advocacy, EP-Scale will catalyze global uptake of PTB/LBW interventions, overcome bottlenecks, and significantly increase coverage to ultimately improve RMNCH outcomes while decreasing newborn mortality. Led by Project Concern International, the EP-Scale partnership also includes the American College of Nurse Midwives, and the Global Alliance for Prevention of Prematurity and Stillbirth.

**Services Provided:**
To achieve the strategic objective, the project will

- improve translation of evidence into action through consolidation of evidence and focused implementation research;
- convene a global technical working group on PTB/LBW implementation challenges and solutions;
- increase capacity of local, national, and global entities (health care providers, community groups) to scale-up and sustain the utilization of high impact interventions;
- increase national and global awareness and rapid uptake of PTB/LBW interventions through the provision of core packages of support which include tools, modules, analyses, surveys, targeted technical assistance, and other forms of support; and.
- increase prioritization of PTB/LBW with in-country decision and policy makers and other relevant stakeholders at global and national levels.

Purpose
The Child Blindness Program (CBP) is implemented by Partners for Global Research and Development (PGRD), a Small Business Administration (SBA)-approved mentor/protégé Joint Venture. This five-year program, implemented through a congressionally-mandated child blindness directive, features prominently in USAID’s multi-faceted approach to eradicate preventable blindness and improve delivery of quality eye care.

PGRD works with USAID GH to fund, select, and support U.S.-based and non-U.S.-based organizations. Through a competitive process, organizations receive grants that expand the delivery of quality eye care services to children and other vulnerable populations with limited access to sight-saving services.

Goals include:
1. Deliver and expand coverage of quality eye care services for children in underserved communities; and,
2. Increase global knowledge base on best practices and innovative approaches for pediatric eye care programs.

Services Provided:
CBP meets its objectives by awarding grants in the following two categories:
1. Delivery and Expansion: intended to support capacity building and improve increased accessibility and availability to quality vision services for children and other vulnerable groups.
Innovation and Knowledge: intended to generate innovations in the field of pediatric eye care research, sharing of lessons learned, documentation of best practices, and evidence for concepts detailed in the CBP Learning Agenda.

Core Funding, Directive from Congress
Food and Nutrition Technical Assistance III (FANTA-III)

**Purpose:**
FANTA-III is a USAID cooperative agreement designed to strengthen food security and health policies, programs and systems for improved nutrition. FANTA-III provides technical support to USAID and its partners, including host country governments, international organizations and implementing partners. Focus areas for technical assistance include maternal and child health and nutrition, nutrition assistance for HIV and other infectious diseases, community-based nutrition programs, nutrition in emergencies, food security and livelihood strengthening, resilience and vulnerability. FANTA-III develops and adapts approaches to support the design and quality implementation of field programs, while building on field experience to build and expand the evidence base, strengthen capacities to implement quality programming and strengthen and promote global standards for nutrition and health programming to improve nutrition.

**Services Provided:**
FANTA-III’s field support activities provide targeted, specialized technical assistance and training activities to support nutrition and food security programming strategies, early warning and response systems to nutrition emergencies, and monitoring and evaluation (M&E) for Title II and other USG programs; integrate nutrition services into national health systems (e.g., Community-Based Management of Acute Malnutrition (CMAM), Nutrition Assessment, Care and Support (NACS) for People Living with HIV); strengthen and improve community-based nutrition programming; support development of nutrition-related national policies and guidelines; support quality assurance/quality improvement of nutrition programming; and support improved nutrition and food security programs in other priority areas as needed. FANTA-III’s global leadership activities support advances in methods and tools that promote program quality; increase capacity to deliver effective services at scale; strengthen international, USG, country government and implementing partner capacity to design, deliver, monitor, improve and demonstrate effectiveness and impact of USAID-assisted food security and health programs for improved nutrition; develop and refine indicators measuring household and individual food security and diet quality; build the evidence-base on the impact of lipid-based nutrient supplements (LNS); adapt data sampling methodologies for cost-effective M&E; and develop methods and tools for quality assurance/quality improvement, beneficiary screening and targeting, and cost analysis for program planning and implementation.

Purpose
SPRING is a USAID cooperative agreement designed to provide global technical leadership to support scale-up of country-specific nutrition programs and to advance the global evidence-base, advocacy platforms, and policies for nutrition. SPRING provides technical assistance to USAID and its partners, including host country governments, international organizations, and NGO implementing partners. SPRING develops and adapts approaches to accelerate action on nutrition policies; builds the capacity of countries to design, implements and evaluates nutrition programs, builds the evidence base for multi-sectoral nutrition actions; promotes effective delivery of a core package of nutrition interventions; and emphasizes country-specific approaches to scale up nutrition programs. Focus areas for technical assistance include maternal and child health and nutrition, preventing anemia, catalyzing social and behavior change, strengthening systems for nutrition, integrated agriculture and nutrition programming, HIV/AIDS, and community-based nutrition programs.

Services Provided:
SPRING builds on past USAID investments in nutrition and aims to deliver high impact nutrition interventions that improve maternal, infant and young child nutrition (MIYCN) to reduce stunting and micronutrient deficiencies, focusing predominantly on the 1,000 days window of opportunity (from pregnancy through to a child's second birthday). SPRING provides technical assistance at the country and global level to:
- Strengthen and scale-up country-specific Social and Behavior Change Communication (SBCC) programs;
- Strengthen country-led efforts to reduce maternal and child anemia;
- Support and improve systems for nutrition;
- Leverage links between agriculture and nutrition;
- Advance country-specific approaches to improve dietary diversity and quality;
- Support country-specific scale up of evidence-based nutrition interventions;
- Strengthen policy and advocacy efforts to support food and nutrition policies and programming; and,
- Expand evidence-based learning, monitoring and evaluation for effective approaches to scale up nutrition services.

The Global Alliance for Improved Nutrition (GAIN)

Purpose:
The Global Alliance for Improved Nutrition (GAIN) is an international organization that promotes nutrition-based solutions to address undernutrition among those most in need. GAIN was created at a special UN session for children in 2002. Currently, GAIN receives funding from the U.S. Agency for International Development, the Bill and Melinda Gates Foundation, the government of the Netherlands, the Children’s Investment Fund Foundation, and a number of private and charitable groups.

With this support, GAIN is funding fortification programs in 30 countries around the world, as wheat flour fortification in Tajikistan and other Central Asian Republics; and wheat flour and oil fortification in Afghanistan and Pakistan. GAIN also manages the initiative of Marketplace for Nutritious Foods in Mozambique, Kenya, and Rwanda. This initiative provides small grants and technical assistance to local industries to promote the manufacturing of nutritious foods.

Services Provided:
The Global Alliance for Improved Nutrition activity provides the following services:
• Support to selected countries working on the Feed the Future Initiative to strengthen private-public partnerships to improve nutrition in agriculture, food and nutrition sectors;
• Competitive grant-making to developing countries through a proposal review process;
• Technical assistance on the design, implementation and evaluation of food fortification programs;
• Create national and regional Business Alliances of leading companies;
• Performance measurement and monitoring of food fortification program; and Communications, including global advocacy, corporate communications and social marketing technical assistance.

WASHPaLS: Partnerships and Learning for Sustainability

**Purpose**

WASHPaLS builds on the Agency’s 30-year legacy of technical leadership in the WASH sector and commitment to Ending Preventable Child and Maternal Deaths by providing targeted technical assistance to USAID missions to strengthen their WASH programming and achieve the greatest health impact, sustainability, and scale from US government investments.

**Services Provided:**

- Delivery of tailored short-term technical assistance to USAID missions in the areas of water, sanitation, hygiene behavior change, monitoring, and evaluation.
- Execution of an operational research agenda to address key evidence gaps related to CLTS, market-based sanitation and hygienic play spaces for young children.
- Results disseminated through peer-reviewed publications, presentations, webinars, and knowledge products. A functioning Information and Communication Technology tool to support implementation and monitoring of Community Led Total Sanitation.
- Disbursement of 10 small grants to investigate innovative ideas in WASH behavior change programming and an assessment of these approaches in expanding the adoption of key hygiene behaviors.
- Application of the learning generated by WASHPaLS by USAID missions, national governments and implementing partners.

**Special Notes:**

WASHPaLS is led by Tetra Tech and implemented in collaboration with a cadre of distinguished NGOs and small-business partners: Aquaya Institute, FHI360, FSG and Iris Group with expertise in state-of-the-art WASH programming and research. Distinguished academics, practitioners and policy makers from across the WASH sector provide expert perspectives to the project through an internal research committee and an external ODF Advisory Board.

