

SENE YIRIWA (DELTA ZONE)

Description

Feed the Future (FTF) Mali Sène Yiriwa, prosperous agriculture in English, is a five-year activity working with farmers to increase and diversify production of crops and livestock, and sustainably improve on-farm resilience to climate, economic, and conflict-related shocks and stresses. Sène Yiriwa advances Mali's FTF Country Plan focusing on select agricultural value chains in 80 communes that are in Mali's FTF Zone of Influence and Resilience Focus Zone. DevWorks International leads the activity consortium which includes Catholic Relief Services (CRS), Sahel Eco, Tassaght, Texas A&M University, and others.

Sène Yiriwa is complemented by a market systems activity (Sugu Yiriwa) working in the same communes to collectively develop the supply and demand side of agricultural production. Sène and Sugu Yiriwa place special emphasis on the shock-prone socio-political and environmental context of the Delta Zone. These two activities along with Albarka, USAID's Resilience Food Security Activity in Mali, form the core of the Agency's community resilience efforts.

Goal

To catalyze integrated, inclusive, and diverse on-farm production systems leading to increased sales, availability, and access to nutritious foods for farming households.

Objectives

To advance the three core FTF goals:

- Promote inclusive and sustainable agricultural-led growth
- Increase resilience of people and communities
- Improve nutrition, especially among women adolescent girls, and children

Specific Objectives

- Improve delivery of quality products and services
- Increase productivity through climate-smart agriculture
- Increase incomes without reducing household's ability to farm
- Provide access to climate meteorological data
- Improve land and water resource management
- Increase the availability of nutrient-dense foods

Producer's Organization (PO) registry session in Mopti region

BUDGET: \$19,947,304

PROJECT CYCLE: 2021 – 2026

TARGET AREAS: 80 communes from 12 circles in the Delta Zone: Bandiagara, Bankass, Dire, Djénné, Douentza, Goundam, Koro, Mopti, Niafunké, Ténénkou, Tombouctou, and Youwarou.

PROJECT BENEFICIARIES:

Producer Organizations, smallholder farmers (agriculturalists and pastoralists) with an emphasis on women and youth.

IMPLEMENTING PARTNER:

DevWorks International

SELECTED EXPECTED RESULTS:

- 46,000 individuals participating in USG food security programs.
- 32,000 individuals applying improved technologies and/or management practices.
- 54,000 hectares under improved technology and/or management practices.
- 100 risk management plans formally proposed, adopted, and implemented in target communities.
- \$630,000 in new private sector investment.
