ELECTRONIC GOVERNMENT RESOURCE CENTER PHASE II

AUGUST 2013 – DECEMBER 2017

$3.9 MILLION

OVERVIEW

USAID’s Electronic Government Resource Center Phase II (EGRC-II) project builds upon the successes of its phase I and enhances the policymaking capabilities of Afghanistan’s Ministry of Communications and Information Technology (MoCIT). Through a state-of-the-art resource center, EGRC-II aims to help the Afghan government to use information and communication technology to improve operations, increase transparency, and promote efficient service delivery.

EGRC-II provides technical expertise, skills, and guidance in distributing and utilizing e-government solutions throughout the ministries and agencies of the Afghan government. The e-government solutions make the government offices more competent in responding to citizens’ service requests such as passport and identification card applications. The e-government solutions also help the MoCIT in effectively implementing key legislative, policy, and strategic reforms needed for a thriving technology-driven private sector.
CURRENT ACTIVITIES

- Establish the E-Government Resource Center (EGRC) to help the Afghan government implement streamlined, modern, and effective electronic services.
- Develop and implement comprehensive cyber security and e-government strategies to reduce corruption and safeguard government information.
- Help the Afghan government develop legislation, policies, and regulations on preventing cyber-crime and ensuring cyber security.

ACCOMPLISHMENTS

- Finalized the review of EGRC architectural drawings, E-Government Strategic Plan, training and certification plan, and the Human Resource plan.
- Designed office floor plans and provided furniture and computer equipment for the Resource Center (to be located on the 15th floor of the MoCIT building).
- Trained 300 Afghan government employees on E-Government and Information Technology.
- Finalized the e-government implementation plan with 10 Afghan Ministries.
- Finalized the cyber security plan and the implementation method.
- Completed the e-government service plan and portal plan.