Core and Field Support
Child Survival and Health Grants Program (CSHGP)

Purpose:
The CSHGP facilitates a dynamic partnership between USAID and private and voluntary organizations (PVOs)/NGOs through an active portfolio of 6 PVO/NGO projects in 4 countries (Catholic Relief Services, Benin; MCDI, Benin; Health Right International, Kenya; Concern Worldwide, Kenya; Concern Worldwide, Sierra Leone; Save the Children, India). Through the CSHGP, USAID leverages the development entrepreneurship and “know how” of PVOs/NGOs and their local partners for innovative and effective community-oriented programming that sustainably improves maternal, newborn and child health (MNCH) outcomes, strengthens local and community health systems, and contributes to reductions in morbidity and mortality. PVOs/NGOs, with their local partners (national and local MOH, local NGOs/CBOs, communities), implement in a range of settings, from remote communities in a single district to multiple districts or a province. Projects address critical health needs of vulnerable populations and work strategically with a systems approach at the household, community, health facility, and policy levels and strengthens linkages as relevant. The CSHGP portfolio contributes to advancing evidence and learning to strengthen the engagement of community and civil society to support USAID’s goals and strategies in health, including ending preventable child and maternal deaths, both in priority countries and globally through the Maternal and Child Survival Program*, including the CORE Group network of more than 70 NGOs and affiliates.

Services Provided:
Cooperative Agreements support:
Integrated packages of high impact maternal, newborn, and child health and nutrition interventions delivered through strengthened community and health systems.
Local capacity building of the governments, local NGOs and civil society actors at the sub-national level towards local ownership and sustainability.
Action-oriented learning for innovative community-oriented solutions through implementation science platforms including: operations research through new partnerships between PVOs/NGOs, research institutions, and local/national governments to promote utilization of evidence and lessons; strengthening of routine monitoring and evaluation systems; and participatory project evaluations conducted by external evaluators.
Global evidence building and learning for promising community-oriented solutions capable of achieving health and development impact in poor and marginalized communities through standardized population-based data and documentation of processes across CSHGP projects.

Means of Access:
Field Support
Purpose
The CIRCLE Task Order supports the Health Research Program in its efforts to implement/facilitate systematic research-to-use activities to advance USAID priorities including Ending Preventable Child and Maternal Deaths, achieving an AIDS-Free Generation, and protecting communities from infectious diseases.

In support of the research-to-use pathway, CIRCLE provides strategic planning, stakeholder engagement, targeted research and analysis, knowledge management and collaborative learning, and research translation. The project also coordinates efforts across the Health Research Program portfolio, including a cooperative agreement and anticipated awards resulting from Broad Agency Announcements (BAAs).

Services Provided:
Activities under CIRCLE span programmatic, technical, logistical and administrative support. Specific tasks include:

- Convening and facilitating meetings, including to support the BAA co-design process
- Facilitating internal and external knowledge management to support dissemination and utilization of research findings
- Conducting or commissioning targeted research and analysis
- Developing a database of subject matter experts with expertise in research and evaluation, knowledge management, research translation and scientific writing
- Establishing and moderating a Community of Practice in support of implementation research

Engaging key stakeholders from LMICs, including FSNs, through collaborative research and research utilization efforts

Health Evaluation, Research and Development (HERD)

Purpose:
The Health Evaluation, Research and Development (HERD) Project undertakes research efforts that accelerate the achievement of USAID health and development goals as envisioned within Agency initiatives including EPCMD, AFG and Protecting Communities from Infectious Diseases and other health threats. The project aims to contribute to the reduction of mortality, morbidity, and infectious diseases threats in newborns, children, and women through successful research and development, introduction, sustained utilization, and progress to scale of new or refined products, technologies, tools, interventions and research-to-use systems.

Services Provided:
The HERD Project carries out two types of research activities:

-Multidisciplinary applied and implementation research and related activities that accelerate the research-to-use process focusing on targeted questions, barriers, and bottlenecks related to high priority interventions, technologies, policies and products that show promise or are ready for scale-up
- Evaluative research and post-marketing like surveillance of pilot programs and at-scale tools, technologies, interventions and policies around the main causes of maternal, child and neonatal deaths and morbidity

Integrating Community Health

Purpose

Through the Integrating Community Health Program Annual Program Statement, USAID, in collaboration with UNICEF, supports governments and their key partners to achieve and sustain effective coverage of high impact health and nutrition technical interventions at scale by strengthening the role of a broad range of promising community approaches in health and local systems. This collaboration supports and strengthens the essential role of communities in national and local policies and implementation plans to End Preventable Child and Maternal Deaths and achieve the Sustainable Development Goals by:

• Sustaining and scale up community health approaches within national plans for health systems strengthening;
• Strengthening collaboration between governments and non-governmental actors with a focus on community health; and,
• Building evidence and learning to advance the field of community health and primary health care globally.

Services Provided:

The Integrating Community Health APS expands partnerships and leverages new resources to support countries to address the following areas of need:

• Institutionalization: Develop effective and efficient linkages of community health approaches in systems, policies, and plans (health, other relevant sectors; local and national);
• Measurement to Influence Systems and Policies: Generate and use new data and knowledge for decision making to influence local and national systems and policies (e.g., scale, equity, accountability); and,
• Inclusive and Effective Partnerships: Improve coordination and collaboration between government and non-state actors (civil society, private sector).

The Integrating Community Health APS supports a range of proven or promising community health approaches that strengthen community engagement and capacity to collaborate with health and other local systems in order to improve:

• Service delivery (e.g., equitable access, quality, demand);
• Delivery oversight, governance, and accountability; and,
• Community empowerment and voice for health and development.

Core and Field Support
Translating Research into Action (TRAction) Project

Purpose:
The Translating Research into Action (TRAction) project supports implementation research and delivery science to provide critically needed evidence to program implementers and policy makers on how to implement new and proven health interventions at scale and across different contexts to reduce mortality and severe morbidity in women, newborns and young children. There is a preponderance of evidence on the potential impact of specific maternal, neonatal and child health interventions yet the successful implementation and scale-up of these in countries remains a challenge. TRAction will address this knowledge gap by managing research, introduction and evaluation activities on how to effectively deliver, increase utilization, achieve coverage, and scale up evidence based newborn, child, maternal and integrated MNCH health and nutrition tools, approaches, interventions and policies that are relevant to field programs.

Services Provided:
The Translating Research into Action (TRAction) Project:
• Solicits applications, awards and manages sub-awards on research, evaluation and introduction activities. This includes, but is not limited to:
  - Working with USAID/GH and/or USAID Missions to determine the scopes of all solicitations and the selection criteria to be used in all procurements;
  - Leading and/or participating in the technical review process;
  - Conducting cost analyses and determine whether potential grantees meet financial and other criteria to receive USAID funds;
• Monitors and provides ongoing technical, programmatic and financial oversight of sub-awards;
• Conducts landscape analysis of research and program activities, undertakes evidence reviews and synthesizes research knowledge;
• Disseminates research results; and,
• Supports efforts to translate research results and undertakes selective introduction activities. Harvard School of Public Health is a partner on this agreement.

**Global Health Program Cycle Improvement Project (GH Pro)**

**Purpose**
The GH Pro contract provides USAID operating units working on health-related activities in headquarters and the field with the short and medium-term technical services. It is a follow-on contract to the 5-year GH Tech Project and GH Tech Bridge contracts I-V. For more information please visit our USAID Google Site: [https://sites.google.com/a/usaid.gov/gh-pro/](https://sites.google.com/a/usaid.gov/gh-pro/)

**Services Provided:**
GH Pro provides consultants for:

- Technical assistance: Individuals and teams for strategic planning, project design, assessments/analytical work and other types of technical assistance.
- Mission/staffing support: Managerial and technical support for short-term and medium-term assignments (up to 6 months) to fill gaps from temporary absences and provide surge capacity.
- Logistical support for meetings/conferences: Assistance for planning, organizing, and implementing meetings, conferences, workshops, and other events.
- Evaluation: Performance assessment and evaluation services through independent consultant teams. Typically appropriate for examining a single activity (mechanism).

Knowledge Management Services II (KMS II)

**Purpose:**
The purpose of the KMS II task order is to provide Knowledge Management Services that enhance USAID capacity to manage and evaluate its programs, and to demonstrate and to document the importance and impact of its global health portfolio.

The Task Order has two main functional areas:
1. Data Analysis, Management, and Reporting; Information Dissemination; and Evaluation Planning and Analysis; analysis of health program and financial data and the production of related reports to support senior-management decisions and investments, to comply with Congressional reporting requests and requirements, to inform external audiences of USAID health programs, and to provide support in designing complex program and impact evaluations.
2. Systems Development, Operation, and Maintenance: maintenance of existing data bases and other IT-based resources including the Global Health Bureau's content on internet and intranet sites, the development of new systems and/or data bases, the introduction and application of new IT tools, and the promotion of practices to provide better access to and sharing of information and knowledge to help guide the design and management of USAID health programs.

