FY 2015 Small Business Indefinite Delivery Indefinite Quantity Contracts Report

The following report addresses the United States Agency for International Development's (USAID's) FY 2015 utilization of small businesses under Indefinite Delivery Indefinite Quantity Contracts (IDIQs). This report is provided pursuant to Senate Report 114-79, accompanying S. 1725.

In FY 2015, of the \$16.1 billion USAID obligated through its acquisition and assistance functions, \$2.23 billion was obligated through existing and new IDIQs. Approximately \$83 million or 3.7 percent of that amount was obligated to small businesses through IDIQs. In FY 2015, approximately \$459 million was obligated under IDIQs for new awards, of which approximately \$49 million or 11 percent was obligated to small businesses. Out of the total number of new IDIQ awards, 36 percent were made to small businesses.

Small businesses play a critical role in USAID's efforts to end extreme poverty and promote resilient, democratic societies. Over the last several years, the Agency has taken a number of steps to increase the utilization of small businesses. For example, to increase transparency and access for the small business community, USAID publishes a Business Forecast on a quarterly basis and organizes conference calls to discuss up-coming opportunities. To ensure that the Agency's small business goal of 11 percent worldwide in FY16 was broadly adopted, individual operating units set small business goals and training was provided on small business programs. Finally, USAID reviews all acquisitions exceeding \$25,000 to determine if the requirement includes opportunities for small business. Collectively, these actions have allowed USAID to exceed its small business utilization goals.

IDIQs for FY 2015¹

Business Type	Dollars Obligated under IDIQs		New IDIQ Awards	
	Total Obligations	New Awards Only	#	%
Small Business	\$83,473,613	\$49,476,589	103	36%
Non Small Business	\$2,150,175,885	\$409,871,705	180	64%
Total	\$2,233,649,498	\$459,348,294	283	100%
