THE SCIENCE OF
IMPROVING LIVES

This assessment was made possible by the generous support of the American people through the support of the U.S. Agency for International Development's Office of Food for Peace (USAID/FFP) and the USAID Bureau for Global Health, Office of Health, Infectious Diseases, and Nutrition, under terms of Cooperative Agreement No. AID-OAA-A-12-00005, through the Food and Nutrition Technical Assistance III Project (FANTA), managed by FHI 360.

The contents are the responsibility of FHI 360 and do not necessarily reflect the views of USAID or the United States Government.

Acknowledgments

The second Food Aid and Food Security Assessment (FAFSA-2) team would like to thank USAID/FFP, which is housed in the Bureau for Democracy, Conflict, and Humanitarian Assistance, for commissioning this cross-cutting, worldwide assessment of the overall Title II development program. The team is grateful for the opportunity to assist USAID/FFP's efforts to strengthen the contribution of Title II development programs to reducing food insecurity and undernutrition in some of the most vulnerable populations in the developing world.

The FAFSA-2 could not have been completed without the involvement and support of a wide range of individuals within USAID/FFP; the Office of Health, Infectious Diseases, and Nutrition, Bureau for Global Health; USAID/FFP partner organizations (including the Famine Early Warning Systems Network [FEWS NET], Bellmon Estimation Studies for Title II [BEST], the Technical and Operational Performance Support [TOPS] Project, and AMEX); and the Title II Awardee organizations at headquarters and in the field. We are grateful to all for their help in making the basic program documents accessible to us, for taking time to answer our many questions, and for being willing to discuss, in an open and transparent manner, the challenges, lessons learned, and options for improving program performance. We also owe a debt of gratitude to all the people we met with during our five country field visits from the USAID Missions, local governments, other donors, and the Awardee organizations, whose knowledge and guidance were essential to making these visits a success—and especially to the program participants and local leaders that we met in the Title II communities that took time out of their busy lives to share with us their experiences, challenges, opinions, and hopes for the future. We were impressed by the competence and dedication to the achievement of the program's overall goal on the part of so many of the people that we came into contact with during this assessment, in Washington and in the field, and wish all great success in the future.