**Services Provided:**
KMS II provides services to all offices of the Bureau for Global Health and is able to accept funds from all GH Elements and all GHCS funds from other USAID operating units. This activity can also accept non-health funding for support to a range of services in conjunction with Health programs. Services include:

- Use of a broad range of data sources and advanced analytic methods to ensure accurate, robust analyses;
- Systematic examination of links between health indicators and socioeconomic and governance data that help explain indicator trends and identify program gaps;
- Information system designs that allow for the integration and accessibility of information sources;
- Information dissemination products, such as "Success Stories" and "Best Practices" that incorporate analysis results;
- Educational and public information functions such as conferences and briefings.

Purpose
MERLIN is a USAID endeavor led by the U.S. Global Development Lab and in partnership with the Bureau for Policy, Planning and Learning and the Bureau for Global Health. It aims to source, co-create and co-design development solutions that innovate on traditional approaches to monitoring, evaluation, research and learning (MERL).

Services Provided:
MERLIN is comprised of several different mechanisms, each with its own specialty. The MERLIN team can help you select among the options.

The Developmental Evaluation Pilot Activity (DEPA-MERL) will test the effectiveness of a developmental evaluation approach, as well as accompanying monitoring and evaluation tools and flexible contracting mechanisms, in achieving effective programming for innovative interventions, untested theories of change, and/or implementation in complex contexts. Partners: Social Impact (prime), Search for Common Ground, The William Davidson Institute at the University of Michigan.

Rapid Feedback MERL is a collaborative approach to learning and adapting. Improved data capture and compressed feedback loops provide decision-makers with timely, actionable evidence. Design and implementation decisions can be optimized to maximize chances of impact and improve prospects for long-term success. Partners: Results for Development Institute (prime), Abt Associates Inc., Mathematica Policy Research, Notre Dame Initiative for Global Development.

SPACES MERL aims to bring a variety of tools and methodologies that decision makers can use (alone or in combination) to enhance assessment of innovation impact potential and to provide a comprehensive systems analysis. Partners: Global Obesity Prevention Center at Johns Hopkins University (prime), Global Knowledge Initiative, LINC, Resilient Africa Network at Makerere University School of Public Health.

Central Contraceptive Procurement (CCP)

**Purpose**
Serving as the central procurement mechanism for Missions to purchase high quality contraceptives.

**Services Provided:**
CCP utilizes the Field Support system for the transfer, obligation, and disbursement of Population funds for contraceptives. Task Order 3 under the Global Health Supply Chain - Procurement and Supply Management Project (GHSC-PSM), will be implementing procurement, warehousing, and freight services.

Furthermore, through the Global Health Supply Chain - Quality Assurance contract (GHSC-QA), implemented by FHI360, CCP ensures the quality of products donated to USAID programs through independent testing and monitoring.

**Special Notes:**
Those Missions using condoms for Family Planning programs must direct funds into CCP.

Global Health Supply Chain – Procurement and Supply Management (GHSC-PSM) - Family Planning/Reproductive Health Task Order 3

Purpose:
The GHSC-PSM Task Order 3 provides the procurement and delivery of essential health commodities, comprehensive technical assistance for supply chain strengthening, and commodity security for Family Planning and Reproductive Health.

Services Provided:
In order to ensure the availability of FP/RH commodities to clients, GHSC-PSM Task Order 3 will support in-country supply chain technical assistance through the following objectives:

Objective 1: Global Commodity Procurement and Logistics
• Health Commodity Procurement
• Logistics
• Health Commodity Quality Assurance
• Data Visibility

Objective 2: Systems Strengthening Technical Assistance
• Strategic Planning
• In-country Logistics
• Capacity Building
• Enabling Environments

Objective 3: Global Collaboration to Improve Long-Term Availability of Health Commodities
• Global Strategic Engagement
• Global Market Dynamics
• Advocacy
• Global Coordination

Special Notes:
Task Order 3 serves as the primary vehicle through which USAID procures and delivers FP/RH commodities. However, Missions should continue to allocate funds for FP/RH commodity procurement into CCP (Central Contraceptive Procurement); funds for procurement should NOT be obligated directly into Task Order 3.

Means of Access:
Field Support, Core Funding
Global Health Supply Chain – Technical Assistance (GHSC-TA)

**Purpose**
These awards aim to strengthen country management of health commodities, providing the full range of technical assistance needed to ensure the long-term availability of health commodities in public and private services worldwide. These awards will serve all health elements (HIV, family planning, malaria, MCH, TB, etc.)

**Services Provided:**
This award provides various services around strategic planning and design assistance. Technical assistance for in-country logistics will improve delivery of health commodities to service sites (including forecasting, supply planning, pharmaceutical selection, procurement TA, quality assurance TA, warehousing, inventory management, distribution, logistics management information systems, data collection, health care waste management, etc.) The project will also address the following areas: Capacity Building - effective transfer of skills, knowledge, and technology for improved and sustained performance; Enabling Environments - strengthen enabling environments (financing human resource, policy, governance and leadership) to improve supply chain performance; Global Collaboration - global strategic engagement with partners for planning and implementation. Support global partners to utilize lessons learned and share best practices; Advocacy – continued awareness-raising and advocacy to improve availability of health commodities; and Coordination – effective coordination with all USAID funded supply chain activities and within the IDIQ.

**Special Notes:**
Mission-issued Task Orders and Field Support: USAID Missions may develop their own country-specific scopes of work and compete them among the four holders. Task orders will then be issued and managed by Mission Contracting Officers and CORs, providing Missions with the ability to customize and closely manage the assistance they receive. USAID/Washington plans to issue one or more central task orders against this award, which Missions may access through field support.

**Means of Access**
Field Support, Core Funding
Global Health Supply Chain – Technical Assistance (GHSC-TA) – Francophone Task Order

Purpose:
The Francophone TO will provide targeted technical assistance to local stakeholders and support improved supply chain systems by meeting the following objectives:

Objective 1: Strengthen in-country supply systems

Objective 2: Strengthen collaboration and regional organizations for improved commodity security

Objective 3: Build countries’ supply chain management capacity in the context of global health security and emergency preparedness

Services Provided:
N/A

Special Notes:
Means of Access: Field Support. For more information on means of access please contact the task order COR, Sharmila Raj, sraj@usaid.gov.

Means of Access:
Field Support
Purpose
The purpose of this Task Order is to provide services relating to updating and piloting USAID’s National Supply Chain Assessment (NSCA) methodology, tools, reports, and documentation (hereafter referred to as the NSCA 2.0); training stakeholders to implement the NSCA 2.0; and conducting NSCAs - and potentially other supply chain assessments – as requested.

Services Provided:
This Task Order will provide the following services:

1.) Update the NSCA Methodology, tools, report functionality and documentation through a consultative process
2.) Pilot test and finalize the NSCA methodology and associated instruments
3.) Disseminate the updated NSCA and train additional implementers
4.) Conduct additional NSCAs or other supply chain assessments

Special Notes:
N/A

Field Support, Core Funding
Health Communication Capacity Collaborative (HC3)

Purpose:
HC3 is the flagship project for behavior change in the Global Health Bureau. It is designed to complement and add value to behavior change activities supported by USAID Missions worldwide by responding to critical needs in technical leadership, capacity strengthening, research, and innovation. It focuses on the technical areas of family planning/reproductive health, HIV/AIDS, malaria, and maternal and child health.

Services Provided:
HC3 will focus on strengthening in-country capacity to implement state-of-the-art health communication, including mass media, community-level activities, interpersonal communication, and new media. The project will provide tailored capacity strengthening to a range of indigenous partners, including governments, NGOs, creative professionals, and academics, with activities to develop individuals, organizations, and national systems. HC3 will also provide technical leadership in health communication that includes professional exchange, analysis of emerging trends, and development and dissemination of technical and operational guidance. The project will be characterized by a strong focus on implementation science, emphasizing rigorous evaluation, documentation, and diffusion of effective practices.

The five core strategies employed by HC3 are:
- Improving and sustaining health communication through a defined capacity improvement cycle based upon current best practices;
- Facilitating increased capacity at the graduate and undergraduate levels among universities in Africa, Asia and elsewhere;
- Supporting collaborative learning, exchange and capacity strengthening through in-person and virtual communities, including the Springboard (http://www.healthcomspringboard.org/) and the Health COMpass (http://www.thehealthcompass.org/);
- Harnessing new media and igniting innovation to improve behavioral impact; and,
- Building the evidence base for health communication through rigorous research and evaluation.

Health Policy Plus (HP+)

Purpose
HP+ aims to strengthen and advance health policy priorities, with a special emphasis on FP/RH, HIVAIDS, and MCH across global, national, and subnational levels. It strives to improve the enabling environment for equitable and sustainable health services, supplies, and delivery systems through policy development and implementation, with an emphasis on voluntary, rights-based health programs, and by strengthening in-country partners’ capacity to navigate complex environments for effective policy design, implementation, and financing aligned to country priorities. Cross cutting principles, critical to achieving the results of HP+, include gender equality, equity, capacity development, and sustainability; the project capitalizes on previous investments and focuses sharply on building capacity and sustainability into every aspect of the project.

