Past

Present

Future

National Education Assessment Unit

2015 Education Summit:  
Goal 1: All Children Reading

**USAID**  
FROM THE AMERICAN PEOPLE

## National Education Assessment Unit: Past

- Small Unit within the Ghana Education Service (10-12 members)
- Mandated to lead the Ghana Education Service on student assessment at the pre-tertiary level
- Long partnership with USAID
  - Basic Education Comprehensive Assessment System (2005)
  - National Education Assessment (2005-present)
  - Early Grade Reading/Early Grade Math Assessment (EGRA/EGMA; 2013-present)

**USAID**  
FROM THE AMERICAN PEOPLE

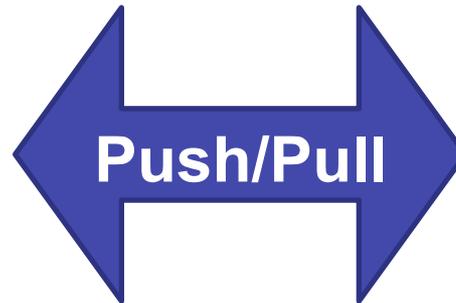

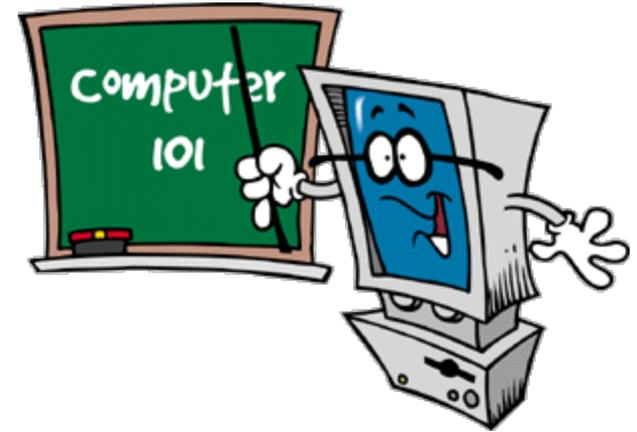

## National Education Assessment Unit: Present

- Latest support through USAID/Ghana's Partnership for Education: *Testing* activity (2013-2016)
- Includes:
  - Support for administration and analysis of assessments (NEA, EGRA/EGMA)
  - Support for capacity building for staff such as long term training (via local sub-contractor), international STTA, connection to training and professional development
  - Development of long term assessment models (low-cost, sustainable)

# Lessons Learned

**Moving from this....**

**....to this**

**USAID**  
FROM THE AMERICAN PEOPLE

# Lessons Learned: Key Principles

Identify  
Champions

Assign  
Staff

Start  
Small

Mission  
Support

Manage  
Expectations

**USAID**  
FROM THE AMERICAN PEOPLE

# Lessons Learned: Key Considerations

Simplify reporting requirements

Streamline finances

Take a hybrid approach

Use embedded advisers

**USAID**

2013 Education Summit: State of the  
Art, State of the Field

**USAID**  
FROM THE AMERICAN PEOPLE

## Challenges

- Ghana
  - Slow speed of partner country procurement systems and decision making
  - Ghana's government system weaknesses: fiduciary, regulatory, oversight and compliance requirements
  - Aligned policy, but implementation plans missing
  - Balancing USAID goal (100 million readers), HG goals and 'donor mix'
- USAID & USAID/Ghana
  - Multiple masters vis-à-vis agency policy expectations: Ed Policy, USAID Forward, Evaluation Policy, Youth Policy
  - Changing, transitioning and unclear guidance as the Agency learns more – ADS 220, PPDO, RLA, RAAO, new approval processes
  - Internal USAID capacity, skills and people power
  - Ability to ensure compliance and maintain momentum

**USAID**  
FROM THE AMERICAN PEOPLE

## Solutions

- Accompany G2G with capacity building to enable GoG meet USG program management and reporting requirements
- Agree on a dedicated government project manager with sufficient time to dedicate to the project
- Engage an embedded technical advisor (or similar strategy) who knows and understand the HG education system, protocols, sensitivity, leadership, key players and can navigate the dynamics
- Develop clear channel of communication and communicate in a consistent and transparent manner about the program

**USAID**  
FROM THE AMERICAN PEOPLE

## Lessons Learned

- Requires additional diplomacy and tact, blending within and between partner government and USAID cultures
- Incorporate wide scale access to and use of EGR data for a variety of purposes
- Sustainability of EGR programs and maximal use of data
- For needed support, dedication and collaboration, may need to remind/orient HG is the project/activity is theirs
- Needs more and increasingly collaborative efforts from the technical and support offices i.e. OFM, EXO, PDO, RLA
- Cumulatively transformational
