MEDIA INITIATIVES AND PARTNERSHIP SUPPORT PROJECT

Changes in the way information is generated and disseminated offer new opportunities and challenges for consumers of that information. The purpose of the Media Initiatives and Partnerships Support project (MIPS) is to help Serbian citizens to safely and smartly navigate a complex media and information landscape to become better informed and thus more capable of effectively participating in modern economic, social, and political life. The Project raises citizens' understanding and knowledge about key concepts, skills, and issues relevant to media digital and information literacy. The activity is undertaken in partnership with public institutions, educators, the media, non-profit and corporate sectors.

ACTIVITIES

The Media Initiatives and Partnerships Support project (MIPS) is working on increasing awareness and improving critical thinking skills in public administration, Serbian education system, and among social network users through the pursuit of four objectives:

1. Increasing public awareness and knowledge about key media and information literacy issues and concepts.
2. Strengthening the ability of media consumers to critically assess digital content and communicate safely and responsibly in the digital sphere, with an emphasis on the education system.
3. Enlarging the body of public knowledge and understanding of media, digital and information related issues and trends.
4. Fostering cross-sectoral partnerships among citizens, government, corporate and civil society actors to advance dialogue and engagement on digital rights and responsibilities.

RESULTS

- In cooperation with the Office of the Prime Minister and UNDP, USAID launched the “Digital Expedition” to explain and promote digital skills, online security, and digital literacy

concepts to the Serbian public. Since August 2021, citizens from 15 towns across Serbia have had the opportunity to learn about the basics of online security and digital literacy, e-Government and online commerce.

- The Industry Visits program, “Digital Expedition: Discovery program,” provided virtual tours of major digital companies (Direct Media, 3Lateral, SAGA, Microsoft, and Nordeus) to high-school students.
- In cooperation with the Ministry of Culture and Information and the National Academy for Public Administration, the Project developed a media literacy handbook for public servants and the corporate sector.
- The Project supported the Ministry of Education, Science and Technology and national educational institutes to improve the level of digital literacy in the educational system by developing handbooks for using online educational platforms like “Moodle” and training 279 teachers in online and hybrid teaching methods.
- In cooperation with Facebook Inc. and the National Democratic Institute (NDI), MIPS created the Influence Academy, a platform to engage and educate influencers on ethical standards and promote critical thinking skills on social media platforms.