Services Provided:
HP+ provides country governments, local partners, and global initiatives with the tools, analyses, and technical assistance they need for:

- Policy: Develop, adopt, implement, and monitor evidence-based health policies that improve equity, access, availability, affordability and acceptability of quality health services, supplies, and information.
- Health Financing: Increase sustainable, predictable, and adequate financing for programs and health policy implementation.
- Accountability and Transparency: Improve the policy environment for public stewardship, accountability, and transparency.
- Leadership and Advocacy: Advance the Sustainable Development Goals (SDGs) through global leadership and advocacy.

The project nurtures local organizations and institutions, supports development of financing approaches, and builds active and sustainable engagement of civil society with government in both decision making and coordinated action. These approaches and efforts, embedded in the project at global, national and decentralized levels, engender sustainability of results and continued action toward country development goals.

Partners: Palladium, Avenir Health, Futures Group Global Outreach, Plan International USA, Population Reference Bureau, RTI International, the White Ribbon Alliance for Safe Motherhood, and ThinkWell.

Means of Access
Field Support, Core Funding
Knowledge for Health II (K4Health)

Purpose:
Program managers and service providers rely on accurate, relevant health information, knowledge and expertise to do their jobs most effectively. K4Health addresses impediments to accessing, using and adapting health knowledge and information and facilitates knowledge and information use and exchange by developing and improving knowledge management (KM) practices and services. Project partners include Johns Hopkins Center for Communication Programs, FHI360, Management Sciences for Health, and IntraHealth International.

Services Provided:
K4Health provides global leadership in health knowledge management and supports health knowledge and information synthesis, exchange, adaptation and use to support quality programs and services and improve health outcomes. The project’s major components include:

A comprehensive global web portal at http://www.k4health.org that offers:
- Self-directed eLearning courses for just-in-time learning;
- Toolkits featuring key materials on priority health topics, designed to be practical collections of trusted public health resources;
- Virtual discussions and webinars that provide access to a community of experts from around the world;
- Printed copies of the Global Family Planning Handbook and Wallchart;
- An online library of health images for editorial use; and,
- A searchable health research database focused on family planning/reproductive health and related topics.

Regional and country-level technical assistance in building KM capacity and providing health-related KM services, including assistance in:
- Assessing and identifying knowledge and information needs of health providers and program managers, and developing strategies to better meet those needs;
- Supporting collaborative knowledge exchange and sharing among providers and program managers through local communities of practice, blended or eLearning tools and both face-to-face and virtual collaborations; and,
- Establishing country or regional online repositories or physical resource centers, and developing local capacity to manage and sustain them.

Special Notes:
N/A

Means of Access:
Field Support, Core Funding
Purpose
The project’s purpose is for family planning and population issues to be included in policies and programs as key to sustainable and equitable development and economic growth through increased political and financial commitment for FP/RH at global, national, and decentralized levels.

Services Provided:
PACE works with national and local governments, civil society organizations, development networks, and other local institutions to build capacity to design and implement effective population and family planning advocacy strategies. Under this award, PRB produces World Population Data Sheets, Engage multi-media presentations, and briefing packages. PRB trains journalists and researchers on how to interpret data for various audiences. PACE interventions focus on:

- Strengthening individual and institutional capacity in advocacy, policy communications, and negotiations.
- Increasing commitment for multi-sectoral approaches to integrated population, health, environment, climate change, resilience, food security, livelihoods and security programs.
- Analyzing, synthesizing and disseminating data and evidence in order to engage policy and advocacy audiences.

Special Notes:

Field Support, Core Funding
The Demographic and Health Surveys Program (DHS-7)

Purpose:
To improve the collection, analysis and presentation of population, health, and nutrition data; and to facilitate use of these data in planning, policymaking, and program management. The project seeks to increase understanding of a wide range of health issues by improving the quality and availability of data on health status and services, and by enhancing the ability of local organizations to collect, analyze, and disseminate such information. This phase will emphasize sustainability through capacity building and increased host-country ownership, as well as synthesis, analysis and triangulation of data.

Services Provided:
The DHS Program is USAID’s major source of nationally representative and cross-nationally comparable population, health, and nutrition data. It addresses host country and global data needs to guide policies and programs. The Program provides technical assistance to local partners for implementing the following surveys:

- Standard Demographic and Health Survey (DHS) which is typically conducted at intervals of four to five years;
- AIDS Indicators Survey (AIS), which collects data for monitoring and evaluating HIV/AIDS programs;
- Malaria Indicator Survey (MIS), which collects data used for monitoring the performance of malaria programs;
- Service Provision Assessment (SPA), a facility-based survey that collects data on facilities’ readiness to provide essential health services and quality of services.

The DHS Program also provides technical assistance for biomarker data collection to measure a range of conditions, including infectious and sexually transmitted diseases, chronic illnesses such as diabetes, micronutrient deficiencies, and exposure to environmental toxins.

Compared to previous iterations of the contract, The DHS Program will emphasize:

- Capacity strengthening across the survey continuum, including sampling, data processing, and data analysis;
- Deeper analyses utilizing DHS data in conjunction with other data sources or novel methodologies;
- Expansion of new technologies to facilitate data collection and use.

**Purpose**
Transform, a five-year, multiple-award IDIQ, was designed to infuse innovative practices from a range of disciplines into USAID-supported social and behavior change. Transform contractors include organizations expert in marketing, advertising, human-centered design, social psychology, and behavioral economics, among other fields.

Transform emphasizes creative thinking, exceptional design, and high-quality production and implementation. It builds upon USAID’s past and current work in social and behavior change, marrying implementers’ long-standing focus on country context, strategy development, capacity strengthening, and scale, with novel and effective approaches from the private sector and creative fields.

**Services Provided:**
Transform contractors will provide relatively short-term, targeted technical assistance or implementation services, working closely with in-country implementing partners to identify, pilot, and evaluate new approaches to behavior change research and programming.

Illustrative task orders could include:

- Strengthening the quality of existing social and behavior change activities through the introduction of new practices in research and design. Such practices could include immersive formative research methods drawn from anthropology, marketing, or human-centered design; systematic and insightful approaches to audience segmentation and profiling; or, rapid and rigorous strategies for message and materials testing, among others.

- Piloting state-of-the-art approaches to the use of "new" and social media in the context of multi-channel communication interventions.

- Addressing intractable social and behavior change challenges through bold or creative communication campaigns or other types of behavior change interventions. The five pre-qualified IDIQ contract teams are primed by: Camber Collective - FHI 360 - Population Services International - The Manoff Group - University Research Co.

**Special Notes:**

**Means of Access**
Direct Task Order
US Census Bureau Interagency Agreement

Purpose:
The Interagency Agreement (IAA) with the US Census Bureau (USCB) (PRH) seeks to increase the quality, quantity, and utility of country-level data to support the 2020 Round of Censuses and the data requirements of SDGs. This IAA strengthens the capability of statistical offices in developing countries to collect, analyze, disseminate, and use data to increase understanding of population structure and demographic trends and their implications for development planning and policy-making. Emphasis is placed on capacity building; technical assistance provided through this IAA can be in support of the census, surveys, or general institutional capacity building.

Services Provided:
This interagency agreement with the USCB will focus on:

• Country-specific technical assistance to build the capacity of national statistical organizations to implement censuses and other surveys, including technical consultations and training in census design, management procedures, data collection and processing, demographic data analysis, dissemination, and use of census data;

• In-country, regional and U.S.-based workshops and study tours including training activities to strengthen capacity to design and manage census and survey implementation and to analyze, disseminate and use demographic data; and,

• Centrally coordinated activities that support worldwide efforts to improve collection, analysis and use of census and survey data, including maintenance and dissemination of the Census and Survey Processing System (CSPro), a public domain software package for entering, editing, tabulating, and disseminating census and survey data.

Special Notes:

Means of Access:
Field Support, Core Funding
Purpose
This project will further the development and introduction of two new woman-initiated contraceptive methods by:

- Completing the development and regulatory approval of the one-year Nesterone®/Ethinyl-Estradiol (NES/EE) contraceptive vaginal ring (CVR), and initiating its introduction into priority countries;

- Expanding availability in developing country markets of the three-month Progesterone Vaginal Ring (PVR) for postpartum women who are breastfeeding

The NES/EE CVR and PVR will be piloted for introduction through both the public and private sectors, including through social marketing and not-for-profit providers, with the potential of reaching up to twenty-five million users. Introduction strategies will focus on provision through multiple channels, including commercial outlets and community outreach initiatives. To complete this work, the Population Council will collaborate with donors and agencies involved in obtaining regulatory approvals and prequalification, as well as procurement organizations to facilitate the process of introduction.

