

JOIN OUR WEBINAR SERIES

USAID's Support to Global Health Research and Development

USAID's Global Health Research and Development (R&D) programs support the development and introduction of new and improved drugs, diagnostics, vaccines, tools, and approaches. This six webinar series presents USAID's approaches to global health research and development and the impact these have on saving and improving lives around the world. Each webinar will focus on a global health topic and draw examples from investments made in 2016 and beyond.
