Supporting the Philippine government’s efforts to rehabilitate the power facilities for internally displaced people in the war-stricken Marawi City

Developing renewable energy resources and increasing the resiliency of the electrical grid
- Constructing solar street lights and solar panels in rural health clinics
- Supplying lighting for women and girls to safely use common toilets at night

Using a Government-to-Government mechanism to support activities
- Training in solar photovoltaic (PV) installation and troubleshooting
- Fostering a strong relationship between the Philippine Department of Energy and the Lanao del Sur Electric Cooperative

Implementing Partners: RTI International
USAID Investment: $1.597 million