Services Provided:
Pending approval from the U.S. FDA and specific national regulatory bodies, this project will focus on catalytic activities to facilitate the introduction of these woman-initiated products at a country level through existing regulatory and service delivery networks. This work will include advocacy and advocacy research, market analyses and consumer research, development of packaging/delivery approaches, engaging policymakers/decision-makers, and adaptation at scale. The field implementation phase will include seeking political/resource commitments, partnerships, integration with existing programs and M&E.

Special Notes:
N/A

Means of Access
Field Support, Core Funding
Envision FP

Purpose:
The objective of Envision FP is to develop, introduce, and expand understanding of contraceptive technologies and approaches to enhance choice and reduce unmet need.

Services Provided:
The project’s research agenda includes:

- Refining existing contraceptive methods, such as: a) A lower-cost, lower-dose subQ DMPA injection; b) Extended use of the injectable, Sayana Press; and c. An improved post-partum IUD applicator
- Responding to product-related issues that arise from the field and impact provision, including:
  -- A rapid-response team to address product-related issues as they arise with proactive risk mitigation activities
  -- Extending the recommended duration of Implanon and LNG IUS based on documented safety/efficacy data
  -- Research on reported interactions between contraceptives and other drugs, and recommendations for next steps
- Developing new methods to fill gaps, including:
  -- Novel progestin-based delivery systems for 3-6 months’ contraception
  -- Highly effective, low-cost, non-surgical approaches to permanent contraception.

The prime partner for Envision FP is FHI360. The project team will focus on key challenges and opportunities for contraceptive users and programs in an effort to broaden method choice and increase access to quality, affordable, and acceptable contraceptives.

Special Notes:
N/A

Means of Access:
Field Support, Core Funding
Expanding Effective Contraceptive Options (EECO)

Purpose
Over 100 million women cite method-related reasons for non-use of modern contraceptives, underscoring the need for new and improved contraceptive methods and greater method choice.

The EECO project is designed to support the research, development and introduction of technologies that meet the full range of sexual and reproductive health needs of women and girls. The EECO team’s objective is to produce roadmaps for introducing and creating demand for new woman-initiated family planning methods, including vaginal gels, barrier methods, and intra-vaginal rings. EECO will produce actionable information on how best to register products, which distribution and communication channels have the most traction, what kind of training and advocacy is required, and how to segment the market for each method. These results can then be extrapolated to bring products to national scale, helping to fill critical gaps in the family planning method mix.

Services Provided:
EECO will take a comprehensive approach, including clinical research as necessary, product registration and regulatory work, consumer and provider research, stakeholder advocacy, marketing and distribution, and establish an M&E feedback loop with product developers. WomanCare Global (WCG) is the prime. WCG will bridge the private sector and non-profit worlds by linking upstream product developers/suppliers and downstream marketing and distribution partners. WCG will lead regulatory and quality assurance efforts, will register and make products available, and will pilot intensive medical detailing with providers. Additional partners include PSI, the social marketing partner who will work with existing health networks to market and distribute products; the International Center for Research on Women (ICRW), who will conduct research with potential users and providers; Evofem, the biotech partner; and, Every1Mobile, the m-health partner.

Special Notes:

Means of Access
Field Support, Core Funding
Fertility Awareness for Community Transformation (FACT)

**Purpose:**
To answer significant research questions related to how fertility awareness (FA) and fertility awareness-based methods (FAM) can contribute to an increase in overall family planning access and use.

**Services Provided:**
In developing countries, a woman’s lifetime risk of dying due to pregnancy and childbirth is one in 75, nearly 100 times higher than the risk in developed countries. Studies also show that an estimated 220 million women are not using any family planning method, despite wanting to avoid pregnancy. Providing these women with information and the full range of family planning methods—including fertility awareness-based methods (FAM)—not only saves lives, but also improves other social, educational, environmental and economic indicators.

The FACT Project is testing two hypotheses:
1) Increasing access to fertility awareness information leads to increases in family planning use. Fertility awareness covers a range of key information, including how specific family planning methods work, how they affect fertility, and how to use them; and it can create the basis for understanding communication about and correctly using family planning. FACT is developing and testing this hypothesis based on state-of-the-art social and behavior change communication (SBCC) theory and practice to assess their effect at the individual, couple, family, and community levels.

2) Increasing access to fertility awareness-based methods has an impact on overall contraceptive use. Following the successes of the AWARENESS and FAM Projects that successfully proved that increasing access to fertility-based methods like SDM, LAM and the Two-Day Method led to an increase in overall contraceptive use, the Institute for Reproductive Health intends to test this hypothesis by exploring more cost-effective interventions to increasing access to FAM, including group teaching approaches.

The FACT Project includes an activity called the Responsible, Engaged and Loving (REAL) Fathers Initiative, a mentoring program for young fathers and a community-level series of posters that use emotion-based messages to catalyze diffusion of reflection on inequitable gender norms and domestic violence. The intervention was found to be effective at pilot stage and is now being replicated in other regions of Uganda to test a sustainable model of scale-up through integration with economic strengthening and child care and development programming and to determine its effect on harsh punishment of children, intimate partner violence, and use of family planning.

**Means of Access**
Core and Field Support
IMPT Secretariat

**Purpose**
The Initiative for Multipurpose Prevention Technologies (IMPT) works to advance the development of products that simultaneously address the interconnected risks of HIV, other sexually transmitted infections (STIs), and unintended pregnancy. The objective of the project is to support the IMPT Secretariat in its role as the product-neutral coordinator of the MPT field.

**Services Provided:**
Providing central leadership and coordination for the MPT field, including:
- Maintaining a forum for multidisciplinary collaboration and technical coordination
- Facilitating supporting agency collaborations relevant to MPTs
- Tracking investments in MPT development
- Facilitating the IMPT strategic planning process
- Serving as the MPT information ‘hub’ to expand MPT knowledge, awareness, and support among key stakeholders

Advancing the MPT scientific and technical agenda, including:
- Strategizing and accelerating action around identified MPT field-wide priority issues
- Developing and updating MPT technical resources to help guide the field

The prime partner for the IMPT Secretariat is CAMI Health via the Public Health Institute.

Core Funding
IPM Combination Contraceptive and Anti-HIV Vaginal Ring

Purpose:
To develop and evaluate a safe, effective and acceptable contraceptive and HIV/AIDS prevention technology.

Services Provided:
This five-year project, recently extended an additional two years, aims to formulate a sixty day vaginal ring that combines the potential HIV prevention drug, dapivirine, with a hormonal contraceptive. Dapivirine showed high potency against HIV in early studies, and is currently being studied in a large-scale efficacy trial in a ring formulation. This project will focus on integrating a hormonal contraceptive into the dapivirine ring, with the end goal of successfully formulating a potent and inexpensive combination ring that is effective for sixty days.

Means of Access:
Core Funding
Passages: Transforming Social Norms for Adolescent & Youth Sexual & Reproductive Health

Purpose
Passages aims to improve family planning use and sexual and reproductive health (SRH) among youth, in particular newly married couples, first time parents and very young adolescents, by developing evidence and promoting application of effective interventions to transform social norms related to SRH, at scale.

Services Provided:
Passages will bridge the gap between science and effective policy and practice and will:

1) Pilot, replicate, and scale-up social norm interventions and apply implementation science principles to explain what makes interventions effective and sustainable at scale in real world contexts;
2) Strengthen in-country capacity to plan, implement, and monitor and evaluate the scale-up of effective pilot initiatives; and
3) Distill and share evidence and foster dialogue on integration, measurement, and evaluation of normative interventions.

Passages will help USAID missions and other partners through the following activities:
- Provide technical assistance to health, including family planning, and other sector programs interested in including social norm interventions to, for example, empower women, improve healthy timing and spacing of pregnancy, reduce gender-based violence, and delay marriage.
- Raise awareness and strengthen the capacity of national and organizational stakeholders to understand and address at scale the social norms that affect family planning uptake.
- Support assessments and systems-based planning to expand and scale-up evidence-based approaches to establish social norms which support SRH.
- Conduct ‘realist’ evaluations of existing social norm interventions to inform expansion.
- Design and conduct research to measure the effect of normative interventions and assess their expansion. Apply new approaches to measure gender norms, conduct research with very young adolescents, and monitor and evaluate scale-up.

The Evidence Project

Purpose:

As the Office of Population and Reproductive Health’s flagship implementation science project, The Evidence Project focuses on generating, translating, and using evidence to strengthen and support scale-up of evidence-informed family planning/reproductive health (FP/RH) policies and programs.

Services Provided:

Through The Evidence Project the Population Council and its partners:

Generate new evidence to increase the effectiveness of FP/RH programming. The Evidence Project will generate new evidence through rigorous research to address existing key FP/RH program issues of global significance, including developing and testing strategies to address these issues in a variety of contexts. In addition, The Evidence Project will have the capacity to design and conduct studies that respond to critical emerging issues, evidence gaps and country needs.

Synthesize and share evidence in order to accelerate scale-up of evidence-based improvements in FP/RH policies and programs. The Evidence Project will consolidate both new and existing evidence through syntheses, systematic reviews, case studies and other strategic analyses as well as package and disseminate lessons learned for use by key FP/RH audiences at global, regional, and country levels.

Provide technical assistance (TA) for application and use of evidence to improve FP/RH programming. The Evidence Project will provide TA that responds to program priorities at country and regional levels and builds capacity for generating and translating evidence into practice (e.g., TA to cost programs; to incorporate evidence into service delivery guidelines, tools and/or program plans; and to monitor and evaluate scale-up of high-impact FP/RH practices).

Purpose
The purpose of Task Order 1: Promoting Health, Adjusting the Reproductive Environment (PHARE) is to design, implement, and evaluate innovative social and behavior change strategies for improving reproductive health in francophone West Africa. Focus countries will include the nine Ouagadougou Partnership countries and the Democratic Republic of Congo. The objective is to generate innovative and evidence-based social and behavior change communication (SBCC) strategies that address barriers to modern contraceptive use, transform attitudes about reproductive health, and promote family planning in West Africa.

Services Provided:
Activities under Task Order 1 will address the role of the social environment in shaping desired fertility and limiting access to services with an emphasis on gender integration across activities. Activities will target women and men as users of contraception with tailored attention to those who influence reproductive health behavior including parents, healthcare providers, and community leaders. The needs of youth will also be prioritized. Activities will reach underserved populations, particularly those in rapidly growing urban areas and in lower wealth quintiles. Services acquired under Task Order 1 may include:

Design, implementation, and evaluation of new interventions
Design and implementation of specialized activities to complement existing interventions
Provision of technical assistance to strengthen capacity in key marketing and promotion functions

**Advancing Partners and Communities Project**

**Purpose:**
The Advancing Partners and Communities Project will advance and support community programs that seek to improve the overall health of communities and achieve other health-related impacts, especially in relationship to family planning. It will provide global leadership for community-based programming, execute and manage small and medium-sized subawards, support procurement reform by preparing awards for execution by USAID, and build technical capacity of organizations to implement effective programs.

**Services Provided:**
The project will accept all types of funding and addresses all health sector areas including family planning, HIV/AIDS, maternal and child health, and control of infectious disease.

Advancing Partners & Communities is positioned to provide a wide range of technical services to Missions, some of which include:

- Conduct assessments, introduce and promote innovative and high impact strategies, and provide virtual or on-the-ground technical assistance to bilateral programs in the design of demonstration projects and national scale-up efforts of private and public-sector community family planning programs.

- Provide technical and organizational capacity building services for local NGOs that will prepare them to implement and monitor effective programs and receive funding directly from USAID.

- Provide grant-making services: Conduct fully open and targeted competitive solicitations; determine eligibility of awardees; prepare cooperative agreement documents for execution by USAID; execute actionable sub-awards; and execute sub-awards competed by an APS.

- Provide Missions a wide range of grant management and oversight services for awards to local organizations: monitoring of progress and expenditures of programs, ensuring financial accountability of grantees, supporting program monitoring and evaluation, ensuring compliance with all USAID requirements, including branding and family planning requirements.

Purpose
The Bayer-USAID Contraceptive Security Initiative (CSI) is an innovative public-private partnership that seeks to address the ever-increasing need for affordable contraceptives in the developing world. Through the CSI, Bayer and USAID are collaborating to introduce a commercially-sustainable oral contraceptive, at an affordable price, to middle income women across Sub-Saharan Africa. The Global Development Alliance (GDA) partnership leverages Bayer resources and USG resources in a 2-to-1 match.

Services Provided:
The CSI project introduces a new, affordable contraceptive product – MicrogynonFe – which has a price point above the social marketing and public-sector level, and below commercial prices. This strategy attracts contraceptive users to the middle of the market and seeks to create a permanent market niche for “Tier 2” brands. Bayer has pledged to maintain this low-cost and accessible pricing strategy well beyond the expiration of its agreement with USAID. This will grow the overall number of OC users in a sustainable way, and allow governments and donors to better target subsidized products to lower income market segments.

Bayer invests in product launch, distribution, and retail access for the new brand -- bringing to bear its existing manufacturing, packaging, export/import and distribution capabilities to assure that the product is fully commercially sustainable. The CSI uses local pharmacies as the primary distribution channel to consumers and promotes sustainable market access for mid-priced contraceptives.

USAID resources support an initial period of demand-creation advertising and other market-building communications in order to help build initial product awareness and grow the Tier 2 market segment. Bayer has subcontracted Meridian Group International to develop and manage these in-country promotional activities.

They currently operate in Ethiopia, Tanzania, Uganda, Rwanda, Ghana, Malawi, and Kenya, and plans to launch in four additional countries.

Evidence to Action for Strengthened Family Planning and Reproductive Health Services for Women and Girls (E2A)

Purpose:
Evidence to Action for Strengthened Family Planning and Reproductive Health Services for Women and Girls (E2A) is a five-year, worldwide cooperative agreement. The purpose of E2A is to increase global support for the use of evidence-based best practices to improve family planning and reproductive health (FP/RH) services, access, and quality. The project will strengthen service delivery by supporting scale-up and institutionalization of proven interventions in the health system. E2A will work to integrate FP/RH with other health and non-health services, mitigating gender barriers, and enhancing informed decision-making for women and girls.

Services Provided:
E2A will work in partnership with USAID’s regional and country missions, host country partners, and international organizations to:

Introduce large-scale implementation of family planning evidence-based practices;

Provide technical assistance to apply systematic approaches, monitor and evaluate scale-up;

Conduct youth and gender assessments, integrate youth and gender across service delivery interventions, and evaluate effectiveness of youth and gender approaches and models;

Introduce and test innovative service delivery approaches;

Provide technical assistance to support the integration of family planning into other health areas including FP/HIV and FP/MNCH and integration of family planning into non-health areas including workplace and environmental models; and,

Document and synthesize evidence of high-impact practice in family planning.

The project is led by Pathfinder International with a consortium of partners: Management Sciences for Health (MSH), IntraHealth, Program for Appropriate Technologies in Health (PATH), ExpandNet, and the African Population and Health Research Center (APHRC).

Field Support, Core Funding
Leadership, Management, and Governance (LMG)

Purpose
The Leadership, Management, and Governance (LMG) project is a five-year cooperative agreement that addresses the gap for sustainable leadership, management and governance capacity at all levels of the health system. Using highly effective interventions, the LMG project supports health care providers, program managers, and policymakers to achieve better health system performance and better health outcomes. The LMG project fosters strong country ownership, gender equity and evidence-driven approaches by promoting the implementation of sound health policies, effective management, transparency, accountability, and engagement with civil society and the private sector. [www.lmgforhealth.org](http://www.lmgforhealth.org)

Services Provided:
The LMG Project interventions:

- Foster global leadership and advocacy for improved leadership, management and governance capacity;
- Strengthen the delivery of quality family planning and other health services through improved leadership, management and governance capacity;
- Support the establishment and expansion of health managers as a professional cadre;
- Develop and strengthen pre-service education in leadership, management and governance;
- Develop and strengthen in-service leadership, management and governance education and training with Ministries of Health and local non-governmental and faith-based organizations;
- Expand the awareness and use of tested tools, models and approaches to strengthen leadership, management and governance capacity throughout the public sector and civil society organizations;
- Generate knowledge and conduct research to expand the knowledge base of the effect of enhanced leadership, management and governance capacity on health services outcomes in family planning, maternal and child health, HIV/AIDS and other health areas; and,
- Develop and update indicators for tracking country-led leadership, management and governance processes and capacity building.

**Postabortion Care Family Planning (PAC-FP)**

**Purpose:**
To expand postabortion care (PAC) clients’ access to a range of contraceptive methods, including long-acting reversible contraceptives (LARCS) and permanent methods (PMs), along with providing immediate life-saving care. Many women who obtain PAC have an urgent need for family planning (FP); in obtaining FP services, they have a right to FP options, respect, confidentiality, and high-quality care. The PAC-FP project increases informed and voluntary use of LARCs/PMs by PAC clients, through two main strategic objectives; (1) Building local capacity to deliver postabortion family planning services with the inclusion of LARC/PMs among the methods women can choose from and to support future scale-up; and (2) Generating and communicating knowledge to advance access to LARCs/PMs through PAC.

**Services Provided:**
Build local capacity to deliver quality postabortion family planning (PAC-FP) services, including LARCs/PMs, among a wide range of methods from which women can choose by using a systems approach, holistic approach to capacity building, and gender integrated approach;

Conduct implementation research to demonstrate the PAC-FP model, provide technical assistance, tools and materials to catalyze scale-up of the model;

Document scale-up of the PAC-FP model progress and process;

Generate and communicate knowledge at country and global levels to advance access, knowledge, and best practices about post-abortion family planning;

Improve organization of PAC services to facilitate on-site family planning service provision, service quality, logistics, policymaking, community and support for post-abortion family planning, and gender-related and other provider/community attitudes and norms that limit service access;

Generate community/client demand by helping partners integrate messages/activities targeting women, men, and/or leaders into existing community/BEmONC outreach and BCC;

Increase national/district decision-maker support for PAC FP services;

Promote sustainability of the PAC-FP model by enhancing programmatic, institutional, and financial capacity of interventions, healthcare workers, and facilities.

Support for International Family Planning & Health Organizations II: Sustainable Networks (SIFPO2/IPPF)

**Purpose**
SIFPO2/IPPF aims to increase access to and use of voluntary high quality, affordable family planning (FP) and other health information, products and services globally by strengthening and leveraging this organization’s global reach, with local affiliates, network of FP clinics and other health platforms.

**Services Provided:**
SIFPO2/IPPF works to strengthen global and local organizational capacity to deliver high quality FP and other health services to priority groups and improve sustainability of country level FP and other health programs through financing mechanisms, capacity building, and local partnerships.

SIFPO2/IPPF offers a wide array of technical services available to missions and their counterparts. IPPF is working to:

- Strengthen the delivery of voluntary quality FP services and other health services, as appropriate, to priority populations, through providing the services directly or providing training and support to public or private health care providers;

- Strengthen quality assurance standards to improve program performance; use data for decision making to improve program implementation and client centered care;

- Increase organizational sustainability of country level FP and other health programs to improve capacity and become sustainable, while still responding to the needs of underserved and marginalized groups;

- Provide or build capacity of providers on gender sensitive and youth friendly health knowledge, information and services;

- Use vouchers, social franchising, social marketing, mobile outreach strategies, and dedicated provider models, to increase use of voluntary family planning, including long-acting reversible contraceptives and permanent methods, and other health services;

- Test financing mechanisms, (vouchers, insurance or contracting) to build financial sustainability and participate in a total market approach.

SIFPO2/IPPF is implemented by International Planned Parenthood Federation, with partners Population Council and eight Member Associations.

**Special Notes:**

Support for International Family Planning & Health Organizations II: Sustainable Networks (SIFPO2/MSI)

**Purpose:**
SIFPO2/MSI aims to increase access to and use of voluntary high quality, affordable family planning (FP) and other health information, products and services globally by strengthening and leveraging this organization’s global reach, with local affiliates, network of FP clinics and other health platforms.

**Services Provided:**
SIFPO2/MSI works to strengthen global and local organizational capacity to deliver high quality FP and other health services to priority groups and improve sustainability of country level FP and other health programs through financing mechanisms, capacity building, and local partnerships.

SIFPO2/MSI offers a wide array of technical services available to Missions and their counterparts. MSI is working to:

- Strengthen the delivery of voluntary quality FP services and other health services, as appropriate, to priority populations, through providing the services directly or providing training and support to public or private health care providers;
- Strengthen quality assurance standards to improve program performance; use data for decision making to improve program implementation and client centered care;
- Increase organizational sustainability of country level FP and other health programs to improve capacity and become sustainable, while still responding to the needs of underserved and marginalized groups;
- Provide or build capacity of providers on gender sensitive and youth friendly health knowledge, information and services;
- Use vouchers, social franchising, social marketing, mobile outreach strategies, and dedicated provider models, to increase use of voluntary family planning, including long-acting reversible contraceptives and permanent methods, and other health services; and,
- Test financing mechanisms, (vouchers, insurance or contracting) to build financial sustainability and participate in a total market approach.

SIFPO2/MSI is implemented by Marie Stopes International, with partners FHI 360, EngenderHealth, and Grameen Foundation.

Sustaining Health Outcomes through the Private Sector Plus (SHOPS Plus)

Purpose:
SHOPS Plus catalyzes public-private engagement for better health to increase access to and use of priority health services, improving the equity and effectiveness of the total health system. SHOPS Plus work ultimately contributes to the achievement of the major goals of Ending Preventable Child and Maternal Deaths, an AIDS-Free Generation, Family Planning 2020, and other U.S. Government priorities.

Services Provided:
SHOPS Plus serves as a focal point of USAID’s leadership in the private sector, including public-private engagement, and builds on USAID’s strong history of private sector programming worldwide, including the work of predecessor projects, Private Sector Partnerships-One (PSP-One) and Strengthening Health Outcomes through the Private Sector (SHOPS). SHOPS Plus implements a total market approach to foster long-term, sustainable delivery of information, products and services. The project will focus prominently on health financing in the private sector as it relates to private sector inclusion in universal health coverage, public sector engagement and stewardship, innovation, support to and within health systems, integration of services, and research to test and scale up proven and emerging private sector models and approaches. SHOPS Plus offers a variety of technical services available to Missions and their counterparts such as:

- Conducting private health sector assessments
- Implementing health financing strategies to remove barriers to care
- Changing private provider and consumer knowledge and behavior
- Improving provider access to credit
- Increasing effective public-private engagement
- Scaling up provision of priority health services through the private sector

SHOPS Plus is implemented by Abt Associates and their SHOPS Plus consortium partner organizations.

Core Partners: Banyan Global, Iris Group, Marie Stopes International, and Population Services International

**Mentor Mothers Reducing Infections through Support and Education (RISE)**

**Purpose**
This award contributes to the goal of strengthening the overall sustainability of The RISE project is a five-year regional cooperative agreement managed by the Regional HIV/AIDS Program, USAID/Southern African (RHAP). The project aims to reduce mother-to-child transmission of HIV in Southern and Eastern Africa through a peer support program that provides education and psychosocial support to HIV-positive pregnant women and new mothers, helps women access existing health care services to prevent mother-to-child transmission of HIV, and follows up with mothers and babies to ensure they receive appropriate medical care after delivery. RISE trains HIV-positive mentors in the clinic and community who act as peer educators and provide one-on-one and group counseling on the key aspects of the prevention of mother-to-child transmission (PMTCT) system. The project is currently implemented by mothers2mothers (m2m), a South African based NGO.

**Services Provided:**
Under the RISE project, m2m provides the following services to prevent mother-to-child transmission of HIV in Africa:

- **Direct service delivery** - m2m delivers Mentor Mother services in communities. Service delivery activities include: group health talks with women in antenatal clinic settings; one-on-one interactions between the Mentor Mother and the client; support group sessions; couples interactions and support groups with female clients and their male partners; tracking and following up with mothers lost to care and referrals to relevant MNCH services.

- **Capacity Building for Governments and Local Implementing Partners** - m2m provides technical support to governments to develop national Mentor Mother Programs in their respective countries. m2m’s role involves the development of standards and guidelines, curriculum, training program, and monitoring & evaluation framework for the national programs. m2m trains local partners, providing them with the knowledge and systems necessary to deliver Mentor Mother services in line with national governments’ quality standards.

- **Technical Advisory Services** - Building on m2m’s expertise in PMTCT care and support, m2m contributes to national PMT response coordination as well as conducts a number of activities to determine the success of similar peer education programs. These activities range from technical assistance in the development of relevant guidelines to analysis and assessment services for partners currently implementing peer education activities.

Regional Action through Data (RAD)

Purpose:
The project purpose is to improve health outcomes in Sub-Saharan Africa by disrupting current models of healthcare, changing how and why data/information is collected, analyzed and then used to achieve results. The project will focus on two levels of health care:

1. At the macro level to aggregate information from disparate sources to provide regional and national level decision-makers accurate and timely information to make evidence-informed, data-driven decisions around strategy, policies and resource allocation; and

2. At the patient-provider level, focused on cross-border populations, to ensure that appropriate evidence-based data is collected, resulting in quality patient care.

Services Provided:
After a thorough scoping and landscaping exercise in conjunction with USAID field missions, other USAID operating units and external stakeholders to ensure that the project identifies critical gaps in current programming, aligns well with other data initiatives, and adds complementary value, the program will:

- Establish data hubs at the regional institutional or national level, aggregating multiple data sources and developing algorithms to generate insights on selected program performance areas to guide decision making and action in relation to resource management, policy and program implementation.
- Develop, test, and implement a cloud-based electronic health system with a unique patient identifiers allowing for aggregation of patient data with a focus on cross-border populations, which when analyzed with other regional data sources, will facilitate decision making to inform improved health service delivery, particularly focusing on continuity of care.
- Approaches will be developed, tested, adapted and scaled throughout the life of the project.

Led by BroadReach Healthcare, with project headquarters in Nairobi, Kenya, the RAD consortium partners include:

- Duke University, Innovations in Health Care
- Jembi Health Systems
- BR Vantage GmbH

Technical Support to PEPFAR Programs in the Southern Africa Region (TSP)

Purpose
The purpose of the TSP Agreement is to advance the implementation of PEPFAR programs through targeted technical assistance, focusing primarily on improvements and the rapid expansion of pediatric and adolescent care and treatment. TSP has expertise in strategies to facilitate test & treat services; pediatric case finding and improved treatment delivery; adolescent programming; improving retention in care and viral suppression; optimization of PMTCT and early infant diagnosis; TB-HIV integration/coordination; OVC and DREAMS programming. TSP provides PEPFAR countries with customized technical support and implementation solutions that are geared towards achievement of the UNAIDS 90-90-90 benchmarks.

The TSP consortium is led by Baylor/ Malawi, and is comprised of Baylor College of Medicine Children’s Foundations in Botswana, Lesotho, Swaziland, Angola; and Columbia University (ICAP). Together these organizations have representation in all the countries in southern Africa.

Services Provided:
TSP provides long term, medium and short term technical assistance and where requested, direct service delivery. TSP has a “Dream Team” comprised of pediatricians, pharmacists, and other medical and technical experts based in the southern Africa region, who can be deployed on request and at short notice. TSP is a flexible mechanism that also provides education, training and mentorship; tools packages, job aids, HIV curricula, patient education models, and south-south technical exchanges.

Special Notes:

Means of Access
Direct through Africa Bureau
World Health Organization, Africa Regional (WHO/AFRO) Disease Control and Reproductive Health

Purpose:
This grant supports the World Health Organization/ Africa Regional Office’s (WHO/AFRO) program for the prevention and control of communicable diseases and the promotion of reproductive health and health systems in Africa. The mandate of the Organization is defined by its Member States in the Constitution adopted in 1946 that determines the objectives and functions of the Organization, its membership and its organs.

Services Provided:
The regional offices in Brazzaville, Republic of Congo, largely through three Inter-country Support Teams (ISTs) that have been established in Harare, Zimbabwe; Libreville, Gabon; and Ouagadougou, Burkina Faso will:

- Provide technical and managerial support and contribute to sustainable capacity building;
- Engage with key partners at the sub-regional level;
- Provide rapid responses to countries in epidemic and emergency situations;
- Generate health knowledge and information, and report back to the Country and WHO/AFRO Regional Office; and
- Plan, monitor, and evaluation inter-country activities.

The program components supported by USAID address the following health problems:

- Malaria (MAL)
- Tuberculosis (TB)
- Integrated Disease Surveillance and Response (IDSR)
- Child and Adolescent Health and Nutrition (CAN)
- Maternal and Newborn Health (MNH)
- Immunization, Vaccine Preventable Diseases (VPD)
- Family Planning and Reproductive Health (FP/RH)

Center of Excellence on Democracy, Human Rights and Governance (CEDHRG): CEDHRG

Center for Children in Adversity/Displaced Children and Orphans Fund

Purpose
The Center for Children in Adversity (CECA) supports U.S. Government, host-country and civil society partners to develop and implement programs and policies that address the objectives under the Action Plan for Children in Adversity (APCA), the first-ever, whole-of-government strategic guidance for international assistance to children.

USAID’s Displaced Children and Orphans Fund (DCOF) provides financial and technical assistance for projects that help vulnerable children in jeopardy of losing, or those who are already living without, the care and protection of a family. This includes children in institutions, children living on the street, children displaced from their families and communities as a result of armed conflict, and other highly vulnerable children. Some of those children are orphans who have lost both parents; most are not.

Both CECA and DCOF are housed within USAID’s Center of Excellence on Democracy, Human Rights and Governance (DRG), Bureau for Democracy, Conflict and Humanitarian Assistance (DCHA).

Services Provided:
Under the these programs, most activities are implemented through USAID mission-managed grants and agreements. The major portion of these Funds is used to support program activities and provide technical assistance for programs and methodological approaches that strengthen families and communities to provide the necessary care, protection, and support for highly vulnerable children. Program activities address the needs of especially vulnerable children, including children affected by armed conflict, street children, and children otherwise separated from appropriate care-giving situations.

As part of its oversight and managerial responsibilities for the Fund, DCHA/DRG maintains a technical assistance contract with New Editions Consulting, Inc. This contract provides technical assistance and support for fields missions that are interested in developing programs under the Fund

Disability Program

Purpose:
USAID’s Disability Program is aimed at increasing the participation of people with disabilities in USAID programs and strengthening the capacity and services of disabled people’s organizations (DPO). Funding provides an opportunity to invest in DPOs and strengthen their ability to advocate on their own behalf and to access and manage foreign assistance funding.

Services Provided:
Disability Program areas span sectors to include democracy, human rights and governance, economic growth and trade, education, the environment, gender equality and women’s empowerment, and others.

This fund is coordinated and supported by the Center of Excellence on Democracy, Human Rights and Governance, although most activities are implemented through grants and agreements that are managed by USAID Missions.

As part of its oversight of and managerial responsibilities for the program, DCHA/DRG maintains a technical assistance contract with New Editions Consulting, Inc. This contract provides technical assistance and support for field missions that are interested in developing programs under the Fund.

**Telephone:** (202)789-1500  
**Website:**  
**Email:** csavino@usaid.gov

---

**Purpose**  
The Patrick J. Leahy War Victims Fund (LWVF) provides financial and technical assistance to programs that address the needs of people living with disabilities, primarily those who suffer from mobility-related injuries, caused by unexploded ordinance (UXO), including anti-personnel landmines, and other direct and indirect causes of physical disability (polio and other preventable diseases that might result from interrupted immunization campaigns).

**Services Provided:**  
The LWVF is concerned with the provision of orthopedic services and devices to ensure unassisted mobility for civilian war victims and other persons with disabilities. Assistance may include training and institutional capacity strengthening, facilities upgrading, materials provision, and support for national disabilities policy reform and public advocacy. In addition, programs include support for increasing the social and economic opportunities of these survivors.

This fund is coordinated and supported by the Center of Excellence on Democracy, Human Rights and Governance, although most activities are implemented through grants and agreements that are managed by USAID Missions.

As part of its oversight and managerial responsibilities of the Fund, DCHA/DRG maintains a technical assistance contract with New Editions Consulting, Inc. This contract provides technical assistance and support for field missions that are interested in developing programs under the Fund.

Victims of Torture Fund

Purpose:
The Victims of Torture fund (VOT) provides financial and technical assistance to programs worldwide that assist in the rehabilitation of individuals who suffer from the physical and psychological effect of torture and trauma. Funds also support capacity building of organizations that serve people who have been tortured and evidenced based research on treatment and healing.

Services Provided:
The VOT primarily supports programs that help heal the psychological and physical trauma caused by torture. Additionally, the fund recognizes that communities, along with survivors, need to heal and recover. To this end, the fund supports programs that affirm the dignity of the survivor by restoring his or her position as a functioning and contributing member of the family and the community.

The fund works through nongovernmental organizations (NGOs) overseas that (1) provide direct services to survivors, their families, and communities; (2) strengthen the capacity of country-based institutions in their delivery of services to survivors; and (3) increase the level of knowledge and understanding about the needs of torture victims. The fund supports activities that attend to the medical, psychological, and social needs of torture survivors and their families. These programs include advocacy, training, technical assistance, and research. The fund is coordinated and supported by the the Center of Excellence on Democracy, Human Rights and Governance, although most activities are implemented through grants and agreements that are managed by USAID missions.

As part of its oversight and managerial responsibilities of the fund, DCHA/DRG maintains a technical assistance contract with New Editions Consulting, Inc. This contract provides technical assistance and support for field missions that are interested in developing programs under the fund.

Wheelchair Program

Purpose
Established in 2007, USAID’s Wheelchair Program works to improve the availability of, access to, and sustainability of programs that provide appropriate wheelchairs in the developing world. The program promotes a comprehensive approach to the provision of suitable wheelchairs and the associated training and education that must accompany that work.

Services Provided:
In administering this program, USAID follows four (4) guiding principles: 1) appropriateness to the environment and individual user, 2) sustainability of local services, 3) necessity of training for service providers, and 4) quality of life for wheelchair users.

This fund is coordinated and supported by the Center of Excellence on Democracy, Human Rights and Governance, although most activities are implemented through grants and agreements that are managed by USAID Missions.

As part of its oversight of and managerial responsibilities for the program, DCHA/DRG maintains a technical assistance contract with New Editions Consulting, Inc. This contract provides technical assistance and support for field missions that are interested in developing programs under the Fund.
